

Learning Outcomes based Curriculum Framework (LOCF)

for

Master of Technology (Computer Science) M.Tech. (CS)

(w.e.f. 2022-23)

Department of Computer Science and Information Technology
School of Technology
MAULANA AZAD NATIONAL URDU UNIVERSITY

1. Vision and Mission

1.1 Vision

To meet the requirements of the society by imparting knowledge, ethics and moral values with a holistic approach.

1.2 Mission

To impart quality education and to undertake research and extension with emphasis on application and innovation that cater to the emerging societal needs through all-round development of students of all sections enabling them to be globally competitive and socially responsible citizens embedded with ethical values.

1.3 Strategies for Attaining the Vision and Fulfilling the Mission

Following strategies will be used to ensure the accomplishment of the stated vision and mission:

1. To create an ambiance for healthy teaching-learning process and attract the motivated students to the Department of Computer Science and Information Technology
2. Ensure that the curriculum followed is comparable to the relevance of local, national, regional and global development
3. To motivate the potential faculty members/ educators who are constantly upgrading their pedagogical approaches to motivate students and to enhance learning among them
4. Provide opportunities to students for global exposure, industrial internships, project based and research-based learning

2. Program Educational Objectives

Program Educational Objectives (PEOs) are broad statements that describe the career and professional accomplishments that CS&IT Department is preparing its graduates to achieve during the graduation. Following four PEOs are defined as:

PEO 1. To train the graduates to acquire in depth knowledge of fundamental concepts and programming skills for holistic development.

PEO 2. To prepare the graduates for productive careers in software industry, corporate sector, Government Organizations.

PEO 3. To prepare graduates to acquire excellent computing ability so that they can analyze, design and create Solutions for real time problems.

PEO 4. To apply the current tools and techniques to create systems for solving Industry oriented problems.

3. Program Outcomes (POs)

Program outcomes are the narrower statements that describe what students are expected to know and be able to do upon graduation. POs represent the knowledge, skills and attitudes the students should have at the end of a program. Following are the statements for POs for computer application program. At the time of completing their degree requirements, students will be able to:

- PO₁:** Apply the knowledge of Mathematics, Science, and Engineering fundamentals, and an engineering specialization to solution of complex engineering problems (**Engineering Knowledge**).
- PO₂:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences (**Problem analysis**).
- PO₃:** Design of solutions for complex engineering problems and design of system components or processes that meet the specified needs with appropriate considerations of public health and safety, and cultural, societal, and environmental considerations (**Design/development of solutions**).
- PO₄:** Use research-based methods including design of experiments, analysis and interpretation of data and synthesis of information leading to logical conclusions (**Conduct investigations of complex problems**).
- PO₅:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling complex engineering activities with an understanding of limitations (**Modern tool usage**).
- PO₆:** Apply reasoning within the contextual knowledge to access societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice (**The engineer and society**).
- PO₇:** Understand the impact of the professional engineering solutions in the societal and environmental contexts, and demonstrate the knowledge of, and the need for sustainable developments (**Environment and sustainability**).
- PO₈:** Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice (**Ethics**).
- PO₉:** Function effectively as an individual independently and as a member or leader in diverse teams, and in multidisciplinary settings (**Individual and team work**).
- PO₁₀:** Communicate effectively on complex engineering activities with the engineering community and with society at large such as being able to comprehend and write effective reports and design documentation, make effective oral presentations, and give and receive clear instructions (**Communication**).
- PO₁₁:** Demonstrate knowledge and understanding of engineering management principles and apply those to one's own work as a member and leader of a team to manage projects in multidisciplinary environments (**Project management and finance**).
- PO₁₂:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change (**Life-long Learning**).

4. Program Specific Outcomes (PSOs)

Program Specific Outcomes (PSOs) are the statements that define outcomes of a program which make students realize the fact that knowledge and techniques learnt in a specific course has direct implication for the betterment of society and its sustainability.

- PSO 1:** The ability to design and develop applications using the knowledge of Mathematics, Science and Engineering fundamentals.
- PSO 2:** Ability to test and analyze the quality of developed applications and to integrate them in order to evolve a larger computing system.
- PSO 3:** Apply appropriate techniques, resources, and modern engineering and IT tools to address societal, health, safety, legal, and cultural issues.
- PSO 4:** To analyze and assess various functional and technical security challenges in protecting various digital assets and infrastructure in the internet era and to design and develop innovative technological solutions for the same

PSOs have to be attained by the students in due course of the two years program either as part of their Core, Discipline Specific Electives, Tools and techniques or as part of their various levels of seminar/ internship and project work.

5. Mapping between PEOs, POs and PSOs

The following Table lists the relationships between the PEOs, POs. and PSOs. The attainment of POs can be viewed as a strategy for attaining the PEOs. Each PEO is supported by multiple POs to ensure strength in compliance. Also, the relationship between individual PO and PEOs can vary between **Reasonable (1)** and **Strong (3)**.

PEOs	POs												PSOs			
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4
PEO1	2	2	3	3	2	2	1	1	2	1	1	2	2	1	1	2
PEO2	2	2	3	1	3	3	1	1	2	1	2	1	2	2	3	1
PEO3	2	3	2	3	3	2	1	1	3	2	1	2	1	3	1	2
PEO4	3	2	2	1	3	1	1	1	3	2	2	2	3	2	1	3

1 – Reasonable

2 – Significant

3 – Strong

6. Course Outcomes (COs)

Course Outcomes are narrower statements that describe what students are expected to know and be able to do at the end of the course. Course outcomes are defined for all courses as part of the syllabus for the course and are measured through performance on assignments, written and oral presentation reports related to individual and team projects and through the mid-term and semester end examinations. Detailed syllabi for each course associated with Course Objectives and Course Outcomes has been for specific outcomes associated with the course. Attaining the COs is at the heart of the educational activity. If COs of individual courses are successfully attained and the curriculum has been designed to achieve the Program Outcomes, then attainment of the POs is also ensured. An effective Assessment Plan has been devised to meet the objective, quantitative and independent measures to demonstrate that all POs and PEOs are being attained by the program.

7. Continuous Quality Improvement and Assessment Plan

The purpose of the Assessment Plan is to ensure attainment of all Program Outcomes (POs) and also the attainment of the Program Educational Objectives (PEOs) and to independently confirm that the POs and PEOs are being attained. Periodic monitoring of progress allows faculty members and the leadership to take corrective actions where the POs and PEOs are not meeting established targets. The process consists of assessing and evaluating the extent to which the student outcomes are being attained. The results of these assessments and evaluations are subsequently used as the primary inputs for making improvements to the program.

MAULANA AZAD NATIONAL URDU UNIVERSITY
SCHOOL OF TECHNOLOGY
DEPARTMENT OF COMPUTER SCIENCE & IT
M.Tech. (Computer Science)

General, Course structure & Theme & Semester-wise credit distribution

A. Definition of Credit:		
1	1 Hr. Lecture (L) per week	1 credit
2	1 Hr. Tutorial (T) per week	1 credit
3	2 Hours Practical (Lab)/week	1 credit

B. Range of credits:
A student requires to complete total 80 credits to be eligible to get Post Graduate degree in Computer Science.

C. Structure of Post graduate Computer Science program:			
S. No.	Course Type	Credit Breakup for M.Tech. Students	Credits
1	Program Core Course	PC	16
2	Program Elective Course	PE	20
3	Research Methodology & IPR	RMIPR	2
4	Generic Elective	GE	8
5	Laboratory	LAB	8
6	Mini Project with Seminar	MPS	2
7	Dissertation	DISS	24
Total			80

MAULANA AZAD NATIONAL URDU UNIVERSITY
 DEPARTMENT OF CS&IT
 SCHEME OF INSTRUCTIONS, EXAMINATION & EVALUATION
 (Effective for Batch Admitted from 2022-23 Academic Year)

M.Tech. (Computer Science)

Total Credits (2 Year Course): 80

I. INDUCTION PROGRAM (PLEASE REFER APPENDIX-A FOR GUIDELINES)	
Induction Program (mandatory)	3 Weeks duration (Please refer Appendix-A for guidelines & also details available in the curriculum of Mandatory courses)
Induction program for students to be offered right at the start of the first year.	<ul style="list-style-type: none"> ▪ Physical activity ▪ Creative Arts ▪ Universal Human Values ▪ Literary ▪ Proficiency Modules ▪ Lectures by Eminent People ▪ Visits to local Areas ▪ Familiarization to Dept./Branch & Innovations

Schedule

The activities during the Induction Program would have an Initial Phase, a Regular Phase and a Closing Phase. The Initial and Closing Phases would be two days each.

Initial Phase

Time	Activity
------	----------

Day 0

Whole day	Students arrive - Hostel allotment. (Preferably do pre-allotment)
-----------	---

Day 1

09:00 am - 03:00 pm	Academic registration
---------------------	-----------------------

04:30 pm - 06:00 pm	Orientation
---------------------	-------------

Day 2

09:00 am - 10:00 am	Diagnostic test (for English etc.)
---------------------	------------------------------------

10:15 am - 12:25 pm	Visit to respective depts.
---------------------	----------------------------

12:30 pm - 01:55 pm	Lunch
---------------------	-------

02:00 pm - 02:55 pm	Director's address
---------------------	--------------------

03:00 pm - 05:00 pm	Interaction with parents
---------------------	--------------------------

03:30 pm - 05:00 pm	Mentor-mentee groups - Introduction within group. (Same as Universal Human Values groups)
---------------------	---

Regular Phase

After two days is the start of the Regular Phase of induction. With this phase there would be regular program to be followed every day.

3.2.1 Daily Schedule

Some of the activities are on a daily basis, while some others are at specified periods within the Induction Program. We first show a typical daily timetable.

Sessn.	Time	Activity	Remarks
Day 3 onwards			
	06:00 am	Wake up call	
I	06:30 am - 07:10 am	Physical activity (mild exercise/yoga)	
	07:15 am - 08:55 am	Bath, Breakfast, etc.	
II	09:00 am - 10:55 am	Creative Arts / Universal Human Values	
		Half the groups do Creative Arts	
III	11:00 am - 12:55 pm	Universal Human Values / Creative Arts	Complementary alternate
	01:00 pm - 02:25 pm	Lunch	
IV	02:30 pm - 03:55 pm	Afternoon Session	See below.
V	04:00 pm - 05:00 pm	Afternoon Session	See below.
	05:00 pm - 05:25 pm	Break / light tea	
VI	05:30 pm - 06:45 pm	Games / Special Lectures	
	06:50 pm - 08:25 pm	Rest and Dinner	
VII	08:30 pm - 09:25 pm	Informal interactions (in hostels)	
Sundays are off and Saturdays have the same schedule as above or have outings.			

Afternoon Activities (Non-Daily)

The following five activities are scheduled at different times of the Induction Program, and are not held daily for everyone:

1. Familiarization to Dept./Branch & Innovations
2. Visits to Local Area
3. Lectures by Eminent People
4. Literary
5. Proficiency Modules

Here is the approximate activity schedule for the afternoons (may be changed to suit local needs):

Activity	Session	Remarks
Familiarization with Dept/Branch & Innovations	IV	For 3 days (Day 3 to 5)
Visits to Local Area	IV, V and VI	for 3- days
Lectures by Eminent People	IV	For 3 days - interspersed (e.g., 3 Saturdays)
Literary (Play / Book Reading / Lecture)	IV	As scheduled - 3-5 lectures
Proficiency Modules	V	For 3-5 days
		Daily, but only for those who need it

Closing Phase

Time	Activity
Last But One Day	
08:30 am - 12 noon	Discussions and finalization of presentation within each group
02:00 am - 05:00 pm	Presentation by each group in front of 4 other groups besides their own (about 100 students)
Last Day	
Whole day	Examinations (if any). May be expanded to last 2 days, in case needed.

Semester – I

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MTCS111PCT	Advanced Algorithm	PC	30	70	100	4-0-0	4
MTCS112PCT	Advanced Computer Architecture	PC	30	70	100	4-0-0	4
MTCS111RMT	Research Methodology & IPR	RMIPR	15	35	50	4-0-0	2
MTCS11XPET	Program Elective-1	PE	30	70	100	4-0-0	4
MTCS12XPET	Program Elective-2	PE	30	70	100	4-0-0	4
PGCS13XGET	Generic Elective-1	AC	30	70	100	4-0-0	4
MTCS160PCP	Lab – I Advanced Algorithm Lab	LAB	50	50	100	0-0-4	2
MTCS16XPEP	Lab – II (Based on Elective-I)	LAB	50	50	100	0-0-4	2
Total					800	22-0-8	26

Semester – II

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MTCS211PCT	Machine Learning	PC	30	70	100	4-0-0	4
MTCS212PCT	Internet of Things	PC	30	70	100	4-0-0	4
MTCS23XPET	Program Elective-3	PE	30	70	100	4-0-0	4
MTCS24XPET	Program Elective -4	PE	30	70	100	4-0-0	4
PGCS23XGET	Generic Elective-2	AC	30	70	100	4-0-0	4
MTCS260PCP	Lab – III-ML Lab	LAB	50	50	100	0-0-4	2
MTCS261PCP	Lab – IV -IoT Lab	LAB	50	50	100	0-0-4	2
MTCS270PCP	Mini Project with Seminar*	MPS	50	50	100	0-0-4	2
Total					800	20-0-12	26

*Students are encouraged to go to Industrial Training/Internship for at least 2-3 months during semester break. They need to make a prototype model in the allotted areas on the recommendations of the supervisor.

Semester – III

Course Code	Course Title	Course Type	Marks			L-T-P	Credits
			Internal Assessment	Semester Exam	Total		
MTCS31XPET	Program Elective -5	PE	30	70	100	4-0-0	4
MTCS370PCP	Dissertation-I	DISS	210	490	700	0-0-20	10

Course Code	Course Title				Lecture			Semester: I				
MTCS111PCT	Advanced Algorithm				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				3	1	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.				Maximum Score			:	100		
Periods/ Week	:	4				Internal Evaluation			:	30		
Credits	:	4				End Semester			:	70		
Instruction Mode	:	Lecture				Exam Duration			:	3 Hrs.		
Prerequisite(s): Algorithm Design												
Course Objectives:												
1. To learn an appropriate strategy to solve a problem.												
2. To devise algorithms by choosing appropriate data structures.												
3. To design and analyze implementation of algorithms and data structures for different kinds of problems.												
4. To gain knowledge about the inherent structure/hardness of a problem.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Understand the Programming Problem Statements for Algorithms.								PO ₁ , PO ₂ , PO ₄			
CO ₂	Understand the necessary mathematical abstraction to solve problems.								PO ₂ , PO ₄			
CO ₃	Analyze the Efficiency and Proofs of Correctness in Algorithms								PO ₃ , PO ₅			
CO ₄	Comprehend and select algorithm design approaches in a problem specific manner.								PO ₄ , PO ₉ , PO ₁₂			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2		3								
CO ₂		3		2								
CO ₃			2		3							
CO ₄				3					2			1
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to algorithm, Growth of functions, Master's Theorem, Sorting: Quick Sort, Heap Sort, Shaker Sort, and Counting Sort. Asymptotic Notation; Solving recurrence relations using substitution method.											
Unit: 2	Greedy Method: Minimum Spanning Tree-Prim's Algorithm, Tarjan's Algorithm Introduction to Dynamic programming, principal of optimality, Single Source Shortest Path-Bellman-Ford Algorithm, All Pairs Shortest Paths Algorithm-Johnson's Algorithm, Longest Common Sequence (LCS), Huffman's code.											
Unit: 3	String Matching: Introduction to String Matching, application of string matching, Naivealgorithm, Rabin Karp algorithm, Knuth Morris-Pratt algorithm, Boyer-Moore. Algorithm. Chained Matrix Multiplication, Traveling Salesperson Problem (TSP)											
Unit: 4	NP-Hard and NP-Complete problems: Basic Concepts, Non-Deterministic Algorithms, NP -Hard and NP-Complete Classes, Cook's theorem. Randomized Algorithms											
Unit: 5	Introduction to parallel algorithm. Parallel Algorithm- Analysis,											

	models, Parallel Random Access Machines (PRAM), Parallel Algorithm Structure, Parallel Algorithms for Sorting, Searching and Merging.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	Algorithms, Coreman, Rivest, Lisserson, PHI, Third Edition.
2	Design and Analysis of Algorithms, Manas Ranjan Kabat, PHI.
Reference Books:	
1	Design and Analysis of Algorithms, R. Panneerselvam, PHI.
2	Parallel Algorithms, Henri Casanova, Arnaud Legrand, Yves Robert, CRC Press.

Course Code	Course Title				Lecture			Semester: I

Periods/ Week	:	4			Internal Evaluation		:	30				
Credits	:	4			End Semester		:	70				
Instruction Mode	:	Lecture			Exam Duration		:	3 Hrs.				
Prerequisite(s): Computer Organization												
Course Objectives:												
1. To provide knowledge of the Parallelism concepts in Programming												
2. To provide an elaborate idea about the different memory systems and buses.												
3. To introduce the advanced processor architectures to the students.												
4. To acquaint the students with the importance of multiprocessor and multicomputer.												
Course Outcomes (CO):												
COs No.	Statement							Mapped Program Outcomes (POs)				
CO ₁	Understand the concepts of parallel computer models, pipeline and its hazards.							PO ₁ , PO ₂				
CO ₂	Explain the concepts of parallel computing and hardware technologies.							PO ₂ , PO ₃				
CO ₃	Understand the concept and importance of Memory Hierarchy, mapping techniques.							PO ₃ , PO ₄				
CO ₄	Comprehend Scalable Architectures, Pipelining, Superscalar processors, multiprocessors							PO ₄ , PO ₅				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2										
CO ₂		2	3									
CO ₃			3	2								
CO ₄				2	3							
1 - Reasonable; 2 - Significant; 3 - Strong												
Detailed Contents:												
Unit: 1	Review of Basic Organization and Architectural Techniques: RISC processors, Characteristics of RISC processors, RISC Vs CISC, Classification of Instruction Set Architectures Review of performance measurements, Basic parallel processing techniques: Instruction level, thread level and process level, Classification of parallel architectures.											
Unit: 2	Instruction Level Parallelism: Basic concepts of pipelining, Arithmetic pipelines, Instruction pipelines, Hazards in a pipeline: structural, data, and control, Hazards, Overview of hazard resolution techniques, Dynamic instruction scheduling, Branch prediction techniques, Instruction-level parallelism using software approaches, Superscalar techniques, Speculative execution.											
Unit: 3	Memory Hierarchies: Basic concept of hierarchical memory organization, Main memories, Cache design and implementation, Virtual memory design and implementation, Secondary technology.											
Unit: 4	Thread Level Parallelism: Centralized vs. distributed shared memory, Interconnection topologies, Multiprocessor architecture, Symmetric multiprocessors, Cache coherence problem, Synchronization, Memory consistency, Multicore architecture, Review of modern multiprocessors.											
Unit: 5	Process Level Parallelism: Distributed computers, Clusters, Grid, Mainframe computers. Peripheral Devices: Bus structures and standards, Synchronous and											

	asynchronous buses, Types and uses of storage devices, Interfacing I/O to the rest of the system, Reliability and availability, I/O system design, Platform architecture.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

MTCS111RMT	Research Methodology and IPR					L	T	P				
Version: 1.2	Date of Approval: 16th BoS 17-11-2022					3	1	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	30 Hrs.				Maximum Score			:	50		
Periods/ Week	:	4				Internal Evaluation			:	15		
Credits	:	2				End Semester			:	35		
Instruction Mode	:	Lecture				Exam Duration			:	2 Hrs.		
Prerequisite(s): No specific prerequisite												
Course Objectives:												
1. To understand research problem and scientific approaches applied for the same												
2. To design experiments and to analyze results of the experiments												
3. To prepare technical reports and research papers												
4. To understand the need of IPR to be promoted among students in general & engineering in particular.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Illustrate the research objectives and construct research problem scientifically								PO ₁ , PO ₂ , PO ₉ , PO ₁₂			
CO ₂	Apply the systematic approach to achieve research objectives and analyses results								PO ₄ , PO ₈ , PO ₉			
CO ₃	Explain the self-written research papers and defend in review committee								PO ₄ , PO ₆ , PO ₁₂			
CO ₄	Develop Reports and files								PO ₆ , PO ₁₂			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	1	2				2			3			
CO ₂				2				3	2			
CO ₃				3		2						3
CO ₄						3						3
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Research Problem & Research Design: Meaning of Research, Types of Research, Research Process, Sources of Research Problem, Characteristics of a Good Research Problem, Errors in Selecting a Research Problem, Objectives and Scope of Research Problem, Approaches of Investigation of Solutions for Research Problem, Research Design, Different Research Designs.											
Unit: 2	Data Analysis and Statistical Techniques: Quantitative Methods and Techniques, Sampling Design, Different Types of Sample Designs, Methods of Data Collection, Measures of Central Tendency, Measures of Variation, Measures of Relationship, Frequency Distribution, Identifying the Distribution with Data, Central Limit Theorem, Parameter Estimation, Chi-Square Test, Correlation Analysis, Regression Analysis, Time Series and Forecasting, hypothesis Testing.											
Unit: 3	Writing Report, Dissertation and Research Papers: Effective Technical Writing, Developing a Research Proposal, Format of Research Proposal, Presentation and Assessment by Review committee, Guidelines for Writing the Report, Research Paper, Understanding References, Citations and Indexing.											
Unit: 4	Intellectual property rights (IPR): Patents, Copyrights, Trademarks, Process of Patenting and Development, International cooperation on IPR, Procedure for Grants of Patents, Patenting under PCT.											
Unit: 5												

Examination and Evaluation Pattern: It include both internal evaluation (15 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (35 marks) which is mainly end semester examination.

MTCS160PCP	Advanced Algorithm Lab				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				0	0	4					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	50			
Credits	:	2			End Semester			:	50			
Instruction Mode	:	Practical			Exam Duration			:	3 Hrs.			
Prerequisite(s): Algorithm Design												
Course Objectives:												
1. To practice with programming skill and improve the programming logic.												
2. To understand the complexity of algorithms.												
3. To develop skills to apply appropriate data structures and algorithms in problem solving												
4. To Design and analyze implementations of algorithms and data structures for different kinds of problems.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Apply the Programming Problem Statements for Algorithms.								PO ₁ , PO ₂ , PO ₄			
CO ₂	Apply the necessary mathematical abstraction to solve problems.								PO ₂ , PO ₄			
CO ₃	Analyze the Efficiency and Proofs of Correctness in Algorithms								PO ₃ , PO ₅			
CO ₄	Demonstrate algorithm design approaches in a problem specificmanner.								PO ₄ , PO ₉ , PO ₁₂			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2		3								
CO ₂		3		2								
CO ₃			2		3							
CO ₄				3					2			1
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to algorithm, Growth of functions, Master’s Theorem, Sorting: Quick Sort, Heap Sort, Shaker Sort, and Counting Sort. Asymptotic Notation; Solving recurrence relations using substitution method											
Unit: 2	Greedy Method: Minimum Spanning Tree-Prim’s Algorithm, Tarjan’s Algorithm Introduction to Dynamic programming, principal of optimality, Single Source Shortest Path-Bellman-Ford Algorithm, All Pairs Shortest Paths Algorithm-Johnson’s Algorithm, Longest Common Sequence (LCS), Huffman’s code.											
Unit: 3	String Matching: Introduction to String Matching, application of string matching, Naive algorithm, Rabin Karp algorithm, Knuth Morris-Pratt algorithm, Boyer-Moore Algorithm. , Chained Matrix Multiplication, Traveling Salesperson Problem (TSP)											
Unit: 4	NP-Hard and NP-Complete problems: Basic Concepts, Non Deterministic Algorithms, NP -Hard and NP-Complete Classes, Cook’s theorem. Randomized Algorithms											
Unit: 5	Introduction to parallel algorithm. Parallel Algorithm- Analysis, models, Parallel											

	Random Access Machines (PRAM), Parallel Algorithm Structure, Parallel Algorithms for Sorting, Searching and Merging.
Examination and Evaluation Pattern: It include both internal evaluation (50 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (50 marks) which is mainly end semester examination.	
Text Books:	
1	The Algorithm Design Manual by Steve S. Skiena, Springer.
2	https://ds1-iiith.vlabs.ac.in/data-structures-1/ https://ds2-iiith.vlabs.ac.in/data-structures-2/
Reference Books:	
1	Algorithms: Design and Analysis, Harsh Bhasin, Oxford Publication.
2	The Design and Analysis of Algorithms, Annay Levitin, Pearson.

Course Code	Course Title				Lecture			Semester: II				
MTCS211PCT	Machine Learning				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction				Scheme of Examination								
No. of Periods	:	60 Hrs.		Maximum Score		:	100					
Periods/ Week	:	4		Internal Evaluation		:	30					
Credits	:	4		End Semester		:	70					
Instruction Mode	:	Lecture		Exam Duration		:	3 Hrs.					
Prerequisite(s): Knowledge of basic data science algorithms												
Course Objectives:												
1. To learn about the purpose of Machine Learning and where it applies to the real worlds.												
2. To understand a range of machine learning algorithms along with their strengths and weaknesses.												
3. To learn methodology and tools to apply machine learning algorithms.												
4. To real data and evaluate their performance.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Understand the importance of data pre-processing before machine learning modeling.						PO ₁ , PO ₂ , PO ₅					
CO ₂	Ability to formulate machine learning techniques to respective problems.						PO ₂ , PO ₄ , PO ₅					
CO ₃	Performance and evaluation of learning algorithms and model selection.						PO ₁ , PO ₅					
CO ₄	Apply machine learning algorithms to solve problems of various complexity.						PO ₁ , PO ₂ , PO ₃					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	3			2							
CO ₂		3		2	3							
CO ₃	3				3							
CO ₄	2	2		3								
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to Machine Learning - Defining learning systems, Goals and applications of machine learning in different fields such as health care, banking, telecommunication, digital marketing and so on. Aspects of developing a learning system: training and testing data, concept representation, function approximation, a general overview of supervised, semi-supervised, unsupervised learning algorithms and the usage of each algorithm.											
Unit: 2	Basics of Python: Introduction to Python, Control structure and function: if-elif-else, while loop, for loop, break and continue, Introduction to function, Types of functions, Function arguments, Lambda functions, File Handling, packages and modules. Python Data Structures: Lists, Tuples, Dictionary, Sets, strings, NumPy: NumPy operation, Array and its operation, Matrix and associated operations, Linear algebra and related operations using python. Understand the advantage of using Python libraries for implementing Machine Learning models. Types of data sets.											
Unit: 3	Pandas data frame and data frame related operations on dataset: Reading and writing data files, pandas append, insert, replace, dropping columns from dataframe, groupby and aggregate function, join operations, Exploratory data analysis, Data preparation and preprocessing (Dealing with missing value, cross-validation, classification, performance measure).											

	Data visualization on dataset using matplotlib and seaborn libraries: Scatter plot, Line plot, Bar plot, Histogram, Box plot, Pair plot.
Unit: 4	Regression - Linear, Non-linear, Logistic regression and Multiple regression, and their applications. Classification technique - KNN, ANN, Decision Trees- Minimum Description. Information Gain, Entropy, Cross Validation and different classification accuracy metrics.
Unit: 5	Clustering approaches - Types of clustering, k-means clustering, Partitioned-based Clustering, Hierarchical Clustering, and Density-based Clustering. Support Vector Machines: Maximum margin linear separators. Kernels for learning non-linear functions. Bayesian Learning: theory and Bayes rule. Naive Bayes learning algorithm. Parameter smoothing. Bayes nets and Markov nets for representing dependencies.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	Tom Michel, Machine Learning, McGraw Hill, 1997.
2	Introduction to Machine Learning with Python, Andreas C. Mueller.
3	Mastering Python for data science, Samir Madhavan.
Reference Books:	
1	Machine Learning Methods in the Environmental Sciences, Neural Networks, William W Hsieh, Cambridge Univ Press.
2	McKinney, W. (2012). Python for data analysis: Data wrangling with Pandas, NumPy, and iPython.

Course Code	Course Title		Lecture			Semester: II

Version: 1.2	Date of Approval: 16th BoS 17-11-2022		4	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score		:	100						
Periods/ Week	:	4	Internal Evaluation		:	30						
Credits	:	4	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Computer Networks												
Course Objectives:												
1. Vision and Introduction to IOT. 2. Understand IoT Market perspective. 3. Data and Knowledge Management and use of Devices in IoT Technology. 4. Understand State of Art-IoT Architecture and its implementation.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Explain & demonstrate various components of IoT along with Issues and Challenges in IoT					PO ₂ , PO ₄						
CO ₂	Apply and analyze the role and importance of IoT in the modern world.					PO ₁ , PO ₂ , PO ₅						
CO ₃	Investigate and propose of various requirements of IoT for real World applications.					PO ₂ , PO ₃ , PO ₅						
CO ₄	Evaluate a variety of existing and developing architecture technologies for IoT and to describe and evaluate different applications of the IoT.					PO ₁ , PO ₂ , PO ₃ , PO ₄ , PO ₁₂						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

Course Code	Course Title		Lecture			Semester: II						
MTCS260PCP	Machine Learning with Python - Lab		L	T	P							
Version: 1.2	Date of Approval: 16th BoS 17-11-2022		0	0	4							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score		:	100						
Periods/ Week	:	4	Internal Evaluation		:	50						
Credits	:	2	End Semester		:	50						
Instruction Mode	:	Practical	Exam Duration		:	3 Hrs.						
Prerequisite(s): Knowledge of basic data science algorithms.												
Course Objectives:												
1. To understand the basic concepts and techniques of machine learning through python programming.												
2. To develop skills of using recent machine learning packages for solving practical problems.												
3. To gain experience of doing independent study and research.												
4. To design and implement Machine learning Algorithms.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Able to demonstrate python packages					PO ₁ , PO ₂						
CO ₂	Able to generate and analyze and interpret data using python					PO ₂ , PO ₃						
CO ₃	Use Python to design and implement classifiers for machine learning applications.					PO ₂ , PO ₃ , PO ₄						
CO ₄	Implement an end-to-end machine learning system					PO ₂ , PO ₃ , PO ₄ , PO ₅						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	1	1										
CO ₂		3	2									
CO ₃		2	3	2								
CO ₄		2	3	2	2							
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Lab experiments are based on the syllabus prescribed for Machine learning algorithm using python.												
1. Basic data structures and operations of python programming.												
2. Write the python code for data cleaning the data (Note: Don't import repackage in python)												
3. Write the python code for finding the Euclidean distance between two data points.												
4. Write a python code for handling the missing value feature in the provided data set.												
5. Implementation of k-nearest neighbors (KNN) algorithm to classify the iris data set. Print both correct and wrong predictions. Python ML library classes can be used for this problem.												
6. Implement the classification problem, training and testing data can be used to build classification models.												
7. Implement the class of accuracy metrics for classification: precision, recall, f1 score, accuracy score.												
8. Implementation of K -Means algorithm.												
9. Implementation of Decision Tree-based ID3 algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample.												
10. Implementation of the Random Forest algorithm.												
11. Implementation of Naive Bayesian classifier for a sample training data set stored as a.CSV file. Compute the accuracy of the classifier, considering few test data sets.												
12. Implementation of Simple Linear Regression using sklearn.												
13. Implementation of regression using ordinary least squares method.												
14. Implement the non-parametric Locally Weighted Regression algorithm in order to fit data points. Select appropriate data set for your experiment and draw graphs.												
15. Implementation of Different multi-class SVM techniques using Binary class SVM library.												
16. Case study: Predicting the price of pre-owned cars, Classifying personal income.												

17. Implementation of CNN using Tensorflow/Keras library and classify the Images (Note: Take your own dataset of your choice).
18. Implementation of Grid search and Random search using Logistic Regression.

Examination and Evaluation Pattern: It include both internal evaluation (50 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (50 marks) which is mainly end semester examination.

MTCS261PCP	Internet of Things Lab		L	T	P							
Version: 1.2	Date of Approval: 16th BoS 17-11-2022		0	0	4							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score		:	100						
Periods/ Week	:	4	Internal Evaluation		:	50						
Credits	:	2	End Semester		:	50						
Instruction Mode	:	Practical	Exam Duration		:	3 Hrs.						
Prerequisite(s): Computer Networks												
Course Objectives:												
1. Understanding IoT and the role of the Cloud in IoT.												
2. Understanding IoT development platform like Arduino, Raspberry Pi.												
3. Understanding IoT Sensors and ThingSpeak.												
4. Create IoT applications.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand core concept of IoT development.					PO ₁						
CO ₂	Understand the concept of Sensors, Actuators and Cloud.					PO ₁ , PO ₂						
CO ₃	Understand and create the data acquisition on cloud					PO ₂ , PO ₃ , PO ₄						
CO ₄	Create the IoT applications					PO ₃ , PO ₄ , PO ₅						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	1											
CO ₂	2	2										
CO ₃		2	2	2								
CO ₄			2	2	2							
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
1. Study and Install IDE of Arduino and different types of Arduinos.												
2. Write program using Arduino IDE for Blink LED.												
3. Write Program for RGB LED using Arduino.												
4. Study the Temperature sensor and Write Program for monitor temperature using Arduino.												
5. Study and Implement RFID, NFC using Arduino.												
6. Study and implement MQTT protocol using Arduino.												
7. Study and Configure Raspberry Pi.												
8. WAP for LED blisnk using Raspberry Pi												
9. Study and Implement Zigbee Protocol using Arduino / Raspberry Pi.												
10. To understand what is cloud, its importance, usage, services and types of Cloud.												
11. To familiarize with ThingSpeak and understand the procedure of creation of a Channel over ThingSpeak.												
12. To upload DHT11 sensor data to ThingSpeak channel through Raspberry pi2.												
13. To upload Light sensor (TSL) data to ThingSpeak channel through Raspberry pi2												
14. To read Light Sensor data from ThingSpeak channel and store it into database through Raspberry pi2.												
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

PROGRAM ELECTIVES

Course Code	Course Title				Lecture			Semester: I				
MTCS111PET	Advanced Network Security				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				3	1	0					
Scheme of Instruction				Scheme of Examination								
No. of Periods		:	60 Hrs.		Maximum Score		:	100				
Periods/ Week		:	4		Internal Evaluation		:	30				
Credits		:	4		End Semester		:	70				
Instruction Mode		:	Lecture		Exam Duration		:	3 Hrs.				
Prerequisite(s): Network Security												
Course Objectives:												
1. To understand the concept of security and privacy.												
2. To understand various protocols for network security to protect against the threats in the networks.												
3. To understand E-mail security, PEM& S/MIME, PGP, Firewalls.												
4. To introduce new developing security features.												
Course Outcomes (CO):												
COs No.		Statement						Mapped Program Outcomes (POs)				
CO ₁		Understand the developing security features in networking systems and real time communication security.						PO ₁ , PO ₂ , PO ₄ , PO ₅ , PO ₁₀ , PO ₁₂				
CO ₂		Implement various networking protocols.						PO ₃ , PO ₄				
CO ₃		Apply research in the emerging areas of cryptography and network security.						PO ₃ , PO ₄ , PO ₅				
CO ₄		Analyze and protect any network from the threats in the world.						PO ₆ , PO ₉ , PO ₁₂				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	3		3	2	1				1		2
CO ₂			2	3								
CO ₃			2	2	3							
CO ₄						1			2			2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to the concepts of Security: The need for security, security approaches, principles of security, modular arithmetic, prime numbers, relative prime numbers, Euler's function, Symmetric Cryptography: Overview of symmetric cryptography, Algorithm types and Modes, International Data Encryption, Algorithm (IDEA), Advanced Encryption Standard (AES)											
Unit: 2	Asymmetric Cryptography: Overview of asymmetric cryptography, Robin algorithm, ElGamal Algorithm, Knapsack Algorithm, Elliptic Curve Cryptography.											
Unit: 3	Identity Based Cryptography: Introduction, Boneh-Franklin IBE (BF-IBE), Sakai-Kasahara IBE (SK-IBE), Boneh-Boyen IBE, (BB-IBE)											
Unit: 4	Public Key Infrastructure: Digital Certificates, Key Management. Hash Functions, Digital Signature, Message Integrity, Message Authentication, Entity Authentication											
Unit: 5	Security at the Application Layer: Email, PGP. Security at the Transport Layer: SSL and TLS. Security at the Network Layer: IPSec. System Security: Malicious Programs, IDS, Firewalls.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												

1	Cryptography and Network security, Behrouz A. Forouzan and Debdeep Mukhopadhyay, McGraw Hill.
2	Introduction to Modern Cryptography, Jonathan Katz and Yehuda Lindell, CRC Press.
Reference Books:	
1	Understanding Cryptography, Christof Paar and Jan Pelzl, Springer.
2	Cryptography and Information Security, V K Pachghare, PHI.

Course Code	Course Title				Lecture			Semester: II				
MTCS112PET	Distributed Database				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				3	1	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods		:	60 Hrs.		Maximum Score		:	100				
Periods/ Week		:	4		Internal Evaluation		:	30				
Credits		:	4		End Semester		:	70				
Instruction Mode		:	Lecture		Exam Duration		:	3 Hrs.				
Prerequisite(s): Database Management System												
Course Objectives:												
1. To understand principles and foundations of distributed databases.												
2. To learn concepts related to architecture, design issues, integrity control, query processing.												
3. To understand the concept of a database transaction and related database facilities, including concurrency control, backup and recovery.												
4. To interpret the modeling symbols for the most popular ER modeling tools. And real-world database design which often involves conflicting goals.												
Course Outcomes (CO):												
COs No.		Statement						Mapped Program Outcomes (POs)				
CO ₁		Understand and successfully apply logical database design principles, including E-R diagrams and database normalization.						PO ₁ , PO ₂ , PO ₃ , PO ₄				
CO ₂		Design and implement a small distributed database project.						PO ₃ , PO ₄ , PO ₉				
CO ₃		Understand the modeling symbols for the most popular ER modeling tools in context to real-world database design which often involves conflicting goals.						PO ₂ , PO ₃ , PO ₄ , PO ₉				
CO ₄		Apply optimization, transactions, and concurrency control in distributed environment						PO ₁ , PO ₁₁ , PO ₁₂				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2	3	2								
CO ₂			3	2					2			
CO ₃		2	3	3					2			
CO ₄	2										2	2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1		Introduction: Distributed Data Processing, what is a Distributed Database System? Promises of DDBSs Problem Areas. advantages and disadvantages of distributed database, additional functions of Distributed database, distributed DBMS,										
Unit: 2		Distributed DBMS Architecture: DBMS Standardization, Architectural Models for Distributed DBMSs, Distributed DBMS Architecture. Distributed Database Design: Alternative Design Strategies, Distribution Design Issues, Fragmentation, Replication, Replication Techniques, Fragmentation schema, allocation schema data replication.										
Unit: 3		Overview of Query Processing: Query Processing Problem, Objectives of Query Processing, Complexity of Relational Algebra Operations, Layers of Query Processing. Query Decomposition and Optimization: Query Decomposition, Query Optimization, Centralized Query Optimization, Semi joins Distributed Query Optimization Algorithms.										
Unit: 4		Transaction Management and Concurrency Control: Definition of a Transaction, properties of Transactions, Serializability Theory, Taxonomy of Concurrency Control Mechanisms, Locking-based Concurrency Control Algorithms, Timestamp-based Concurrency Control Algorithms. Deadlock										

	Management.
Unit: 5	Distributed DBMS Reliability: Reliability Concepts and Measures, Failures and Fault Tolerance in Distributed Systems, Failures in Distributed DBMS, Local Reliability Protocols, Distributed Reliability Protocols.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	OzsuM. Tamer, ValduriezPatrick, "Distributed Database Systems", 2nd Edition, Pearson, 2011

MTCS113PET	Data Science				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				3	1	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	30			
Credits	:	4			End Semester			:	70			
Instruction Mode	:	Lecture			Exam Duration			:	3 Hrs.			
Prerequisite(s): Data warehouse and Data Mining												
Course Objectives:												
1. To provide with the knowledge and expertise to become a proficient data scientist.												
2. To Demonstrate an understanding of statistics and machine learning concepts that are vital for datascience												
3. To Produce Python code to statistically analyses a dataset												
4. To Critically evaluate data visualizations based on their design and use for communicating stories from data												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Understand the concepts - Obtain, clean/process, and transform data								PO ₁ , PO ₄ , PO ₅			
CO ₂	Analyze and interpret data using an ethically responsible approach.								PO ₂ , PO ₈			
CO ₃	Apply mathematical and statistical models, and the principles of optimization to appropriately formulate and use data analyses								PO ₁ , PO ₄ , PO ₅			
CO ₄	Interpret data findings visually, and in written formats								PO ₂ , PO ₃ , PO ₁₀			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3			2	2							
CO ₂		3						3				
CO ₃	3			3	3							
CO ₄		2			3					3		
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to core concepts and technologies: Introduction, Terminology, data science process, data science toolkit, Types of data, Example applications											
Unit: 2	Data collection and management: Introduction, Sources of data, Data collection and APIs, Exploring and fixing data, Data storage and management, Using multiple data sources											
Unit: 3	Data analysis: Introduction, Terminology and concepts, Introduction to statistics, Central tendencies and distributions, Variance, Distribution properties and arithmetic, Samples/CLT, Basic machine learning algorithms, Linear regression, SVM, Naive Bayes.											
Unit: 4	Data visualization: Introduction, Types of data visualization, Data for visualization: Data types, Data encodings, Retinal variables, Mapping variables to encodings, Visual encodings.											
Unit: 5	Applications of Data Science, Technologies for visualization, Bokeh (Python), Recent trends in various data collection and analysis techniques, various visualization techniques, application development methods of used in data science.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Cathy O'Neil and Rachel Schutt. Doing Data Science, Straight Talk From The Frontline. O'Reilly.											

2	Jure Leskovek, AnandRajaraman and Jeffrey Ullman. Mining of Massive Datasets. v2.1, Cambridge University Press.

MTCS114PET	Semantics Web				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				3	1	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score				:	100		
Periods/ Week	:	4			Internal Evaluation				:	30		
Credits	:	4			End Semester				:	70		
Instruction Mode	:	Lecture			Exam Duration				:	3 Hrs.		
Prerequisite(s): Database Management System & Networks												
Course Objectives:												
1. To acquaint about the Semantic Web Vision.												
2. To Understand about XML, RDF, RDFS, OWL.												
3. To Create and Query the Ontology.												
4. To introduce Ontology Reasoning and Migrate from Document to Data Web.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Understand the concepts of structure of the semantic web technology, semantics of knowledge and resource, ontology.								PO ₁ , PO ₂ , PO ₄			
CO ₂	Evaluate logic semantics and inference with OWL.								PO ₁ , PO ₂ , PO ₅ , PO ₈ , PO ₉			
CO ₃	Apply ontology engineering approaches in semantic applications								PO ₃ , PO ₄			
CO ₄	Understand Web graph processing for various applications such as search engine, community detection								PO ₁ , PO ₅ , PO ₈ , PO ₁₂			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2		2								
CO ₂	3	2			2			3	2			
CO ₃		2		3								
CO ₄	3				3			3				2
1 - Reasonable; 2 - Significant; 3 - Strong												
Detailed Contents:												
Unit: 1	Foundation of Semantic Web Technologies: Introduction, Current web vs Semantic Web, Semantic Web Technologies, A layered approach Descriptive Logic, Introduction, Definition of the basic formalism, Reasoning algorithms, Language extensions											
Unit: 2	Structured Web Documents in XML: Introduction, XML, Structuring, Namespaces, Addressing andquerying XML document, Processing											
Unit: 3	Describing Web Resources: RDF : Introduction, RDF: Basic Ideas, RDF: XML-Based Syntax, RDFserialization, RDF Schema: Basic Ideas, RDF Schema: The Language, RDF and RDF Schema in RDF Schema											
Unit: 4	Web Ontology Language: OWL, Introduction, OWL and RDF/RDFS, Three Sublanguages of OWL,Description of the OWL Language, Layering of OWL, Examples, OWL in OWL											
Unit: 5	SPARQL: SPARQL simple Graph Patterns, Complex Graph Patterns, Group Patterns, Queries with DataValues, Filters, OWL Formal Semantics											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:

MTCS121PET	Intelligent Systems				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				3	1	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	30			
Credits	:	4			End Semester			:	70			
Instruction Mode	:	Lecture			Exam Duration			:	3 Hrs.			
Prerequisite(s): Artificial Intelligence												
Course Objectives:												
1. To provide the concepts of intelligent systems.												
2. To develop problem solving skills by searching.												
3. To explain knowledge representation, problem solving, and reasoning.												
4. To deal with uncertainty and design agents to handle them.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Understand the characteristics, scope and limits of the intelligent systems.								PO ₁ , PO ₂			
CO ₂	Analyze the problem solving by searching								PO ₂ , PO ₃			
CO ₃	Apply the knowledge representation, problem solving, and reasoning								PO ₄ , PO ₅			
CO ₄	Analyze the reasons for uncertainty, biological inspired algorithms and design agents to handle them								PO ₄ , PO ₉ , PO ₁₀			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2										
CO ₂		2	2									
CO ₃				2	2							
CO ₄				2					2	3		
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction and Overview of Intelligent Systems and Intelligent Agents: History and Foundation of Intelligent Systems, Knowledge-based systems, Expert Systems. Intelligent Agents: Agents and Environments, Characteristics of Intelligent Agents, Definition of a Rational Agent, Structure of an Agent, Reflex agents, Goal-based agents, Utility-based agents, Multi-agent Systems.											
Unit: 2	Problem Solving by Search: Uninformed Search (Blind Search): BFS, DFS, Depth-Limited Search, Iterative Deepening DFS, Bidirectional Search; Informed (Heuristic) Search: Best-First Search, A* Search, IDA* Search; Hill Climbing Search, Simulated Annealing Search, Local Beam Search; Online Search; Adversarial Search: The minimax algorithm, Alpha-Beta Pruning.											
Unit: 3	Knowledge Representation and Reasoning: Propositional Logic: Operators, Inference, Equivalence, Validity, Satisfiability, Resolution; First Order Predicate Logic (FOPL); Inference in First Order Logic; Rule Based System; Forward and Backward Chaining.											
Unit: 4	Managing Uncertainty: Dealing with Uncertainty: Conditional Probability, Bayes' Rules, Bayesian Reasoning, Bayesian Networks, Introduction to Dempster-Shafer Theory; Fuzzy Set Theory: Fuzzy Sets, Representing Fuzzy Sets, Operations with Fuzzy Sets, Fuzzy Inference, Fuzzyfication & Defuzzyfication, Fuzzy Models.											
Unit: 5	Biological Foundations to Intelligent Systems: Artificial Neural Networks (ANN): Neurons, Hebb's Rule, Single & Multi-layer Perceptron, Backpropagation Algorithm; Genetic Algorithms: Crossover, Mutation, Selection; Introduction to											

	Particle Swarm Optimization; Introduction to Ant Colonies Optimization; Hybrid Intelligent Systems.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:

MTCS122PET	Augmented & Virtual Reality				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				3	1	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score				:	100		
Periods/ Week	:	4			Internal Evaluation				:	30		
Credits	:	4			End Semester				:	70		
Instruction Mode	:	Lecture			Exam Duration				:	3 Hrs.		
Prerequisite(s): Artificial Intelligence												
Course Objectives:												
1. To understand the basic concept and framework of virtual reality.												
2. To understand the elements, architecture, input and output devices of virtual and augmented reality systems.												
3. To explore the research issues in Augmented Reality and Virtual Reality (AR &VR).												
4. To Understand AR environments												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Analyze the research issues in Augmented Reality and Virtual Reality (AR&VR).								PO ₁ , PO ₂ , PO ₃			
CO ₂	Evaluate the main application of VR and AR technologies in various area like education games etc.								PO ₁ , PO ₂ , PO ₅			
CO ₃	Analyze the role and importance of VR &AR in the modern world.								PO ₃ , PO ₄ , PO ₉			
CO ₄	Create the Application of 3D in Augmented Reality and the challenges faced								PO ₂ , PO ₁₂			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2	3									
CO ₂	3	2			2							
CO ₃			1	2					2			
CO ₄		2										2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction of Virtual Reality: Fundamental Concept and Components of Virtual Reality. Primary Features and Present Development on Virtual Reality.											
Unit: 2	Multiple Models of Input and Output Interface in Virtual Reality: Input -- Tracker, Sensor, Digital Glove, Movement Capture, Video-based Input, 3D Menus & 3DScanner etc. Output - Visual /Auditory / Haptic Devices.											
Unit: 3	Visual Computation in Virtual Reality: Fundamentals of Computer Graphics. Software and Hardware Technology on Stereoscopic Display. Advanced Techniques in CG: Management of Large-Scale Environments & Real Time Rendering.											
Unit: 4	Interactive Techniques in Virtual Reality: Body Track, Hand Gesture, 3D Manus, Object Grasp. Development Tools and Frameworks in Virtual Reality: Frameworks of Software Development Tools in VR. X3D Standard; Vega, MultiGen, Virtools etc. Application of VR in Digital Entertainment: VR Technology in Film & TV Production. VR Technology in Physical Exercises and Games. Demonstration of Digital Entertainment by VR.											
Unit: 5	Augmented and Mixed Reality, Taxonomy, technology and features of augmented reality, difference between AR and VR, Challenges with AR, AR systems and functionality, Augmented reality methods, visualization techniques for augmented reality, wireless displays in educational augmented reality applications, mobile											

	projection interfaces, marker-less tracking for augmented reality, enhancing interactivity in AR environments, evaluating AR systems.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

Course Code	Course Title				Lecture			Semester: I				
MTCS123PET	Soft Computing				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				3	1	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score		:	100				
Periods/ Week	:	4			Internal Evaluation		:	30				
Credits	:	4			End Semester		:	70				
Instruction Mode	:	Lecture			Exam Duration		:	3 Hrs.				
Prerequisite(s): Machine Learning, MATLAB												
Course Objectives:												
1. To introduce soft computing concepts and techniques and foster their abilities in designing appropriate technique for a given scenario.												
2. To implement soft computing-based solutions for real-world problems.												
3. To provide knowledge of non-traditional technologies and fundamentals of artificial neural networks, fuzzy sets, fuzzy logic, genetic algorithms.												
4. To provide student hands-on experience on MATLAB to implement various strategies.												
Course Outcomes (CO):												
COs No.	Statement							Mapped Program Outcomes (POs)				
CO ₁	Evaluate soft computing techniques and their roles in building intelligent machines.							PO ₂ , PO ₄				
CO ₂	Apply fuzzy logic and reasoning to handle uncertainty and solve various engineering problems.							PO ₁ , PO ₃ , PO ₄				
CO ₃	Apply genetic algorithms to combinatorial optimization problems.							PO ₂ , PO ₃ , PO ₄ , PO ₁₂				
CO ₄	Evaluate and compare solutions by various soft computing approaches for a given problem.							PO ₂ , PO ₄				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁		1		3								
CO ₂	3		3	2								
CO ₃		3	2	2								2
CO ₄		3		3								
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to Soft Computing and Neural Network: Evolution of Computing: Soft Computing Constituents, From Conventional AI to Computational Intelligence: Machine Learning Basics.											
Unit: 2	Fuzzy Logic: Fuzzy Sets, Operations on Fuzzy Sets, Fuzzy Relations, Membership Functions: Fuzzy Rules and Fuzzy Reasoning, Fuzzy Inference Systems, Fuzzy Expert Systems, Fuzzy Decision Making.											
Unit: 3	Neural Networks: Machine Learning Using Neural Network, Adaptive Networks, Feed forward Networks, Supervised Learning Neural Networks, Radial Basis Function Networks: Reinforcement Learning, Unsupervised Learning Neural Networks, Adaptive Resonance architectures, Advances in Neural networks.											
Unit: 4	Genetic Algorithms: Introduction to Genetic Algorithms (GA), Applications of GA in Machine Learning: Machine Learning Approach to Knowledge Acquisition.											
Unit: 5	Recent Trends in deep learning, various classifiers, neural networks and genetic algorithm. Implementation of recently proposed soft computing techniques.											

Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

MTCSI24PET	Digital Forensics					L	T	P				
Version: 1.2	Date of Approval: 16th BoS 17-11-2022					3	1	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.				Maximum Score			:	100		
Periods/ Week	:	4				Internal Evaluation			:	30		
Credits	:	4				End Semester			:	70		
Instruction Mode	:	Lecture				Exam Duration			:	3 Hrs.		
Prerequisite(s): Cyber Security												
Course Objectives:												
1. Understand the concept of Cybercrime & digital forensic, digital evidence & its role.												
2. Interpret & apply various digital forensic models.												
3. Interpret & apply various phases of methodology on incident.												
4. Interpret & apply digital forensic Tools in real-Time scenario.												
Course Outcomes (CO):												
COs No.		Statement							Mapped Program Outcomes (POs)			
CO ₁		Analyze the need for cybercrime investigation and understand the hardware and software components responsible for seeking evidence.							PO ₁ , PO ₅			
CO ₂		Apply knowledge on the techniques used for collecting evidences.							PO ₁ , PO ₂ , PO ₃ , PO ₄			
CO ₃		Analyze the evidence through suitable tools.							PO ₃ , PO ₄ , PO ₅ , PO ₁₀			
CO ₄		Analyze other sources of evidences							PO ₂ , PO ₃ , PO ₄			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂

CO ₂	2	3	3	3								
CO ₃			3	2	1					3		
CO ₄		2	3	2								
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to Digital Forensics: Cybercrimes, Types of Cybercrimes, Digital Evidence, Cyber Forensics, Classification of Cyber Forensics, Digital Forensics Process, people involved in SFI, setting up a Forensics Lab, Building a Computer Forensic Tool kit.											
Unit: 2	Understanding Hard Disks and File Systems: Disk Drive & Types of Disk Drives, Physical structure of KDD, HDD Addressing, Types of Partitions, Booting, Difference between Cold Bot Warm Bot, File Systems, FAT & NTFS, List of Forensic software used for File System Analysis.											
Unit: 3	Defeating Anti-Forensics Techniques, various Anti-forensics Techniques, File recovery tools for WINDOWS OS, Partition, Partition recovery Tools, Password Cracker. Data acquisition & Duplication, Live data acquisition & Static data acquisition, Data Acquisition & Duplication Hardware & Software Tools.											
Unit: 4	Network Forensics: Active & Passive Network Forensics, Types of Network vulnerabilities. Investigating Web Attacks, Web Application Forensics, Challenges in Web Application Forensics, Symptoms of Web Attacks, steps for investigating Web Attacks, Investigation Web Attacks in WINDOWS & LINUX based servers, Mobile Forensics, analyzing malicious files.											
Unit: 5	Data Base Forensics: Database, Database Forensics, analyzing DB Files using DB Browser for SQLite. IOT Forensics, Performing Data Acquisition in Android											

	Devices. Cloud Forensics: Cloud computing, Cloud Forensics, types of Cloud services, Types of Cloud Deployment Models, Challenges faced by investigators during Cloud Forensics, investigating E-mail Crimes, E-mail Forensics Tools.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

MTCS160PEP	Advanced Network Security Lab				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				0	0	4					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	50			
Credits	:	2			End Semester			:	50			
Instruction Mode	:	Practical			Exam Duration			:	3 Hrs.			
Prerequisite(s): Network Security Lab												
Course Objectives:												
<ol style="list-style-type: none">To understand and protect the network infrastructure, architecture, protocols and applications in order to deliver secured protocols, applications, services and data.To Train the students to develop 'hands-on' skills on using tools and test beds in order.To design network and security experiments/simulations.To prepare the students to perform critical thinking, idea generation and implementation, and integration with existing systems when solving real research problems.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Demonstrate the ability to understand and synthesize the principles of network security architectures and security frameworks and models;								PO ₁ , PO ₂			
CO ₂	Understand Data integrity, Authentication, Digital Signatures.								PO ₃ , PO ₄ , PO ₅			
CO ₃	Analyze, design and manage the requirements of a secure network architecture based on risk analysis and operational requirements in accordance with regulations and standards.								PO ₂ , PO ₃			
CO ₄	Analyze Various network security applications, IPSec, Firewall, IDS, Web security, Email security, and Malicious software etc.								PO ₄ , PO ₅ , PO ₁₂			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂

Course Code	Course Title				Lecture			Semester: I				
MTCS161PEP	Distributed Database Lab				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				0	0	4					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	50			
Credits	:	2			End Semester			:	50			
Instruction Mode	:	Practical			Exam Duration			:	3 Hrs.			
Prerequisite(s): Digital Electronics												
Course Objectives:												
1. Understand principles and foundations of distributed databases.												
2. Learn concepts related to architecture, design issues, integrity control, query processing.												
3. Understand the concept of a database transaction and related database facilities, including concurrency control, backup and recovery.												
4. To interpret the modeling symbols for the most popular ER modeling tools. And real-world database design which often involves conflicting goals.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Be able to apply methods and techniques for distributed query processing and optimization.								PO ₁ , PO ₂			
CO ₂	Understand distributed database systems architecture and design.								PO ₃ , PO ₄			
CO ₃	Understand the broad concepts of distributed transaction process.								PO ₃ , PO ₄ , PO ₅			
CO ₄	Implement of replication in distributed database system								PO ₃ , PO ₄ , PO ₅ , PO ₉			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	3										
CO ₂			2	2								
CO ₃			3	2	3							
CO ₄			2	2	3				2			
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
List of Excrement												
1. Examine and implement of Basic database management operations and SQL queries.												
2. Examine and implement fragmentation and its types in distributed database system.												
3. Examine and implement materialized view.												
4. Implement different types of joins.												
5. Implement heterogeneous databases.												
6. Examine and implement of replication in distributed database system.												
7. A mini project based on Distributed Databases.												
Examination and Evaluation Pattern: It include both internal evaluation (50 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (50 marks) which is mainly end semester examination.												
Text Books:

Version: 1.2	Date of Approval: 16th BoS 17-11-2022		0	0	4							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score		:	100						
Periods/ Week	:	4	Internal Evaluation		:	50						
Credits	:	2	End Semester		:	50						
Instruction Mode	:	Practical	Exam Duration		:	3 Hrs.						
Prerequisite(s): Object Oriented Database												
Course Objectives:												
1. To Optimize business decisions and create competitive advantage with Big Data analytics.												
2. To Impart the architectural concepts of Hadoop and introducing map reduce paradigm.												
3. To Develop Big Data applications for streaming data using Apache Spark.												
4. To learn the Data Analytics												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand data summarization, query, and analysis.					PO ₁ , PO ₂						
CO ₂	Apply data modelling techniques to large data sets					PO ₂ , PO ₇ , PO ₁₂						
CO ₃	Creating applications for Big Data analytics					PO ₄ , PO ₅						
CO ₄	Building a complete business data analytic solution					PO ₃ , PO ₄ , PO ₅						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	1	2										
CO ₂		2					3					2
CO ₃				2	3		2					
CO ₄			3	2	3							
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
1. Form setting up and Installing Hadoop in its two operating modes: □ Pseudo distributed, □ fully distributed.												
2. Implement the following file management tasks in Hadoop:												
i) Adding files and directories □ Retrieving files												
ii) Deleting files Benchmark and stress test an Apache Hadoop cluster.												
3. Run a basic Word Count Map Reduce program to understand Map Reduce Paradigm. □ Find the number of occurrences of each word appearing in the input file(s) □ Performing a MapReduce Job for word search count (look for specific keywords in afile)												
4. Stop word elimination problem:												
5. Input: o A large textual file containing one sentence per line o A small file containing a set of stop words (One stop word per line)												
6. Output: o A textual file containing the same sentences of the large input file without the words appearing in the small file.												
7. Write a Map Reduce program that mines weather data. Weather sensors collecting data every hour at many locations across the globe gather large volume of log data, which is a good candidate for analysis with MapReduce, since it is semi structured and record-oriented. Data available at: https://github.com/tomwhite/hadoopbook/tree/master/input/ncdc/all .												
8. Find average, max and min temperature for each year in NCD data set?												
9. Filter the readings of a set based on value of the measurement, Output the line of input files associated with a temperaturevalue greater than 30.0 and store it in a separate file.												
10. Install and Run Pig then write Pig Latin scripts to sort, group, join, project, and filter your data.												
11. Write a Pig Latin scripts for finding TF-IDF value for book dataset (A corpus of eBooks available at: Project Gutenberg)												
12. Install and Run Hive then use Hive to create, alter, and drop databases, tables, views												

functions, and indexes.	
13. Install, Deploy & configure Apache Spark Cluster. Run apache spark applications using Scala.	
14. Data analytics using Apache Spark on Amazon food dataset, find all the pairs of items frequently reviewed together.	
15. Write a single Spark application that: <ul style="list-style-type: none"> o Transposes the original Amazon food dataset, obtaining a PairRDD of the type: $\rightarrow o$ Counts the frequencies of all the pairs of products reviewed together; o Writes on the output folder all the pairs of products that appear more than once and their frequencies. The pairs of products must be sorted by frequency. 	
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:

Course Code	Course Title				Lecture			Semester: I				
MTCS163PEP	Semantics Web Lab				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				0	0	4					
Scheme of Instruction					Scheme of Examination							
No. of Periods		:	60 Hrs.		Maximum Score		:	100				
Periods/ Week		:	4		Internal Evaluation		:	50				
Credits		:	2		End Semester		:	50				
Instruction Mode		:	Practical		Exam Duration		:	3 Hrs.				
Prerequisite(s): Semantics Web												
Course Objectives:												
1. To acquaint about the Semantic Web Vision.												
2. To Understand about XML, RDF, RDFS, OWL.												
3. To Create and Query the Ontology.												
4. To form Ontology Reasoning and Migrate from Document to Data Web.												
Course Outcomes (CO):												
COs No.	Statement							Mapped Program Outcomes (POs)				
CO ₁	Understanding about XML, RDF, RDFS, OWL							PO ₁ , PO ₂ , PO ₄				
CO ₂	Describe logic semantics and inference with OWL							PO ₁ , PO ₂ , PO ₅				
CO ₃	Apply Querying Ontology							PO ₁ , PO ₂ , PO ₅ , PO ₈ , PO ₉				
CO ₄	Create Web graph processing for various applications such as Search engine, community detection							PO ₁ , PO ₅ , PO ₈				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2		2								
CO ₂	3	2			2							
CO ₃	3	2			3			3	2			
CO ₄	3				3			2				
1 - Reasonable; 2 - Significant; 3 - Strong												
Detailed Contents:												
List of experiments:												
1. Working with XML,												
2. Working with XML Schema, DTD												
3. Design Of Ontology using RDF												
4. Design RDF document with different Serialization format (e.g. turtle,N-triple)												
5. Design Of Ontology using RDFS												
6. Design Of Ontology using OWL												
7. Case study: Pizza Ontology												
8. Querying Ontology using SPARQL												
9. Design of any domain specific Ontology in Protégé												
10. Case Study: Dbpedia												
11. Case study: LOD Cloud												
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

Course Code	Course Title				Lecture			Semester: II				
MTCS231PET	Blockchain Technology				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.				Maximum Score			:	100		
Periods/ Week	:	4				Internal Evaluation			:	30		
Credits	:	4				End Semester			:	70		
Instruction Mode	:	Lecture				Exam Duration			:	3 Hrs.		
Prerequisite(s): Network Security												
Course Objectives:												
1. To understand the function of Blockchain as a method of securing distributed ledgers.												
2. To familiarize the functional/operational aspects of cryptocurrency ecosystem.												
3. To familiarize about wallets and learn their utilization of wallet during transaction.												
4. To understand that how to write and apply the Smart Contracts.												
Course Outcomes (CO):												
COs No.		Statement								Mapped Program Outcomes (POs)		
CO ₁		Apply the Blockchain implementation								PO ₁ , PO ₂ , PO ₃		
CO ₂		Apply the smart contracts on Ethereum platform.								PO ₄ , PO ₅		
CO ₃		Apply the use cases on Hyperledger.								PO ₄ , PO ₆		
CO ₄		Evaluate the major research challenges and technical gaps existing between theory and practice in Blockchain.								PO ₁ , PO ₃		
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2	2									
CO ₂				2	2							
CO ₃				2		2						
CO ₄	3		2									
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to Cryptography, Introduction to graph, ring and field, prime and relative prime numbers, modular arithmetic, Fermat's and Euler's theorem, Euclid's Algorithm, RSA algorithm, Diffie-Hellman key exchange algorithm, ElGamal Encryption, Elliptic curve cryptography, SHA 256, Digital Signature, Zero Knowledge Proof (ZKP)											
Unit: 2	Introduction from barter system to Cryptocurrency, fundamental of Blockchain, Block structure, Genesis Block, Orphaned Blocks, Stale Block, Uncle Block, Distributed Ledger Technology (DLT), peer-to- peer network, Merkle Tree, Lifecycle of Blockchain, Evolutions of Blockchain, Fork, double spending money, Transactions and UTXO's, Types of Blockchain. Need of Blockchain, Benefits of Blockchain.											
Unit: 3	Build the Blockchain, Chain validation, Create the Blockchain Network, Mining pools, Mining, Difficulty Level, Current Target, Nonce, how miners pick transactions, Work of mempools work, 51% attack. Consensus Algorithms: Proof of Work (PoW), Asynchronous Byzantine Agreement, Proof of Stake (PoS), Hybrid models (PoW + PoS), DPoS.											
Unit: 4	Wallets, Types of wallets-Hardware, Software, Paper, Web, Desktop. Ethereum – Ethereum network, Ethereum Virtual Machine (EVM), Wallets for Ethereum, Solidity – Smart Contracts, Truffle, Web3, some attacks on smart contracts, Design and issue Cryptocurrency ICO, Mining, Gas – Transactional Fee & Incentivisations, DApps, Decentralized Autonomous Organizations (DAO). Implement the use case of supply chain on Ethereum.											

Unit: 5	Introduction to Hyperledger, what is Hyperledger, Why Hyperledger, Where can Hyperledger be used, Hyperledger Architecture, Membership, Blockchain, Transaction, Chaincode, Hyperledger Fabric, Features of Hyperledger, Fabric Installation of prerequisite, Architecture of Hyperledger Fabric, Transaction, Ledger, Nodes, Peer, Endorser, Ordering Nodes, Channels, Certificate Authority, Transaction Flow. Implement the use case of supply chain on Hyperledger.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	Mastering Blockchain, Imran Bashir, Packt Publishing

Course Code	Course Title				Lecture			Semester: II				
MTCS232PET	Compilers for High Performance Computing				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods		:	60 Hrs.			Maximum Score			:	100		
Periods/ Week		:	4			Internal Evaluation			:	30		
Credits		:	4			End Semester			:	70		
Instruction Mode		:	Lecture			Exam Duration			:	3 Hrs.		
Prerequisite(s): Compiler Design												
Course Objectives:												
1. To introduce structure of compilers and high-performance compiler design.												
2. To understand the Concepts of Data Dependence in compilation.												
3. To understand concurrency analysis in translation.												
4. To understand cache coherence and parallel loops in compilers.												
Course Outcomes (CO):												
COs No.		Statement								Mapped Program Outcomes (POs)		
CO ₁		Understand parallel programming patterns and data dependence								PO ₁ , PO ₂		
CO ₂		Analyze the design and develop parallel programs								PO ₁ , PO ₂ , PO ₃		
CO ₃		Analyze different parallel programming patterns								PO ₂ , PO ₃		
CO ₄		Evaluate comparative analysis among different parallel solutions								PO ₂ , PO ₃ , PO ₅		
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2										
CO ₂	2	2	3									
CO ₃		2	3									
CO ₄		2	2		3							
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1		High Performance Systems, Structure of a Compiler, Programming Language Features, Languages for High Performance, Data Dependence: Data Dependence in Loops, Data Dependence in Conditionals, Data Dependence in Parallel Loops, Program Dependence Graph.										
Unit: 2		Scalar Analysis with Factored Use-Def Chains: Constructing Factored UseDef Chains, FUD Chains for Arrays, Induction Variables Using FUD Chains, Constant Propagation with FUD Chains, Data Dependence for Scalars. Data Dependence Analysis for Arrays, Array Region Analysis, Pointer Analysis, I/O Dependence, Procedure Calls, Inter-procedural Analysis.										
Unit: 3		Loop Restructuring: Simple Transformations, Loop Fusion, Loop Fission, Loop Reversal, Loop Interchanging, Loop Skewing, Linear Loop Transformations, Strip-Mining, Loop Tiling, Other Loop Transformations, and Inter-procedural Transformations, Optimizing for Locality: Single Reference to Each Array, Multiple References, General Tiling, Fission and Fusion for Locality.										
Unit: 4		Concurrency Analysis: Concurrency from Sequential Loops, Concurrency from Parallel Loops, Nested Loops, Round off Error, Exceptions and Debuggers. Vector Analysis: Vector Code, Vector Code from Sequential Loops, Vector Code from For all Loops, Nested Loops, Round off Error, Exceptions, and Debuggers, Multi-vector Computers.										
Unit: 5		Message-Passing Machines: SIMD Machines, MIMD Machines, Data Layout, Parallel Code for Array Assignment, Remote Data Access, Automatic Data Layout, Multiple Array Assignments, Scalable Shared-Memory Machines: Global Cache Coherence, Local Cache Coherence, Latency Tolerant Machines. Recent trends										

	in compiler design for high performance computing and message passing machines and scalable shared memory machine.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	Michael Wolfe, High-Performance Compilers for Parallel Computing, Pearson
2	Keith Cooper, Linda Torczon, Engineering: A Compiler, MK Publishers

Course Code	Course Title				Lecture			Semester: II				
MTCS233PET	Distributed Computing				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score		:	100				
Periods/ Week	:	4			Internal Evaluation		:	30				
Credits	:	4			End Semester		:	70				
Instruction Mode	:	Lecture			Exam Duration		:	3 Hrs.				
Prerequisite(s): Artificial Intelligence												
Course Objectives:												
1. To understand the basics of networking and the protocols used in distributed environment.												
2. To evaluate the impact of memory on parallel/distributed algorithm formulations.												
3. To validate the performance of parallel/distributed algorithm.												
4. To gain knowledge of design and implementation of distributed algorithms.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Analyze various issues in the design and implementation of distributed computing systems.						PO ₁ , PO ₂ , PO ₃					
CO ₂	Categorize the various system models, communication between client and server.						PO ₂ , PO ₃ , PO ₄					
CO ₃	Apply the knowledge of deadlock methods and its algorithms.						PO ₄ , PO ₅					
CO ₄	Understand the significance of distributed file system with real time applications.						PO ₂ , PO ₃ , PO ₆					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	3	3									
CO ₂		3	3	2								
CO ₃				3	2							
CO ₄		2	2			2						
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction Distributed Computing Models, Software Concepts, Hardware Concepts, The Client Server model, Issues in design of a distributed operating system. Communication Introduction to Message Passing, Advantages and features of message passing, Message format, Message Buffering, Remote Procedure Call, Extended RPC Models, Remote Object Invocation, Message Oriented Communication.											
Unit: 2	Processes And Synchronization Threads, code migration, clock synchronization, logical clocks, global state, Election algorithms, mutual exclusion, Distributed transaction.											
Unit: 3	Distributed Deadlock Detection System model, Resources vs. communication deadlocks, deadlock prevention, avoidance, detection and resolution, Centralized deadlock detection, distributed deadlock detection, path pushing and edge chasing algorithm											
Unit: 4	Distributed Shared Memory Introduction, General architecture of distributed shared memory, Design and implementation, Issues of DSM, Granularity, structure of shared memory space, consistency models, thrashing, advantages of DSM											
Unit: 5	Distributed File System Introduction, Desirable features of good distributed file system, file models, file accessing, sharing, caching methods, file replication, fault tolerance, Case Study: CORBA (CORBA RMI and Services)											

Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

MTCS234PET	Natural Language Processing				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score		:	100				
Periods/ Week	:	4			Internal Evaluation		:	30				
Credits	:	4			End Semester		:	70				
Instruction Mode	:	Lecture			Exam Duration		:	3 Hrs.				
Prerequisite(s): Computer Programming and Database												
Course Objectives:												
1. To understand natural language processing and												
2. To learn how to apply basic algorithms in this field of NLP.												
3. To get acquainted with the algorithmic description of the main language levels: morphology, syntax, semantics, and pragmatics, as well as the resources of natural language data - corpora.												
4. To conceive basics of knowledge representation, inference, and relations to the artificial intelligence.												
Course Outcomes (CO):												
COs No.	Statement							Mapped Program Outcomes (POs)				
CO ₁	Understand natural language processing and learn how to apply basic algorithms in this field.							PO ₁ , PO ₂				
CO ₂	Understand the algorithmic description of the main language levels: morphology, syntax, semantics, and pragmatics, as well as the resources of natural language processing.							PO ₄ , PO ₆ , PO ₈				
CO ₃	Analyze language modelling and sequence tagging.							PO ₂ , PO ₄ , PO ₆ , PO ₇ , PO ₈				
CO ₄	Understand the design features of information retrieval systems							PO ₁ , PO ₃ , PO ₆ , PO ₁₂				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2										
CO ₂				3		1		2				
CO ₃		2		1		2	2	2				
CO ₄	2		3			2						2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction: Introduction to the Morphology, Syntax, Semantics by linking the “linguistics view” (computational linguistics) with the “artificial intelligence view” (natural language processing).											
Unit: 2	Morphology: Analysis and generation of language on word level: e.g. problems with compounding and idiomatic phrases, homophonous strings as well as loan words and their processing using e.g. finite state automata as well as semantic networks. Ambiguities in words like “pen” and “pipe”, but will also discuss some complex strings.											
Unit: 3	Syntax: Analysis and generation of language on phrasal and sentence level: e.g. applications such as machine translation and grammar checking and the processing using phase structure grammars as well as unification-based formalisms and relating those formalisms to recursive transition networks (RTNs) as well as augmented transition networks (ATNs).											
Unit: 4	Syntax: Analysis and generation of language on phrasal and sentence level: e.g. applications such as machine translation and grammar checking and the processing using phase structure grammars as well as unification-based formalisms and relating those formalisms to recursive transition networks (RTNs) as well as augmented transition networks (ATNs).											

Unit: 5	Applications of NLP: Machine Translation, Grammar Checkers Dictation, Automatic Document Generation, NL Interfaces.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

Course Code	Course Title				Lecture			Semester: II				
MTCS235PET	Quantum Computing				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	30			
Credits	:	4			End Semester			:	70			
Instruction Mode	:	Lecture			Exam Duration			:	3 Hrs.			
Prerequisite(s): Artificial Intelligence and Machine Learning												
Course Objectives:												
1. To understand the building blocks of Quantum computers and highlight the paradigm change between conventional computing and quantum computing.												
2. To understand entangled quantum subsystems and properties of entangled states.												
3. To understand the Quantum state transformations and the algorithms.												
4. To explore the applications of quantum computing.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Understand the basic principles of quantum computing.								PO ₁ , PO ₃			
CO ₂	Analyze the knowledge of the fundamental differences between conventional computing and quantum computing.								PO ₁ , PO ₂ , PO ₉			
CO ₃	Apply several basic quantum computing algorithms.								PO ₂ , PO ₃ , PO ₄			
CO ₄	Analyze the classes of problems that can be expected to be solved well by quantum computers.								PO ₁ , PO ₂ , PO ₃ , PO ₄ , PO ₅			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3		2									
CO ₂	3	2							2			
CO ₃		3	3	1								
CO ₄	3	3	3	2	2							
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Qubit & Quantum States: The Qubit, Vector Spaces. Linear Combination Of Vectors, Uniqueness of a spanning set, basis & dimensions, inner Products, orthonormality, gram- schmidt orthogonalization, bra-ket formalism, the Cauchy-schwarz and triangle Inequalities.											
Unit: 2	Matrices & Operators: Observables, The Pauli Operators, Outer Products, The Closure Relation, Representation of operators using matrices, outer products & matrix representation, matrix representation of operators in two dimensional spaces, Pauli Matrix, Hermitian unitary and normal operator, Eigen values & Eigen Vectors, Spectral Decomposition, Trace of an operator, important properties of Trace, Expectation Value of Operator, Projection Operator, Positive Operators.											
Unit: 3	Commutator Algebra, Heisenberg uncertainty principle, polar decomposition & singular values, Postulates of Quantum Mechanics.											
Unit: 4	Tensor Products: Representing Composite States in Quantum Mechanics, Computing inner products, Tensor products of column vectors, operators and tensor products of Matrices. Density Operator: Density Operator of Pure & Mix state, Key Properties, Characterizing Mixed State, Practical Trace & Reduce Density Operator, Density Operator & Bloch Vector.											
Unit: 5	Quantum Measurement Theory: Distinguishing Quantum states & Measures, Projective Measurements, Measurement on Composite systems, Generalized Measurements, Positive Operator- Valued Measures. Recent trends in Quantum											

	Computing Research, Quantum Computing Applications of Genetic Programming.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	Quantum Computing without Magic by Zdzislaw Meglicki
2	Quantum Computing Explained By DAVID Mc MAHON
Reference Books:	
1	Quantum Computer Science By Marco Lanzagorta, Jeffrey Uhlmann
2	An Introduction to Quantum Computing Phillip Kaye, Raymond Laflamme, Michele Mosca.

MTCS241PET	Advanced Operating System				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	30			
Credits	:	4			End Semester			:	70			
Instruction Mode	:	Lecture			Exam Duration			:	3 Hrs.			
Prerequisite(s): Operating System												
Course Objectives:												
1. To provide knowledge of the main components of OS and their working.												
2. To Introduce the concepts of process and thread and their scheduling policies.												
3. To impart knowledge of Handling synchronization of concurrent processes and deadlocks.												
4. To Analyze the different techniques for managing memory, I/O, disk and files.												
Course Outcomes (CO):												
COs No.	Statement							Mapped Program Outcomes (POs)				
CO ₁	Understand the general architecture of computer system.							PO ₂ , PO ₃ , PO ₄				
CO ₂	Understand, contrast and compare differing structures for operating systems.							PO ₁ , PO ₂ , PO ₆ , PO ₈ , PO ₉				
CO ₃	Gain proficiency needed to analyze theory and implementation of: processes, scheduling, I/O and files systems.							PO ₁ , PO ₂ , PO ₃ , PO ₅ , PO ₇ , PO ₁₂				
CO ₄	Analyze various types of operating systems including Unix/Linux and Get in-depth knowledge of memory management for operating systems.							PO ₂ , PO ₃				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁		3	3	2								
CO ₂	3	2				3		2	2			
CO ₃	2	3	3		2		2					2
CO ₄		2	3									
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction: Operating system concept - processes and threads, process model, process creation, process termination, process hierarchies, and process states, Implementation of processes, Threads- Thread model, thread usage, Implementation of threads in user space and kernel, Hybrid implementations											
Unit: 2	Inter Process Communication: Race conditions, critical regions, Mutual Exclusion with busy waiting, sleep and wakeup, Semaphores, Mutexes, Monitors, Message passing; Scheduling: scheduling in batch systems, Interactive systems, Real time systems, Thread scheduling.											
Unit: 3	Deadlocks: Introduction, Deadlock Detection and Recovery – Deadlock Detection with one resource of each type, with multiple resource of each type, recovery from deadlock; Deadlock Avoidance, Deadlock Prevention.											
Unit: 4	Memory and Device Management: Introduction, Swapping, Paging, Virtual memory – Demand paging, page replacement Algorithms; File System Management- Organization of File System, File Permissions, MS DOS and UNIX file system case studies, NTFS; Device Management- I/O Channels, Interrupts and Interrupt Handling, Types of device allocation.											
Unit: 5	Distributed Operating Systems: Distributed operating system concept – Architectures of Distributed Systems, Distributed Mutual Exclusion, Distributed Deadlock detection, Agreement protocols, Threads, processor Allocation, Allocation algorithms, Distributed File system design; Real Time											

	Operating Systems: Introduction to Real Time Operating Systems, Concepts of scheduling, Real time Memory Management.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

Course Code	Course Title				Lecture			Semester: II				
MTCS242PET	Digital Image Processing				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score		:	100				
Periods/ Week	:	4			Internal Evaluation		:	30				
Credits	:	4			End Semester		:	70				
Instruction Mode	:	Lecture			Exam Duration		:	3 Hrs.				
Prerequisite(s): Machine Learning												
Course Objectives:												
1. To study the image fundamentals and mathematical transforms necessary for image processing.												
2. To Understand image restoration and image compression procedures.												
3. To Analyze and identify different feature extraction techniques for image analysis and recognition.												
4. To introduce segmentation and morphological processing techniques.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Understand the basics of image processing enhancement techniques such as Image formation and transformation using sampling and quantization.						PO ₁ , PO ₄ , PO ₆					
CO ₂	Apply the mathematical modelling of image restoration and compression techniques.						PO ₂ , PO ₃ , PO ₄ , PO ₅					
CO ₃	Comprehend image compression standards by image segmentation and representation techniques.						PO ₁ , PO ₃ , PO ₄					
CO ₄	Analyze and apply compression and coding techniques used for Image data.						PO ₂ , PO ₃ , PO ₁₂					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2			1		1						
CO ₂		2	3	2	2							
CO ₃	3		3	2								
CO ₄		3	3									1
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to Image Processing: Image formation, image geometry perspective and other transformation, stereo imaging elements of visual perception. Digital Image-sampling and quantization serial & parallel Image processing.											
Unit: 2	Signal Processing: Signal Processing - Fourier, Walsh-Hadamard discrete cosine and Hotelling transforms and their properties, filters, correlators and convolvers. Image enhancement-Contrast modification, Histogram specification, smoothing, sharpening, frequency domain enhancement, pseudo-colour.											
Unit: 3	Image Restoration: Image Restoration-Constrained and unconstrained restoration Wiener filter, motion blur remover, geometric and radiometric correction Image data compression-Huffman and other codes transform compression, predictive compression two tone Image compression, block coding, run length coding, and contour coding.											
Unit: 4	Segmentation Techniques: Segmentation Techniques-thresh holding approaches, region growing, relaxation, line and edge detection approaches, edge linking, supervised and unsupervised classification techniques, remotely sensed image analysis and applications.											
Unit: 5	Shape Analysis: Shape Analysis – Gestalt principles, shape number, moment Fourier and other shape descriptors, Skelton detection, Hough transform,											

	topological and texture analysis, shape matching. Practical Applications – Finger print classification, signature verification, text recognition, map understanding, bio-logical cell classification.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

MTCS243PET	Advanced Wireless & Mobile Networks		L	T	P							
Version: 1.2	Date of Approval: 16th BoS 17-11-2022		4	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score		:	100						
Periods/ Week	:	4	Internal Evaluation		:	30						
Credits	:	4	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Mathematics												
Course Objectives:												
1. To Understand the wireless/mobile market and the future needs and challenges.												
2. To acquaint with key concepts of wireless networks, standards, technologies and their basic operations.												
3. To analyze and design various medium access.												
4. To demonstrate the applications.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Apply advanced knowledge of networking and wireless networking and understand various types of wireless networks, standards, operations and use Cases					PO ₁ , PO ₂ , PO ₆						
CO ₂	Analyze and design WLAN, WPAN, WWAN, Cellular based upon under lying propagation and performance analysis.					PO ₁ , PO ₃ , PO ₄ , PO ₉						
CO ₃	Create and Design wireless networks exploring trade-offs between wire line and wireless links.					PO ₃ , PO ₄ , PO ₁₀						
CO ₄	Analyze and develop mobile applications to solve some of the real-world problems.					PO ₃ , PO ₅ , PO ₁₂						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂

CO ₂	2		1	2					2			
CO ₃			1	2						2		
CO ₄			2		2							1
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction: Wireless Networking Trends, Key Wireless Physical Layer Concepts, Multiple Access Technologies -CDMA, FDMA, TDMA, Spread Spectrum technologies, Frequency reuse, Radio Propagation and Modelling, Challenges in Mobile Computing: Resource poorness, Bandwidth, energy etc. Wireless Local Area Networks: IEEE 802.11 Wireless LANs Physical & MAC layer, 802.11 MAC Modes (DCF & PCF) IEEE 802.11 standards, Architecture & protocols, Infrastructure vs. Adhoc Modes, Hidden Node & Exposed Terminal Problem, Problems, Fading Effects in Indoor and outdoor WLANs, WLAN Deployment issues.											
Unit: 2	Wireless Cellular Networks: 1G and 2G, 2.5G, 3G, and 4G, Mobile IPv4, Mobile IPv6, TCP over Wireless Networks, Cellular architecture, Frequency reuse, Channel assignment strategies, Handoff strategies, Interference and system capacity, Improving coverage and capacity in cellular systems, Spread spectrum Technologies.											
Unit: 3	WiMAX (Physical layer, Media access control, Mobility and Networking), IEEE 802.22 Wireless Regional Area Networks, IEEE 802.21 Media Independent Handover Overview Wireless Sensor Networks: Introduction, Application, Physical, MAC layer and Network Layer, Power Management. Tiny OS Overview											

Unit: 4	Wireless PANs: Bluetooth AND Zigbee, Introduction to Wireless Sensors. Security: Security in wireless Networks Vulnerabilities, Security techniques, Wi-Fi Security, DoS in wireless communication.
Unit: 5	Advanced Topics: IEEE 802.11x and IEEE 802.11i standards, Introduction to Vehicular Adhoc Networks, Opportunistic Networks.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score		:	100				
Periods/ Week	:	4			Internal Evaluation		:	30				
Credits	:	4			End Semester		:	70				
Instruction Mode	:	Lecture			Exam Duration		:	3 Hrs.				
Prerequisite(s): Computer Networks												
Course Objectives:												
1. To introduce soft computing concepts and techniques and foster their abilities in designing appropriate technique for a given scenario.												
2. To implement soft computing-based solutions for real-world problems.												
3. To give students knowledge of non-traditional technologies and fundamentals of artificial neural networks, fuzzy sets, fuzzy logic, genetic algorithms.												
4. To provide student hands-on experience on MATLAB to implement various strategies.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Understand the fundamentals, frameworks, of mobile application Platforms including iOS, Android, and PhoneGap.						PO ₁ , PO ₂ , PO ₁₀					
CO ₂	Analyze the target platform and users and be able to define and sketch of a mobile application.						PO ₃ , PO ₄ , PO ₅					
CO ₃	Analyze, Design and develop a mobile application prototype in one of the platforms (challenge project).						PO ₃ , PO ₅ , PO ₉ , PO ₁₁					
CO ₄	Analyze, Evaluate and Implement app development lifecycle including Architecture Design, Testing, Security and Hacking.						PO ₃ , PO ₄ , PO ₅ , PO ₆ , PO ₁₂					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

Detailed Contents:												
Unit: 1	Introduction: Introduction to Mobile Computing, Introduction to Android Development Environment, Factors in Developing Mobile Applications, Mobile Software Engineering, Frameworks and Tools, Generic UI Development Android User											
Unit: 2	More on Uis: VUIs and Mobile Apps, Text-to-Speech Techniques, Designing the Right UI, Multichannel and Multimodal Uis, Storing and Retrieving Data, Synchronization and Replication of Mobile Data, Getting the Model Right, Android Storing and Retrieving Data, Working with a Content Provider											
Unit: 3	Communications via Network and the Web: State Machine, Correct Communications Model, Android Networking and Web, Telephony Deciding Scope of an App, Wireless Connectivity and Mobile Apps, Android Telephony											
Unit: 4	Notifications and Alarms: Performance, Performance and Memory Management, Android Notifications and Alarms, Graphics, Performance and Multithreading, Graphics and UI Performance, Android Graphics Packaging and Deploying, Performance Best Practices, Android Field Service App, Location Mobility and Location Based Android Services											
Unit: 5	Multimedia: Mobile Agents and Peer-to-Peer Architecture, Android Multimedia Platforms and Additional Issues: Development Process											

	Architecture, Design, Technology Selection, Mobile App Development Hurdles, Testing, Security and Hacking, Active Transactions, More on Security, Hacking Android.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score		:	100				
Periods/ Week	:	4			Internal Evaluation		:	30				
Credits	:	4			End Semester		:	70				
Instruction Mode	:	Lecture			Exam Duration		:	3 Hrs.				
Prerequisite(s): Computer Graphics												
Course Objectives:												
1. To understand basics of GPU architecture, issues in mapping algorithms and different GPU programming Models.												
2. To introduce parallel programming fundamentals while focusing on CUDA programming interface.												
3. To acquaint emerging multi-core parallel computing architecture with Graphics Processing Units (GPUs).												
4. To introduce the concept of offloading work onto GPUs as accelerators for various applications.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Analyze GPU architecture, assess their advantages and identify potential software optimizations based on knowledge of the GPU architecture						PO ₂ , PO ₃ , PO ₁₂					
CO ₂	Understand the working proficiency with CUDA to optimize and debug GPU code.						PO ₁ , PO ₂ , PO ₃ , PO ₄					
CO ₃	Implement efficient algorithms, parallel programming patterns to solve real world problems.						PO ₂ , PO ₃ , PO ₄ , PO ₉					
CO ₄	Comprehend the parallel programming techniques and implementation of programs on GPUs.						PO ₂ , PO ₃ , PO ₄ , PO ₁₂					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction: History, Graphics Processors, Graphics Processing Units, GPGPUs. Clock speeds, CPU / GPU comparisons, Heterogeneity, Accelerators, Parallel programming, CUDA Open CL / Open ACC, Hello World Computation Kernels, Launch parameters, Thread hierarchy, Warps / Wave fronts, Thread blocks / Workgroups, Streaming multiprocessors, 1D / 2D / 3D thread mapping, Device properties, Simple Programs.											
Unit: 2	Memory: Memory hierarchy, DRAM / global, local / shared, private / local, textures, Constant Memory, Pointers, Parameter Passing, Arrays and dynamic Memory, Multi-dimensional Arrays, Memory Allocation, Memory copying across devices, Programs with matrices, Performance evaluation with different memories.											
Unit: 3	Synchronization: Memory Consistency, Barriers (local versus global), Atomics, Memory fence. Prefix sum, Reduction. Programs for concurrent Data Structures such as Work lists, Linked-lists. Synchronization across CPU and GPU Functions: Device functions, Host functions, Kernels functions, Using libraries (such as Thrust), and developing libraries.											

Unit: 4	Support: Debugging GPU Programs. Profiling, Profile tools, Performance aspects Streams: Asynchronous processing, tasks, Task-dependence, Overlapped data transfers, Default Stream, Synchronization with streams. Events, Event-based- Synchronization - Overlapping data transfer and kernel execution, pitfalls.
Unit: 5	Image Processing, Graph algorithms, Simulations, Deep Learning. Advanced topics: Dynamic parallelism, Unified Virtual Memory, Multi-GPU processing, Peer access, Heterogeneous processing.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods		:	60 Hrs.			Maximum Score		:	100			
Periods/ Week		:	4			Internal Evaluation		:	30			
Credits		:	4			End Semester		:	70			
Instruction Mode		:	Lecture			Exam Duration		:	3 Hrs.			
Prerequisite(s): Machine Learning												
Course Objectives:												
1. To understand the context of neural networks and deep learning.												
2. To understand the use of a neural network and need of deep learning.												
3. To gain working knowledge of neural networks and deep learning.												
4. To Explore the parameters for neural networks.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Understand the basics concepts of deep learning.						PO ₁ , PO ₂ , PO ₃ , PO ₄					
CO ₂	Apply the knowledge of various deep learning algorithms.						PO ₂ , PO ₃ , PO ₄ , PO ₁₀					
CO ₃	Understand and Apply CNN and RNN in simulation for real-world applications						PO ₃ , PO ₄ , PO ₅ , PO ₉					
CO ₄	Analyze the challenges inherent in developing deep learning algorithms for different uses.						PO ₂ , PO ₃ , PO ₄ , PO ₅ , PO ₁₁ , PO ₁₂					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2	3	3								
CO ₂		3	3	2						1		
CO ₃			3	2	2				2			
CO ₄		3	3	3	3						3	2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to Deep Learning: Basics: Biological Neuron, Idea of computational units, McCulloch– Pitts unit and Thresholding logic, Linear Perceptron, Perceptron Learning Algorithm, Linear separability. Convergence theorem for Perceptron Learning Algorithm.											
Unit: 2	Feed forward Networks: Multilayer Perceptron, Gradient Descent, Back propagation, Empirical Risk Minimization, regularization, auto encoders.											
Unit: 3	Convolutional Networks: The Convolution Operation - Variants of the Basic Convolution Function - Structured Outputs - Data Types - Efficient Convolution Algorithms - Random or Unsupervised Features- LeNet, AlexNet											
Unit: 4	Recurrent Neural Networks: Bidirectional RNNs - Deep Recurrent Networks Recursive Neural Networks – The Long Short-Term Memory and Other Gated RNNs											
Unit: 5	Deep Generative Models: Boltzmann Machines - Restricted Boltzmann Machines - Introduction to MCMC and Gibbs Sampling- gradient computations in RBMs Applications: Large-Scale Deep Learning - Computer - Speech Recognition - Natural Language Processing - Other Applications											
Examination and Evaluation Pattern:										It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.		
Text Books:												
1	Goodfellow,I.,Bengio,Y.,andCourville,A.,DeepLearning,MITPress,2016.

MTCS312PET	Secure Software Design &Enterprise Computing				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	30			
Credits	:	4			End Semester			:	70			
Instruction Mode	:	Lecture			Exam Duration			:	3 Hrs.			
Prerequisite(s): Software Engineering												
Course Objectives:												
1. To fix software flaws and bugs in various software.												
2. To provide an overview of various issues like weak random number generation, Information leakage, poor usability, and weak or no encryption on data traffic.												
3. To introduce techniques for successfully implementing and supporting network services on an enterprise scale and heterogeneous systems environment.												
4. To design Methodologies and tools for developing secure software containing minimum vulnerabilities and flaws.												
Course Outcomes (CO):												
COs No.		Statement						Mapped Program Outcomes (POs)				
CO ₁		Analyze various software vulnerabilities.						PO ₁ , PO ₂				
CO ₂		Understand Software process vulnerabilities for an organization.						PO ₂ , PO ₃ , PO ₄				
CO ₃		Understand and Monitor resources consumption in a software.						PO ₄ , PO ₅				
CO ₄		Apply security and software development process.						PO ₃ , PO ₄ , PO ₅ , PO ₉ , PO ₁₂				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	1	2										
CO ₂		1	2	3								
CO ₃				3	2							
CO ₄			2	3	2				2			2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1		Secure Software Design - Identify software vulnerabilities and perform software security analysis, Master security programming practices, Master fundamental software security design concepts, Perform security testing and quality assurance.										
Unit: 2		Enterprise Application Development - Describe the nature and scope of enterprise software applications, Design distributed N-tier software application, Research technologies available for the presentation, business and data tiers of an enterprise software application, Design and build a database using an enterprise database system, Develop components at the different tiers in an enterprise system, Design and develop a multi-tier solution to a problem using technologies used in enterprise system, Present software solution.										
Unit: 3		Enterprise Systems Administration: Design, implement and maintain a directory-based server infrastructure in a heterogeneous systems environment, monitor server resource utilization for system reliability and availability, Install and administer network services (DNS/DHCP/Terminal Services/Clustering/Web/Email).										
Unit: 4		Obtain the ability to manage and troubleshoot a network running multiple services, Understand the requirements of an enterprise network and how to go about managing them.										

Unit: 5	Handle insecure exceptions and command/SQL injection, Defend web and mobile applications against attackers, software containing minimum vulnerabilities and flaws. Case study of DNS server, DHCP configuration and SQL injection attack.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	Theodor Richardson, Charles N Thies, Secure Software Design, Jones & Bartlett
Reference Books:

MTCS313PET	Wireless Access Technologies		L	T	P							
Version: 1.2	Date of Approval: 16th BoS 17-11-2022		4	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score		:	100						
Periods/ Week	:	4	Internal Evaluation		:	30						
Credits	:	4	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Computer Networks												
Course Objectives:												
1. To gain an overview of wireless access technologies, Fixed wireless access networks. Terminal mobility issues regarding wireless access to Internet												
2. To introduce various Network topologies, hotspot networks, Communication links: point-to- point, point-to-multipoint, multipoint-to-multipoint.												
3. To provide an overview of Standards for most frequently used wireless access networks: WPAN, UWB, WLAN, WMAN, WWAN. Network services. Wireless access networks planning, design and installation.												
4. To get and insight of Wireless networking security issues, Wireless access network exploitation and management, software requirements, link quality control.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand basic terms and characteristics of wireless access networks.					PO ₁ , PO ₅						
CO ₂	Analyze various wireless access technologies					PO ₂ , PO ₄ , PO ₆						
CO ₃	Analyze measurements of wireless access network parameter.					PO ₃ , PO ₄ , PO ₅						
CO ₄	Apply and Assess security issues in wireless networks					PO ₄ , PO ₅ , PO ₁₀ , PO ₁₂						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2				2							
CO ₂		2		2		2						
CO ₃			2	3	3							
CO ₄				2	2					2		2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Necessity for wireless terminals connectivity and networking. Wireless networking advantages and disadvantages, Overview of wireless access technologies. Narrowband and broadband networks, fixed and nomadic networks. Wireless local loop (WLL), Public Switched Telephone Network (PSTN) interfaces.											
Unit: 2	Fixed wireless access (FWA) networks, frequency bands for different networks. Criteria for frequency bands allocation, Network topologies, hotspot networks. Communication links: point-to-point (PTP), point- to- multipoint (PMP), multipoint-to-multipoint (MTM).											
Unit: 3	Standards for most frequently used wireless access networks: WPAN (802.15, Bluetooth, DECT, IrDA), UWB (Ultra-Wideband), WLAN (802.11, Wi-Fi, HIPERLAN, IrDA), WMAN(802.16, WiMAX, HIPERMAN, HIPERACCESS), WWAN (802.20), Other technologies for broadband wireless access, Local Multipoint Distribution Service (LMDS), Multichannel Multipoint Distribution Service (MMDS). Ad -Hoc networks, Network services. Services types based on carrier frequency and bandwidth											
Unit: 4	Wireless access networks planning, design and installation. Services provision, legislative and technical aspects, Technical and Economical factors for network planning: expenses, coverage, link capacity, network complexity and carrier-to-											

	interference ratio (C/I). Base station or access point allocation. Base station and access point equipment. Terminal mobility issues regarding wireless access to Internet. Wireless networking security issues.
Unit: 5	Example of laptop or handheld PC wireless connection in real environment. PC wireless interface equipment. Wireless access network exploitation and management, software requirements, link quality control. Business model, wireless network services market, market research and marketing, service providers, wireless data application service providers (WDASP) and their role on public telecommunication services market, billing systems. Recent trends in wireless networking and various access mechanism, new standards of wireless communication.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:

MTCS314PET	Data Preparation and Analysis				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction				Scheme of Examination								
No. of Periods		:	60 Hrs.		Maximum Score		:	100				
Periods/ Week		:	4		Internal Evaluation		:	30				
Credits		:	4		End Semester		:	70				
Instruction Mode		:	Lecture		Exam Duration		:	3 Hrs.				
Prerequisite(s): Machine Learning and Data Mining												
Course Objectives:												
1. To prepare the data for analysis.												
2. To develop meaningful Data Visualizations.												
3. To Learn data transformations and segmentation to solve statistical problems												
4. To Create accurate dataset for applications.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Understand the data parsing and transformations. and the difference between data and information with formats						PO ₁ , PO ₂					
CO ₂	Analyze the basic concept of data cleaning for valuable information with a minimum consistency checking.						PO ₂ , PO ₄ , PO ₆					
CO ₃	Understand statistical exploratory analysis with hypothesis generation						PO ₄ , PO ₇ , PO ₉					
CO ₄	Analyze Design visualizations for exploratory analysis and understand the concept of correlations and connections for geo located data						PO ₃ , PO ₄ , PO ₅ , PO ₁₂					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	3										
CO ₂		2		3		2						
CO ₃				3			2		2			
CO ₄			2	2	2							2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1		Data Gathering and Preparation: Data formats, parsing and transformation, Scalability and real- time issues										
Unit: 2		Data Cleaning: Consistency checking, Heterogeneous and missing data, Data Transformation and Segmentation.										
Unit: 3		Exploratory Analysis: Descriptive and comparative statistics, Clustering and association, Hypothesis Generation.										
Unit: 4		Visualization: Designing visualizations, Time series, Geolocated data, Correlations and connections, Hierarchies and networks, interactivity.										
Unit: 5		Ethics in the Profession: Cases in Computing, Statistics, Communication, Professional Ethics Codes: ACM, IEEE, Am Stat. Assoc.										
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Making sense of Data: A practical Guide to Exploratory Data Analysis and Data Mining, by Glenn											
2	The Visual Display of Quantitative Information, by Edward R. Tufte											
Reference Books:

2	Exploratory Data Mining and Data Cleaning, by Tamraparni Dasu

Course Code	Course Title				Lecture			Semester: III				
MTCS315PET	Optimization Techniques				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	60 Hrs.			Maximum Score			:	100			
Periods/ Week	:	4			Internal Evaluation			:	30			
Credits	:	4			End Semester			:	70			
Instruction Mode	:	Lecture			Exam Duration			:	3 Hrs.			
Prerequisite(s): Machine Learning												
Course Objectives:												
1. To provide insight to the mathematical formulation of real-world problems.												
2. To understand problem formulation by using linear, dynamic programming, game theory and queuing models.												
3. To optimize this mathematical solution especially useful for NP-Hard problems using nature-based algorithms.												
4. To introduce operation research models using optimization techniques based upon the fundamentals of engineering mathematics (minimization and Maximization of objective function).												
Course Outcomes (CO):												
COs No.	Statement							Mapped Program Outcomes (POs)				
CO ₁	Understand appropriate optimization method to solve complex problems involved in various industries.							PO ₁ , PO ₂ , PO ₄				
CO ₂	Analyze the appropriate algorithm for allocation of resources to optimize the various programming techniques.							PO ₃ , PO ₄ , PO ₅				
CO ₃	Understand the concept of theoretical workings of the graphical, simplex and analytical methods for making effective decision on variables so as to optimize the objective function.							PO ₄ , PO ₆ , PO ₉				
CO ₄	Comprehend the theoretical foundations of various issues related to linear programming modeling to formulate real-world problems as a L P model.							PO ₄ , PO ₅ , PO ₆ , PO ₉				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2		2								
CO ₂			2	1	2							
CO ₃				2		2			2			
CO ₄				3	1	2			2			
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to Optimization: Engineering application of Optimization – Statement of an Optimization problem – Optimal Problem formulation – Classification of Optimization problem. Optimum design concepts: Definition of Global and Local optima – Optimality criteria – Review of basic calculus concepts – Global optimality											
Unit: 2	Linear Programming: Introduction and formulation of models, Convexity, Simplex method, BigM method, Two-phase method, Degeneracy, non-existent and unbounded solutions, revised simplex method, duality in LPP, dual simplex method, sensitivity analysis, transportation and assignment problems, traveling salesman problem .											
Unit: 3	Nonlinear Programming: Introduction and formulation of models, Classical optimization methods, equality and inequality constraints, Lagrange multipliers and Kuhn-Tucker conditions, quadratic forms, quadratic programming problem, Wolfe’s method.											

Unit: 4	Dynamic Programming: Principle of optimality, recursive relations, solution of LPP. Optimization algorithms for solving constrained optimization problems – direct methods – penalty function methods – steepest descent method – Engineering applications of constrained and unconstrained algorithms.
Unit: 5	Integer Linear Programming: Gomory's cutting plane method, Branch and bound algorithm, Knapsack problem, linear 0-1 problem. Modern methods of Optimization: Genetic Algorithms – Simulated Annealing – Ant colony optimization – Tabu search – Neural-Network based Optimization – Fuzzy optimization techniques – Applications. Use of Matlab to solve optimization problems. Software: Introduction to software for optimization techniques (TORA).
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:

PGCS131GET	English For Research Paper Writing				L	T	P					
Version: 1.2	Date of Approval: 16th BoS 17-11-2022				4	0	0					
Scheme of Instruction				Scheme of Examination								
No. of Periods	:	60 Hrs.			Maximum Score		:	100				
Periods/ Week	:	4			Internal Evaluation		:	30				
Credits	:	3			End Semester		:	70				
Instruction Mode	:	Lecture			Exam Duration		:	3 Hrs.				
Prerequisite(s): Basic knowledge of English												
Course Objectives:												
1. Understand that how to improve your writing skills and level of readability.												
2. Learn about what to write in each section.												
3. Understand the skills needed when writing a Title Ensure the good quality of paper at very first-time submission.												
4. Ensure the quality of paper at very first-time submission.												
Course Outcomes (CO):												
COs No.	Statement							Mapped Program Outcomes (POs)				
CO ₁	Understand the English for Writing Research Papers, Thesis.							PO ₁ , PO ₂ , PO ₆ , PO ₁₀				
CO ₂	Show conciseness, clarity and avoid redundancy in writing.							PO ₃ , PO ₄				
CO ₃	Summarize, evaluate literature, and write methodology, results and conclusion							PO ₂ , PO ₃ , PO ₄ , PO ₅				
CO ₄	Apply correct style of referencing and use punctuation appropriately.							PO ₁₀ , PO ₁₂				
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance. PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	3	2				2				2		
CO ₂			2	2								
CO ₃		1	2	1	2							
CO ₄										2		1
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Planning and Preparation, Word Order, breaking up long sentences, Structuring Paragraphs and Sentences, Being Concise and Removing Redundancy, Avoiding Ambiguity and Vagueness.											
Unit: 2	Clarifying Who Did What, Highlighting Your Findings, Hedging and Criticizing, Paraphrasing and Plagiarism, Sections of a Paper, Abstracts. Introduction.											
Unit: 3	Review of the Literature, Methods, Results, Discussion, Conclusions, The Final Check.											
Unit: 4	Key skills are needed when writing a Title, key skills are needed when writing an Abstract, key skills are needed when writing an Introduction, skills needed when writing a Review of the Literature.											
Unit: 5	Skills are needed when writing the Methods, skills needed when writing the Results, skills are needed when writing the Discussion, skills are needed when writing the Conclusions. useful phrases, how to ensure paper is as good as it could possibly be the first- time submission.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Glodbort R (2006) Writing for Science, Yale University Press (available on Google Books)											
2	Day R (2006) How to Write and Publish a Scientific Paper, Cambridge University Press.

Course Code	Course Title		Lecture			Semester: I						
PGCS132GET	Disaster Management		L	T	P							
Version: 1.2	Date of Approval: 16th BoS 17-11-2022		4	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score		:	100						
Periods/ Week	:	4	Internal Evaluation		:	30						
Credits	:	4	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Data structure & Algorithms												
Course Objectives:												
1. To learn to demonstrate a critical understanding of key concepts in disaster risk reduction and humanitarian response.												
2. To critically evaluate disaster risk reduction and humanitarian response policy and practice from multiple perspectives.												
3. To develop an understanding of standards of humanitarian response and practical relevance in specific types of disasters and conflict situations.												
4. To critically understand the strengths and weaknesses of disaster management approaches, planning and programming in different countries, particularly their home country or the countries they work in.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Explain disaster management theory (cycle, phases, risk, crisis, emergency, disasters, resilience).					PO ₆ , PO ₇						
CO ₂	Create Technological innovations in Disaster Risk Reduction: Advantages and problems.					PO ₁ , PO ₂ , PO ₄ , PO ₅						
CO ₃	Evaluate DM study including data search, analysis and presentation as a case study.					PO ₂ , PO ₃ , PO ₅						
CO ₄	Apply knowledge about existing global frameworks and existing agreements and role of community in successful Disaster Risk Reduction.					PO ₇ , PO ₁₀ , PO ₁₂						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁						1	2					
CO ₂	2	3		1	1							
CO ₃		1	2		1							
CO ₄							2			2		2
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction Disaster: Definition, Factors and Significance; Difference Between Hazard and Disaster; Natural and Manmade Disasters: Difference, Nature, Types and Magnitude.											
Unit: 2	Repercussions Of Disasters and Hazards: Economic Damage, Loss of Human and Animal Life, Destruction of Ecosystem. Natural Disasters: Earthquakes, Volcanisms, Cyclones, Tsunamis, Floods, Droughts and Famines, Landslides and Avalanches, Man-made disaster: Nuclear Reactor Meltdown, Industrial Accidents, Oil Slicks and Spills, Outbreaks of Diseases and Epidemics, War and Conflicts.											
Unit: 3	Disaster Prone Areas in India Study Of Seismic Zones; Areas Prone To Floods And Droughts, Landslides and Avalanches; Areas Prone To Cyclonic And Coastal Hazards With Special Reference To Tsunami; Post Disaster Diseases And Epidemics											
Unit: 4	Disaster Preparedness and Management Preparedness: Monitoring of Phenomena Triggering A Disaster Or Hazard; Evaluation of Risk; Application of Remote											

	Sensing, Data From Meteorological And Other Agencies, Media Reports: Governmental And Community Preparedness.
Unit: 5	Risk Assessment Disaster Risk: Concept and Elements, Disaster Risk Reduction, Global and National Disaster Risk Situation. Techniques Of Risk Assessment, Global Co-Operation in Risk Assessment and Warning, People's Participation in Risk Assessment. Strategies for Survival. Disaster Mitigation Meaning, Concept and Strategies of Disaster Mitigation, Emerging Trends in Mitigation. Structural Mitigation and Non-Structural Mitigation, Programs of Disaster Mitigation in India.
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	Sahni, Pardeep et.al. (Eds.), "Disaster Mitigation Experiences And Reflections", Prentice Hall Of India, New Delhi.

PGCS133GET	Sanskrit for Technical Knowledge		L	T	P							
Version: 1.2	Date of Approval: 16th BoS 17-11-2022		4	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score			:	100					
Periods/ Week	:	4	Internal Evaluation			:	30					
Credits	:	4	End Semester			:	70					
Instruction Mode	:	Lecture	Exam Duration			:	3 Hrs.					
Prerequisite(s): Discrete Mathematics												
Course Objectives:												
1. To get a working knowledge in illustrious Sanskrit, the scientific language in the world.												
2. Learning of Sanskrit to improve brain functioning.												
3. Learning of Sanskrit to develop the logic in mathematics, science & other subjects enhancing the memory power.												
4. The engineering scholars equipped with Sanskrit will be able to explore the huge knowledge from ancient literature.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understanding basic Sanskrit Language.					PO ₆ , PO ₇						
CO ₂	Understand Ancient Sanskrit literature about science and technology					PO ₁ , PO ₆ , PO ₇ , PO ₁₂						
CO ₃	Being logical language will help to develop logic in students.					PO ₅ , PO ₉ , PO ₁₀ , PO ₁₂						
CO ₄	Correlate the Sanskrit manuscripts with Engineering					PO ₁ , PO ₅ , PO ₁₂						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning
