

Learning Outcomes based Curriculum Framework (LOCF)

for

Master of Computer Applications (MCA)

20th BoS

(w.e.f. 2026-27)

Department of Computer Science and Information Technology

School of Technology

MAULANA AZAD NATIONAL URDU UNIVERSITY

1. Vision and Mission

1.1 Vision

To meet the requirements of the society by imparting knowledge, ethics and moral values with a holistic approach.

1.2 Mission

To impart quality education and to undertake research and extension with emphasis on application and innovation that cater to the emerging societal needs through all-round development of students of all sections enabling them to be globally competitive and socially responsible citizens embedded with ethical values.

1.3 Strategies for Attaining the Vision and Fulfilling the Mission

Following strategies will be used to ensure the accomplishment of the stated vision and mission:

1. To create an ambiance for healthy teaching-learning process and attract the motivated students to the Department of Computer Science and Information Technology
2. Ensure that the curriculum followed is comparable to the relevance of local, national, regional and global development
3. To motivate the potential faculty members/ educators who are constantly upgrading their pedagogical approaches to motivate students and to enhance learning among them
4. Provide opportunities to students for global exposure, industrial internships, project based and research-based learning

2. Program Educational Objectives (PEOs)

Program Educational Objectives (PEOs) are broad statements that describe the career and professional accomplishments that CS&IT Department is preparing its graduates to achieve during the graduation. Following four PEOs are defined as:

PEO 1. To train the graduates to acquire in depth knowledge of fundamental concepts and programming skills for holistic development.

PEO 2. To prepare the graduates for productive careers in software industry, corporate sector, Government Organizations.

PEO 3. To prepare graduates to acquire excellent computing ability so that they can analyze, design and create Solutions for real time problems.

PEO 4. To apply the current tools and techniques to create systems for solving Industry oriented problems.

3. Program Outcomes (POs)

Program outcomes are the narrower statements that describe what students are expected to know and be able to do upon graduation. POs represent the knowledge, skills and attitudes the students should have at the end of a program. Following are the statements for POs for computer application program. At the time of completing their degree requirements, students will be able to:

PO1: Apply the knowledge of Mathematics, Science, and Engineering fundamentals, and an engineering specialization to solution of complex engineering problems (**Engineering Knowledge**).

PO2: Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences (**Problem analysis**).

PO3: Design of solutions for complex engineering problems and design of system components or processes that meet the specified needs with appropriate considerations of public health and safety, and cultural, societal, and environmental considerations (**Design/development of solutions**).

PO4: Use research-based methods including design of experiments, analysis and interpretation of data and synthesis of information leading to logical conclusions (**Conduct investigations of complex problems**).

- PO₅:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling complex engineering activities with an understanding of limitations (**Modern tool usage**).
- PO₆:** Apply reasoning within the contextual knowledge to access societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice (**The engineer and society**).
- PO₇:** Understand the impact of the professional engineering solutions in the societal and environmental contexts, and demonstrate the knowledge of, and the need for sustainable developments (**Environment and sustainability**).
- PO₈:** Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice (**Ethics**).
- PO₉:** Function effectively as an individual independently and as a member or leader in diverse teams, and in multidisciplinary settings (**Individual and team work**).
- PO₁₀:** Communicate effectively on complex engineering activities with the engineering community and with society at large such as being able to comprehend and write effective reports and design documentation, make effective oral presentations, and give and receive clear instructions (**Communication**).
- PO₁₁:** Demonstrate knowledge and understanding of engineering management principles and apply those to one's own work as a member and leader of a team to manage projects in multidisciplinary environments (**Project management and finance**).
- PO₁₂:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change (**Life-long Learning**).

4. Program Specific Outcomes (PSOs)

Program Specific Outcomes (PSOs) are the statements that define outcomes of a program which make students realize the fact that knowledge and techniques learnt in a specific course has direct implication for the betterment of society and its sustainability.

- PSO 1:** The ability to design and develop applications using the knowledge of Mathematics, Science and Engineering fundamentals.
- PSO 2:** Ability to test and analyze the quality of developed applications and to integrate them in order to evolve a larger computing system.
- PSO 3:** Apply appropriate techniques, resources, and modern engineering and IT tools to address societal, health, safety, legal, and cultural issues.
- PSO 4:** To analyze and assess various functional and technical security challenges in protecting various digital assets and infrastructure in the internet era and to design and develop innovative technological solutions for the same

PSOs have to be attained by the students in due course of the two years program either as part of their Core, Discipline Specific Electives, Tools and techniques or as part of their various levels of seminar/ internship and project work.

5. Mapping between PEOs, POs and PSOs

The following Table lists the relationships between the PEOs, POs. and PSOs. The attainment of POs can be viewed as a strategy for attaining the PEOs. Each PEO is supported by multiple POs to ensure strength in compliance. Also, the relationship between individual PO and PEOs can vary between **Reasonable (1)** and **Strong (3)**.

PEOs	POs												PSOs			
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4
PEO1	2	3	1	3	1	2	1	1	1	2	1	2	2	1	1	2

PEO2	1	1	2	1	3	1	2	1	2	1	2	1	1	2	3	1
PEO3	2	2	3	3	2	2	1	2	1	2	1	3	2	1	2	1
PEO4	2	2	2	3	3	2	1	1	3	2	1	2	1	2	1	3

1 – Reasonable

2 – Significant

3 – Strong

6. Course Outcomes (COs)

Course Outcomes are narrower statements that describe what students are expected to know and be able to do at the end of the course. Course outcomes are defined for all courses as part of the syllabus for the course and are measured through performance on assignments, written and oral presentation reports related to individual and team projects and through the mid-term and semester end examinations. Detailed syllabi for each course associated with Course Objectives and Course Outcomes has been for specific outcomes associated with the course. Attaining the COs is at the heart of the educational activity. If COs of individual courses are successfully attained and the curriculum has been designed to achieve the Program Outcomes, then attainment of the POs is also ensured. An effective Assessment Plan has been devised to meet the objective, quantitative and independent measures to demonstrate that all POs and PEOs are being attained by the program.

Continuous Quality Improvement and Assessment Plan

The purpose of the Assessment Plan is to ensure attainment of all Program Outcomes (POs) and also the attainment of the Program Educational Objectives (PEOs) and to independently confirm that the POs and PEOs are being attained. Periodic monitoring of progress allows faculty members and the leadership to take corrective actions where the POs and PEOs are not meeting established targets. The process consists of assessing and evaluating the extent to which the student outcomes are being attained. The results of these assessments and evaluations are subsequently used as the primary inputs for making improvements to the program.

MAULANA AZAD NATIONAL URDU UNIVERSITY
SCHOOL OF TECHNOLOGY
DEPARTMENT OF COMPUTER SCIENCE & IT
Master of Computer Applications (MCA)
General, Course structure & Theme & Semester-wise credit distribution

A. Definition of Credit:		
1	1 Hr. Lecture (L) per week	1 credit
2	1 Hr. Tutorial (T) per week	1 credit
3	2 Hours Practical (Lab)/week	1 credit

B. Range of credits:
A student requires to complete total 88 credits to be eligible to get Post Graduate degree in Computer Applications.

C. Structure of Post graduate Computer Applications program:			
S. No.	Course Type	Abbreviation	Credit Breakup for MCA Students
1	Program Core Course	PCC	48
2	Discipline Specific Elective	DSE	9
3	Generic Elective (Interdisciplinary)	GE	3
4	Foundation Course	FC	3
5	Ability Enhancement Course	AEC	2
6	Projects	PROJ	12
7	Internship	INTERN	04
Total			81

MAULANA AZAD NATIONAL URDU UNIVERSITY
 DEPARTMENT OF CS&IT
 SCHEME OF INSTRUCTIONS, EXAMINATION & EVALUATION
 (Effective for Batch Admitted from 2025-26 Academic Year)
Master of Computer Applications (MCA)
Total Credits (2 Year Course): 81

I. INDUCTION PROGRAM (PLEASE REFER APPENDIX-A FOR GUIDELINES)	
Induction Program (mandatory)	3 Weeks duration (Please refer Appendix-A for guidelines & also details available in the curriculum of Mandatory courses)
Induction program for students to be offered right at the start of the first year.	<ul style="list-style-type: none"> ▪ Physical activity ▪ Creative Arts ▪ Universal Human Values ▪ Literary ▪ Proficiency Modules ▪ Lectures by Eminent People ▪ Visits to local Areas ▪ Familiarization to Dept./Branch & Innovations

Schedule

The activities during the Induction Program would have an Initial Phase, a Regular Phase and a Closing Phase. The Initial and Closing Phases would be two days each.

Initial Phase

Time	Activity
Day 0	
Whole day	Students arrive - Hostel allotment. (Preferably do pre-allotment)
Day 1	
09:00 am - 03:00 pm	Academic registration
04:30 pm - 06:00 pm	Orientation
Day 2	
09:00 am - 10:00 am	Diagnostic test (for English etc.)
10:15 am - 12:25 pm	Visit to respective depts.
12:30 pm - 01:55 pm	Lunch
02:00 pm - 02:55 pm	Director's address
03:00 pm - 05:00 pm	Interaction with parents
03:30 pm - 05:00 pm	Mentor-mentee groups - Introduction within group. (Same as Universal Human Values groups)

Regular Phase

After two days is the start of the Regular Phase of induction. With this phase there would be regular program to be followed every day.

3.2.1 Daily Schedule

Some of the activities are on a daily basis, while some others are at specified periods within the Induction Program. We first show a typical daily timetable.

Sessn.	Time	Activity	Remarks
Day 3 onwards			
	06:00 am	Wake up call	
I	06:30 am - 07:10 am	Physical activity (mild exercise/yoga)	
	07:15 am - 08:55 am	Bath, Breakfast, etc.	
II	09:00 am - 10:55 am	Creative Arts / Universal Human Values	
		Half the groups do Creative Arts	

III	11:00 am - 12:55 pm	Universal Human Values / Creative Arts	Complementary alternate
	01:00 pm - 02:25 pm	Lunch	
IV	02:30 pm - 03:55 pm	Afternoon Session	See below.
V	04:00 pm - 05:00 pm	Afternoon Session	See below.
	05:00 pm - 05:25 pm	Break / light tea	
VI	05:30 pm - 06:45 pm	Games / Special Lectures	
	06:50 pm - 08:25 pm	Rest and Dinner	
VII	08:30 pm - 09:25 pm	Informal interactions (in hostels)	

Sundays are off and Saturdays have the same schedule as above or have outings.

Afternoon Activities (Non-Daily)

The following five activities are scheduled at different times of the Induction Program, and are not held daily for everyone:

1. Familiarization to Dept./Branch & Innovations
2. Visits to Local Area
3. Lectures by Eminent People
4. Literary
5. Proficiency Modules

Here is the approximate activity schedule for the afternoons (may be changed to suit local needs):

Activity	Session	Remarks
Familiarization with Dept/Branch & Innovations	IV	For 3 days (Day 3 to 5)
Visits to Local Area	IV, V and VI	for 3- days For 3 days - interspersed (e.g., 3 Saturdays)
Lectures by Eminent People	IV	As scheduled - 3-5 lectures
Literary (Play / Book Reading / Lecture)	IV	For 3-5 days
Proficiency Modules	V	Daily, but only for those who need it

Closing Phase

Time	Activity
Last But One Day	
08:30 am - 12 noon	Discussions and finalization of presentation within each group
02:00 am - 05:00 pm	Presentation by each group in front of 4 other groups besides their own (about 100 students)
Last Day	
Whole day	Examinations (if any). May be expanded to last 2 days, in case needed.

II. SEMESTER WISE STRUCTURE OF CURRICULUM

[L= Lecture, T= Tutorials, P=Practical, C= Credits]

PROGRAM		YEAR				SEMESTER			
MCA		I				I			
Course Code	Description	Course Title	Hours/Week			Credits	Score		End Exam Duration
			L	T	P		Internal	External

Course Code	Course Title		Lecture			Semester: I						
MMCA131FCT	Statistical Analysis		L	T	P							
Version: 1.2	Date of Approval: 20th BoS		3	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	45 Hrs.	Maximum Score	:	100							
Periods/ Week	:	3	Internal Evaluation	:	30							
Credits	:	3	End Semester	:	70							
Instruction Mode	:	Lecture	Exam Duration	:	3 Hrs.							
Prerequisite(s): Basic knowledge of Mathematics												
Course Objectives:												
1. To provide students with the foundations of statistical analysis, probability and modeling the real-life problems.												
2. To understand probability distributions and their properties.												
3. To learn the statistical parameters for different distributions, correlation and regression.												
4. To understand the concept of hypothesis and significance tests.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Apply different statistical measures on data.					PO ₁ , PO ₂						
CO ₂	Analyze statistical tests in testing hypotheses on data.					PO ₅						
CO ₃	Apply concept of probability and statistics to translate and solve real world problems.					PO ₂						
CO ₄	Develop problem solving techniques needed to accurately calculate probabilities.					PO ₄						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂					2							
CO ₃		2										
CO ₄				2								
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Basic Statistics: Frequency Distribution, Frequency curve and histogram, Measures of Central Tendencies (Mean, Median, Mode, Range, Standard Deviation, Coefficient of Variation, Quartiles), Measures of Dispersion, Skewness, moments and kurtosis.											
Unit: 2	Regression Analysis: Correlation and Regression: Karl Pearson's coefficient of Correlation, Correlation of ranks, Tied Ranks, Curve of regression, lines of regression, properties of regression coefficients and angle between two regression lines Curve fitting – Method of least square, Linear and reducible to linear curves.											
Unit: 3	Random Variables and Probability Distribution: Random Variable – Discrete and Continuous, Probability Distribution of a Random Variable, Probability Mass Function, Probability Density Function, -evaluation of statistical parameters for these distributions, Distribution Functions, Bivariate Random Variable- Discrete and Continuous Bivariate Random Variables with examples, Joint probability distribution, Marginal and conditional distributions and applications, Probability											
Unit: 4	Distributions: Binomial, Poisson and Normal - evaluation of statistical parameters for these three distributions and applications.											
Unit: 5	Sampling Distribution: Test of significance for large & small samples: test for single proportion, difference of proportions, single mean, difference of means, and difference of standard deviations Sampling Distributions: t- distribution, Chi-square distribution, F-distribution, Standard and Probable errors, Different Methods of Estimation, Testing of Hypothesis -Type I and Type II errors, classification of hypothesis tests; large & small sample tests.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:

Periods/ Week	:	3	Internal Evaluation		:	30						
Credits	:	3	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Data Structure & Algorithms												
Course Objectives:												
1. To understand the importance, limitations and challenges of processes involved in software development.												
2. To gain knowledge of various software models as waterfall and evolutionary models and software design activities.												
3. To learn about software requirements analysis and specification.												
4. To learn cost estimation, software testing, maintenance and debugging.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand the difference between software engineering discipline with the other engineering disciplines					PO ₁ , PO ₂						
CO ₂	Elaborate knowledge of various software models					PO ₂						
CO ₃	Analyze about software requirements analysis and specification					PO ₄						
CO ₄	Able to get the knowledge of various software design activities.					PO ₃						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

CO ₁	2	2										
CO ₂		2										
CO ₃				2								
CO ₄			2									
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Software Engineering Fundamentals: Definition of software product and process, Software Characteristics, Components, Applications, Layered Technologies, Processes and Product, Methods and Tools, Generic View of Software Engineering, Software Crisis, Software development paradigms, Techniques of Process Modelling, Software Process and lifecycle models.											
Unit: 2	Software Requirements Analysis & Specification: System specification, Software requirements specification (SRS) standards, Analysis and Design Modelling: ER Diagram, Dataflow Model, Control Flow Model, Control and Process Specification, Data Dictionary.											
Unit: 3	Software Design: Software architecture, Modular Design-cohesion and coupling, Process-oriented design, Process and Optimization, Data-oriented design, User-interface design, Real-time software design, Architectural Designing, Interface Design, Procedural Design, Object Oriented Design. CASE Tools: Computer-aided software engineering, Introduction to CASE, Building Blocks of CASE, Relevance of CASE tools, High-end and low-end CASE tools, automated support for data dictionaries, DFD, ER diagrams, Integrated Case Environment, CASE workbenches.											
Unit: 4	Coding and Testing: Choice of Programming languages, Coding standards for Software. User Interface Design: Concepts of Ui, Interface Design Model, Internal and External Design, Evaluation, Interaction and Information Display Testing Objectives, Unit Testing, Integration Testing, Acceptance Testing, Regression Testing, Testing for Functionality and Testing for Performance, Top-Down and Bottom-Up Testing.											
Unit: 5	Configuration Management: Concepts in Configuration Management, The Configuration Management Process: Planning and Setting up Configuration Management, Perform Configuration Control, Status Monitoring and Audits. Software Maintenance: What is software maintenance, Maintenance Process & Models, Reverse Engineering, Software re-engineering, Configuration Management issues and concept, Configuration planning & techniques, Software versions and change control process, Documentation.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:

CO ₂			2									
CO ₃			2									
CO ₄				1								
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction: Operating system and functions, Classification of Operating systems- Batch, Interactive, Time-sharing, Real-Time System, Multiprocessor Systems, Multiuser Systems, Multiprocessor Systems, Multithreaded Systems, PC systems; System Calls types, Operating System Structure, Operating System services, Kernel and its types.											
Unit: 2	Concurrent Processes: Process Concept, Principle of Concurrency, Producer /Consumer Problem, Mutual Exclusion, Critical Section Problem, Dekker's solution, Peterson's solution, Semaphores, Test and Set operation; Classical Problem in Concurrency- Dining Philosopher Problem, Sleeping Barber Problem; Inter-Process Communication models and Schemes, Process generation.											
Unit: 3	CPU Scheduling: Scheduling Concepts, Performance Criteria, Process States, Process Transition Diagram, Process Control Block (PCB), Threads and their management, Scheduling Algorithms, Deadlock: System model, Deadlock characterization, Prevention, Avoidance and detection, Recovery from deadlock, banker's algorithm.											
Unit: 4	Memory Management: Multiprogramming with fixed partitions, Multiprogramming with variable partitions, Protection schemes, Paging, Segmentation, Virtual memory concepts, Page replacement algorithms, Thrashing, File system Structure, File organization and access mechanism, File directories, and File sharing, allocation methods, free space management, Directory implementation.											
Unit: 5	I/O Management and Disk Scheduling: I/O devices, and I/O subsystems, I/O buffering, Disk storage and disk scheduling, RAID. UNIX: Essential commands and utilities, Unix files, directory structure, file security, Bourne shell programming features, systems call classification and basics, Linux: System components, Networking software layers.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Silberschatz, Galvin and Gagne, "Operating Systems Concepts", Wiley											
2	Sibsankar Halder and Alex A Aravind, "Operating Systems", Pearson Education											
Reference Books:												
1	Harvey M Dietel, "An Introduction to Operating System", Pearson Education											
2	D M Dhamdhare, "Operating Systems: A Concept based Approach", McGraw Hill

MMCA133PCT	Computer System Architecture				L	T	P					
Version: 1.2	Date of Approval: 20th BoS				3	0	0					
Scheme of Instruction				Scheme of Examination								
No. of Periods	:	45 Hrs.			Maximum Score			:	100			
Periods/ Week	:	3			Internal Evaluation			:	30			
Credits	:	3			End Semester			:	70			
Instruction Mode	:	Lecture			Exam Duration			:	3 Hrs.			
Prerequisite(s): Digital Electronics												
Course Objectives:												
1. To introduction of digital components of the computer and their circuits.												
2. To elaborate idea about the different registers and micro-operations carried out.												
3. To understanding of the CPU Organization and Input-Output Organization.												
4. To learn the architecture of microprogrammed control unit, Memory Organization, I/O systems, and multiprocessors.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Define the basic organization and design of a digital computer system and its operations								PO ₁			
CO ₂	Explain the design of Arithmetic & Logic design circuit and Illustrate the Control unit operations.								PO ₂ , PO ₃			
CO ₃	Analyze the different ways of communication in Input-Output devices, Standard Interfaces and their functioning.								PO ₂ , PO ₁₀			
CO ₄	Illustrate the hierarchical memory system, cache memory and virtual memory								PO ₄ , PO ₁₀			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2											
CO ₂		2	2									
CO ₃		2								1		
CO ₄				2						1		
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Digital Logic Circuits: Digital Computers, Logic Gates, Boolean Algebra, Map Simplification, Combinational Circuits, Flip Flops, Sequential Circuits. Digital Components, Decoder, Multiplexers, Registers.											
Unit: 2	Register Transfer and Micro operations: Register Transfer language, register transfer, Bus and Memory Transfer, Arithmetic Micro operations, Logic Micro operations, Shift Micro operations and Arithmetic logic shift. Instruction codes, Computer Registers, Instructions, Instruction Cycles, Input, Output and Interrupts.											
Unit: 3	CPU Organization: Introduction, General Register Organization, Stack Organization, Instruction Formats, Addressing Modes, Data Transfer and Manipulation, Program Control Organization of a control unit. Operations of a control unit, Hardwired control unit, Micro programmed control unit.											
Unit: 4	Input Output Organization: Peripheral Devices, Input-Output Interface, Asynchronous Data Transfer, Modes of Transfer, Priority Interrupt, DMA controlled I/O, Direct Memory Access, Input-Output Processor											
Unit: 5	Memory Organization: Memory Hierarchy, Main Memory, Auxiliary Memory, Associative Memory, Cache Memory, Virtual Memory, Memory Management Hardware											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	M. Morris Mano: Computer System Architecture, Pearson Asia / Prentice Hall, Third edition.

Course Code		Course Title				Lecture			Semester: III			
MMCA131PCP		Python Programming Lab				L	T	P				
Version: 1.2		Date of Approval:				0	0	4				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 4			Internal Evaluation			: 50				
Credits		: 2			End Semester			: 50				
Instruction Mode		: Practical			Exam Duration			: 3 Hrs.				
Prerequisite(s): Any computer programming course												
Course Objectives:												
1. To learn the fundamentals of writing Python programming.												
2. To understand core Python scripting elements such as variables and flow control structures.												
3. To read and write Python files.												
4. To impart the knowledge of Python standard library and Explore Python's object-oriented features.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Implement scripting and the contributions of scripting languages.										PO ₁	
CO ₂	Apply Python especially the object-oriented concepts.										PO ₃	
CO ₃	Analyze and apply built-in objects of Python.										PO ₃	
CO ₄	Apply Python standard library and Explore Python's object-oriented features										PO ₅ , PO ₉	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2											
CO ₂			3									
CO ₃			3									
CO ₄					2				1			
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction: History, Features, setting up path, Working with Python, Basic Syntax, Variable and Data Types, Operator, Input-Output, Printing on screen, Functions, If, If- else, Nested if-else, Looping, For, While, Nested loops, Control Statements, Break, Continue, Pass											
Unit: 2	String Manipulation and Lists: Strings: Accessing Strings, Basic Operations, String slices, Function and Methods Lists: Introduction, accessing list, Operations, Working with lists, Function and Methods											
Unit: 3	Functions and modules: Defining a function, Calling a function, Types of functions, Function Arguments, Anonymous functions, Global and local variables, Importing module, Math module, Random module, Packages, Composition											
Unit: 4	Regular expressions: Match function, Search function, Matching VS Searching, Modifiers, Patterns											
Unit: 5	Reading data from keyboard, Opening and closing file, Reading and writing files, Database: Introduction, Connections, Executing queries, Transactions, Handling error											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

MMCA160AEP	English Language & Communication Lab		L	T	P							
Version: 1.2	Date of Approval: 20th BoS		0	0	4							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	60 Hrs.	Maximum Score		:	100						
Periods/ Week	:	4	Internal Evaluation		:	50						
Credits	:	2	End Semester		:	50						
Instruction Mode	:	Practical	Exam Duration		:	3 Hrs.						
Prerequisite(s): No Prerequisite												
Course Objectives:												
<ol style="list-style-type: none"> To sensitize students to the nuances of English speech sounds, word accent, intonation and rhythm. To bring about a consistent accent and intelligibility in students' pronunciation of English by providing an opportunity for practice in speaking. To improve the fluency of students in spoken English and neutralize their mother tongue influence To train students to use language appropriately for public speaking and interviews. 												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand, comprehend and analyze the professional and soft communication skills, Strengthen general comprehending skills and present lucid skills in free writing					PO ₆ , PO ₉ , PO ₁₀						
CO ₂	Understand the basic grammar techniques and utilize it in enhancing language development.					PO ₉ , PO ₁₀ , PO ₁₂						
CO ₃	Proficiency in writing technical articles and presenting papers on any topic of any genre.					PO ₉ , PO ₁₀ , PO ₁₂						
CO ₄	Enable the development in sharing information about family and friends.					PO ₁₀ , PO ₁₂						
PO₁ - Engineering Knowledge, PO₂ - Problem analysis, PO₃ - Design/development of solutions, PO₄ - Conduct investigations of complex problems, PO₅ - Modern tool usage, PO₆ - The engineer and society, PO₇ - Environment and sustainability, PO₈ - Ethics, PO₉ - Individual or team work, PO₁₀ - Communication, PO₁₁ - Project management and finance, PO₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂

No. of Periods	:	45 Hrs.	Maximum Score		:	100						
Periods/ Week	:	3	Internal Evaluation		:	30						
Credits	:	3	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Programming for Problem Solving												
Course Objectives:												
<ol style="list-style-type: none"> To learn to implement ADTs such as lists, stacks, queues, trees, graphs, search trees in C/ C++ to solve problems. To make students know about the concepts of searching and sorting techniques. To enable them to write and compare the algorithms for solving problems with the help of data structures. To understand the complexity theory. 												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand and analyze the algorithms to determine the time and computation complexity and justify the correctness.					PO ₁ , PO ₂ , PO ₄						
CO ₂	Identify the alternative implementations of data structures with respect to its performance to solve a real-world problem.					PO ₂ , PO ₃						
CO ₃	Ability to devise novel solutions to small scale programming challenges involving data structures and recursion.					PO ₅ , PO ₉						
CO ₄	Examine the notations used to analyze the performance of algorithms					PO ₃ , PO ₄						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	1		2								
CO ₂		2	2									
CO ₃					1				1			
CO ₄			2	1								
1 – Reasonable; 2 – Significant; 3 – Strong												
Detailed Contents:												
Unit: 1	Introduction to Data Structure, Algorithm, Performance Analysis-Space complexity, Time complexity, Asymptotic Notations, Time-Space trade-off. Abstract Data Types (ADT). Arrays: Definition, Single and Multidimensional Arrays, Derivation of Index Formulae for 1-D,2-D,3-D and n-D Array Application of arrays. Linked lists: Array Implementation and Pointer Implementation of Singly Linked Lists, Doubly Linked List, Circularly Linked List, Operations on a Linked List. Insertion, Deletion, Traversal.											
Unit: 2	Stacks: Abstract Data Type, Primitive Stack operations: Push & Pop, Array and Linked Implementation of Stack in C, Application of stack: Prefix and Postfix Expressions, Evaluation of postfix expression, Iteration and Recursion- Principles of recursion, Tail recursion. Tradeoffs between iteration and recursion. Queues: Operations on Queue: Create, Add, Delete, Full and Empty, Circular queues, Array and linked implementation of queues, Deque and Priority Queue. Trees: Binary tree representation, tree traversal, binary search tree complete binary tree, heap, AVL tree, Huffman Tree, B Tree, B+ Tree.											
Unit: 3	Searching with Analysis: Concept of Searching, Sequential search, Index Sequential Search, Binary Search. Concept of Hashing & Collision resolution Techniques used in Hashing. Sorting with Analysis: Insertion Sort, Selection, Bubble Sort, Quick Sort, Merge Sort and Heap Sort											
Unit: 4	Greedy method: Knapsack problem, Graphs, Graph Traversal: DFS & BFS. Spanning Trees: Prim's and Kruskal's algorithm. Dijkstra's algorithm. Dynamic programming: Multistage Graphs, Floyd-Warshall algorithm, Optimal Binary Search Trees, 0/1 Knapsack problem, Travelling Sales Person Problem.											
Unit: 5	Back tracking: n-Queen Problem, Graph Colouring, Hamiltonian cycles. Branch and Bound: LIFOBB and FIFOB. NP-Hard and NP-Complete problems: Basic Concepts, Non-Deterministic Algorithms, NP - Hard and NP-Complete Classes, Cook's theorem											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

No. of Periods	:	45 Hrs.			Maximum Score			:	100			
Periods/ Week	:	3			Internal Evaluation			:	30			
Credits	:	3			End Semester			:	70			
Instruction Mode	:	Lecture			Exam Duration			:	3 Hrs.			
Prerequisite(s): Data structure & Algorithms												
Course Objectives:												
<ol style="list-style-type: none"> To describe the fundamental elements of database management systems and structure of databases. To understand Query processing and decomposition in a database system. To explain the basic concepts of relational data model, entity-relationship model, relational database design, relational algebra and SQL. To understand the different models involved in database security and their applications in real time world to protect the database and information associated with them. 												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Learn to design a database for a given set of requirements								PO ₁ , PO ₂			
CO ₂	Demonstrate query processing in a database system								PO ₃ , PO ₅			
CO ₃	Apply normalization techniques on given database								PO ₃ , PO ₅			
CO ₄	Analyze the database storage structures and access techniques.								PO ₂ , PO ₃			
PO₁ - Engineering Knowledge, PO₂ - Problem analysis, PO₃ - Design/development of solutions, PO₄ - Conduct investigations of complex problems, PO₅ - Modern tool usage, PO₆ - The engineer and society, PO₇ - Environment and sustainability, PO₈ - Ethics, PO₉ - Individual or team work, PO₁₀ - Communication, PO₁₁ - Project management and finance, PO₁₂ - Life-long Learning

CO ₂			2		1							
CO ₃			2		1							
CO ₄		2	2									
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Data base System Applications, data base System VS file System – View of Data – Data Abstraction – Instances and Schemas – data Models – the ER Model – Relational Model – Other Models – Database Languages – DDL – DML – database Access for applications Programs – data base Users and Administrator – Transaction Management – data base System Structure – Storage Manager – the Query Processor. History of Data base Systems. Data base design and ER diagrams – Beyond ER Design Entities, Attributes and Entity sets – Relationships and Relationship sets – Additional features of ER Model – Concept Design with the ER Model – Conceptual Design for Large enterprises.											
Unit: 2	Introduction to the Relational Model – Integrity Constraint Over relations – Enforcing Integrity constraints – Querying relational data – Logical data base Design – Introduction to Views – Destroying /altering Tables and Views. Relational Algebra – Selection and projection set operations – renaming – Joins – Division – Examples of Algebra overviews – Relational calculus – Tuple relational Calculus – Domain relational calculus – Expressive Power of Algebra and calculus. Schema refinement – Problems Caused by redundancy Decompositions – Problem related to decomposition – reasoning about FDS – FIRST, SECOND, THIRD Normal forms – BCNF – Lossless join Decomposition – Dependency preserving Decomposition – Schema refinement in Data base Design – Multi valued Dependencies – FORTH Normal Form.											
Unit: 3	Form of Basic SQL Query – Examples of Basic SQL Queries – Introduction to Nested Queries Correlated Nested Queries Set – Comparison Operators – Aggregative Operators – NULL values – Comparison using Null values – Logical connectivity's – AND, OR and NOT – Impact on SQL Constructs – Outer Joins – Disallowing NULL values – Complex Integrity Constraints in SQL Triggers and Active Data bases.											
Unit: 4	Transaction Concept- Transaction State- Implementation of Atomicity and Durability Concurrent – Executions – Serializability- Recoverability – Implementation of Isolation – Testing for serializability- Lock –Based Protocols – Timestamp Based Protocols- Validation- Base Protocols – Multiple Granularity.											
Unit: 5	Recovery and Atomicity – Log – Based Recovery – Recovery with Concurrent Transactions – Buffer Management – Failure with loss of nonvolatile storage-Advance Recovery systems-Remote Backup systems. Introduction of No SQL Database											

Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.	
Text Books:	
1	Data base Management Systems, Raghurama Krishnan, Johannes Gehrke, TATA McGrawHill 3rd Edition

MMCA233PCT	Java Programming				L	T	P					
Version: 1.2	Date of Approval: 20th BoS				3	0	0					
Scheme of Instruction					Scheme of Examination							
No. of Periods	:	45 Hrs.			Maximum Score	:	100					
Periods/ Week	:	3			Internal Evaluation	:	30					
Credits	:	3			End Semester	:	70					
Instruction Mode	:	Lecture			Exam Duration	:	3 Hrs.					
Prerequisite(s): Programming for Problem Solving												
Course Objectives:												
1. To understand the concept of object-oriented programming principle using JAVA programming language.												
2. To elaborate variable scopes, memory management, and reference versus value types in relation to parameters and arguments in function calls.												
3. To demonstrate the principles of object-oriented features of Java programming language with security features.												
4. To acquire the knowledge of error and exception handling.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Understand the principles of object-oriented programming paradigm specifically including abstraction, encapsulation, inheritance and polymorphism.										PO ₁ , PO ₂	
CO ₂	Demonstrate best practices in designing classes and class hierarchies from problem statements using sub-classing, abstract classes, and interfaces to achieve polymorphism in object-oriented software.										PO ₃	
CO ₃	Demonstrate informed use of encapsulation within and across software components and packages.										PO ₄ , PO ₅	
CO ₄	Apply exception handling, generation and escalation mechanisms and practices in writing Java programs.										PO ₅ , PO ₉	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂			3									
CO ₃				2	2							
CO ₄					2				1			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Java Basics - Review of OOP concepts, History of Java, Java buzzwords, comments, data types, variables, constants, scope and life time of variables, operators, operator hierarchy, expressions, type conversion and casting, control flow-block scope, conditional statements, loops, break and continue statements, simple java program, arrays, recursion.											
Unit: 2	Classes and Objects: Abstraction, encapsulation, classes, objects, constructors, methods, parameter passing, access control, this keyword, overloading methods and constructors, static fields and methods, garbage collection, String Handling, Object class and its methods.											
Unit: 3	Inheritance & Polymorphism – Inheritance concept, benefits of inheritance, Super classes and Sub classes, Member access rules, super keyword, final keyword, Polymorphism - dynamic binding, method overriding, dynamic method dispatch, abstract classes and methods, Interfaces – Interfaces vs. abstract classes, defining an interface, implementing interfaces, accessing implementations through interface references, extending interface, Packages-Defining, Creating and Accessing a Package. Inner classes – Uses of inner classes, local inner classes, anonymous inner classes, static inner classes											
Unit: 4	Exception handling & Multi-threading – Dealing with errors, benefits of exception handling, the classification of exceptions- exception hierarchy, checked exceptions and unchecked exceptions, usage of try, catch, throw, throws and finally, re-throwing exceptions, built in exceptions, creating own exception sub classes. Multi-threading - Differences between multiple processes and multiple threads, creating threads, interrupting threads, thread priorities, daemon threads, thread lifecycle.											
Unit: 5	Database Connectivity –Types of Drivers, Processing SQL statements, DriverManager class, Connection, Statement, ResultSet, PreparedStatement, ResultSetMetaData interfaces, Developing CRUDS application using JDBC. Socket Programming: Client and Server program.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:

MMCA231PCP		Data Structures and Algorithms Lab				L	T	P				
Version: 1.2		Date of Approval: 20th BoS				0	0	4				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 60 Hrs.			Maximum Score			: 100				
Periods/ Week		: 4			Internal Evaluation			: 50				
Credits		: 2			End Semester			: 50				
Instruction Mode		: Practical			Exam Duration			: 3 Hrs.				
Prerequisite(s): Programming for Problem Solving												
Course Objectives:												
<ol style="list-style-type: none"> To develop skills to apply appropriate data structures and algorithms in problem solving. To apply various techniques with data such storing, inserting, deleting and traversing of data. To practice with programming skill and improve the programming logic. To utilize of various data structures such as Linked List Structures, Stack, Queues, Trees and Graphs to implement the algorithms. 												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Write the code for a large program after overcoming the time and space complexity.										PO ₁ , PO ₃	
CO ₂	Develop programs that use arrays, records, linked structures, stacks, queues, trees, and graphs.										PO ₃	
CO ₃	Compare alternative implementations of data structures with respect to performance.										PO ₄ , PO ₅ , PO ₉	
CO ₄	Implementation of various algorithms such as searching, sorting, Greedy, Dynamic, Back-Tracking and Branch & Bound.										PO ₂ , PO ₃ , PO ₅	
PO₁ - Engineering Knowledge, PO₂ - Problem analysis, PO₃ - Design/development of solutions, PO₄ - Conduct investigations of complex problems, PO₅ - Modern tool usage, PO₆ - The engineer and society, PO₇ - Environment and sustainability, PO₈ - Ethics, PO₉ - Individual or team work, PO₁₀ - Communication, PO₁₁ - Project management and finance, PO₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂

			L	T	P							
MMCA331PCT	Formal Language & Automata Theory											
Version: 1.2	Date of Approval: 20th BoS		3	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	45 Hrs.	Maximum Score	:	100							
Periods/ Week	:	3	Internal Evaluation	:	30							
Credits	:	3	End Semester	:	70							
Instruction Mode	:	Lecture	Exam Duration	:	3 Hrs.							
Prerequisite(s): Discrete Mathematics												
Course Objectives:												
1. To provide introduction to some of the central ideas of theoretical computer science from the perspective of formal languages.												
2. To introduce the fundamental concepts of formal languages, grammars and automata theory.												
3. To classify machines by their power to recognize languages and design various types of automata and write regular expressions for regular languages.												
4. To examine deterministic, non-deterministic machines and the differences between decidability and undecidability.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand the concept of abstract machines and their power to recognize the languages.					PO ₁ , PO ₂						
CO ₂	Develop the finite state machines for modelling, write regular expressions for regular languages. And solving computing problems.					PO ₃ , PO ₄						
CO ₃	Define, analyze, and design context free grammars for context free languages					PO ₂ , PO ₃ , PO ₄						
CO ₄	Design and analyze Turing machines and to distinguish between decidability and undecidability.					PO ₃ , PO ₄ , PO ₅						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂			2	1								
CO ₃		2	2	1								
CO ₄			2	1	1							
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Fundamentals: Strings, Alphabet, Language, Operations, Finite state machine, definitions, finite automaton model, acceptance of strings, and languages, deterministic finite automaton and non-deterministic finite automaton, transition diagrams and Language recognizers. Finite Automata: NFA with ϵ -transitions - Significance, acceptance of languages. Conversions and Equivalence: Equivalence between NFA with and without ϵ - transitions, NFA to DFA conversion, minimisation of FSM, equivalence between two FSM's, Finite Automata with output- Moore and Melay machines.											
Unit: 2	Regular Languages: Regular sets, regular expressions, identity rules, constructing finite Automata for a given regular expression, Conversion of Finite Automata to Regular expressions. Pumping lemma of regular sets, closure properties of regular sets. Grammar Formalism: Regular grammars-right linear and left linear grammars, equivalence between regular linear grammar and FA, inter conversion, Context free grammar, derivation trees, and sentential forms. Right most and leftmost derivation of strings.											
Unit: 3	Context Free Grammars: Ambiguity in context free grammars. Minimisation of Context Free Grammars. Chomsky normal form, Greibach normal form, Pumping Lemma for Context Free Languages. Enumeration of properties of CFL. Push Down Automata: Push down automata, definition, model, acceptance of CFL, Acceptance by final state and acceptance by empty state and its equivalence. Equivalence of CFL and PDA, interconversion.											
Unit: 4	Turing Machine: Turing Machine, definition, model, design of TM, Computable functions, recursively enumerable languages. Church's hypothesis, counter machine, types of Turing machines											
Unit: 5	Computability Theory: Chomsky hierarchy of languages, linear bounded automata and context sensitive language, LR(0) grammar, decidability of problems, Universal Turing Machine, undecidability of posts correspondence problem, Definition of P and NP problems, NP complete and NP hard problems											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Introduction to Automata Theory Languages and Computation. Hopcroft H.E. and Ullman J. D. Pearson Education											
2	Theory of Computer Science – Automata languages and computation -Mishra and Chandrashekar, PHI.											
Reference Books:												
1	Introduction to Formal languages Automata Theory and Computation Kamala Krithivasan Rama R.											
2	Michael Sipser, "Introduction to the Theory of Computation ", Thomson Learning, PWS publishing company											

3	Introduction to Computer Theory, Daniel I.A. Cohen, John Wiley.

Course Code	Course Title					Lecture			Semester: III			
MMCA332PCT	Blockchain Technology					L	T	P				
Version: 1.2	Date of Approval: 20th BoS					3	0	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Human Resource Development and Organizational Behavior and Discrete Mathematics												
Course Objectives:												
1. To understand the function of Blockchain as a method of securing distributed ledgers.												
2. To familiarize the functional/operational aspects of cryptocurrency ecosystem.												
3. To demonstrate about wallets and learn their utilization of wallet during transaction.												
4. To analyze and apply that how to write and apply the Smart Contracts.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Understand the blockchain Technology in real life										PO ₁ , PO ₂	
CO ₂	Apply the smart contracts on Ethereum platform.										PO ₃ , PO ₅ , PO ₆	
CO ₃	Develop the use cases on Hyperledger.										PO ₃ , PO ₄ , PO ₅ , PO ₆ , PO ₇	
CO ₄	Analyze the major research challenges and technical gaps existing between theory and practice in Blockchain										PO ₂ , PO ₄ , PO ₉	
PO₁- Engineering Knowledge, PO₂- Problem analysis, PO₃- Design/development of solutions, PO₄- Conduct investigations of complex problems, PO₅- Modern tool usage, PO₆- The engineer and society, PO₇- Environment and sustainability, PO₈- Ethics, PO₉- Individual or team work, PO₁₀- Communication, PO₁₁- Project management and finance, PO₁₂- Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂			2		2	1						
CO ₃			2	1	2							
CO ₄		2		1					1			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction to Cryptography, Introduction to graph, ring and field, prime and relative prime numbers, modular arithmetic, Fermat's and Euler's theorem, Euclid's Algorithm, RSA algorithm, Diffie-Hellman key exchange algorithm, ElGamal Encryption, Elliptic curve cryptography, SHA 256, Digital Signature, Zero Knowledge Proof (ZKP)											
Unit: 2	Introduction from barter system to Cryptocurrency, fundamental of Blockchain, Block structure, Genesis Block, Orphaned Blocks, Stale Block, Uncle Block, Distributed Ledger Technology (DLT), peer-to-peer network, Merkle Tree, Lifecycle of Blockchain, Evolutions of Blockchain, Fork, double spending money, Transactions and UTXO's, Types of Blockchain. Need of Blockchain, Benefits of Blockchain.											
Unit: 3	Cryptocurrencies: BitCoin (BTC), Ethereum (ETH), Ripple (XRP), Litecoin (LTC), Bitcoin Cash (BCH), Mining pools, Mining, Difficulty Level, Current Target, Nonce, how miners picks transactions, How do mempools work, 51% attack.Consensus Algorithms: Proof of Work (PoW), Asynchronous Byzantine Agreement, Proof of Stake (PoS), Hybrid models (PoW + PoS),											
Unit: 4	Wallets, Types of wallets-Hardware, Software, Paper, Web, Desktop. Ethereum - Ethereum network, Ethereum Virtual Machine (EVM), Wallets for Ethereum, Solidity - Smart Contracts, Truffle, Web3, some attacks on smart contracts, Design and issue Cryptocurrency ICO, Mining, Gas - Transactional Fee & Incentivisations, DApps, Decentralized Autonomous Organizations (DAO).											
Unit: 5	Hyperledger- Introduction to Hyperledger, Utilization of Hyperledger, Hyperledger Architecture, Membership, Blockchain, Transaction, Chaincode, Hyperledger Fabric, Features of Hyperledger, Fabric Installation of prerequisite, Architecture of Hyperledger Fabric, Transaction, Ledger, Nodes, Peer, Endorser, Ordering Nodes, Channels, Certificate Authority, Transaction Flow.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Mastering Blockchain, Imran Bashir, Packt Publishing											
2	Bitcoin and Cryptocurrency Technologies, Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller, Steven Goldfeder, Princeton University Press. https://bitcoinbook.cs.princeton.edu/

Course Code		Course Title				Lecture			Semester: III			
MMCA333PCT		Machine Learning				L	T	P				
Version: 1.2		Date of Approval: 20th BoS				3	0	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Artificial Intelligence												
Course Objectives:												
1. To understand the basic building blocks and general principles that allow one to design machine learning algorithms.												
2. To become familiar with specific, widely used machine learning algorithms.												
3. To apply methodology and tools on various machine learning algorithms to real data and evaluate their performance.												
4. To apply the Regression and clustering techniques to solve various problems.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Understand the concepts of computational intelligence like machine learning.										PO ₁ , PO ₂	
CO ₂	Apply machine learning techniques to address the real time problems in different areas.										PO ₃ , PO ₅	
CO ₃	Perform evaluation of learning algorithms and model selection.										PO ₃ , PO ₄	
CO ₄	Analyze and appreciate the applications which can use Machine Learning Techniques.										PO ₂ , PO ₄ , PO ₅	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

CO ₂			2		2							
CO ₃			2	1								
CO ₄		2		1	2							
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction: Machine Learning, Need of Machine Learning, Application of Machine Learning, Types of Machine Learning, and Design cycle of Machine Learning. Machine Learning Statistic: Data, Dataset, Features, Data formats: Primary, Secondary, Qualitative, Quantitative; Descriptive Statistic, Inferential Statistic, Measure of Central Tendency, Measure of Dispersion.											
Unit: 2	Exploratory Data Analysis: Data Collection Techniques, Data Cleansing / Preprocessing, Outliers handling, Univariate Analysis, Bi-variate Analysis, Hypothesis: Null-hypothesis, Alternate-hypothesis; Bias-Variance tradeoff. ML basic Libraries: Pandas, Numpy, Matplotlib, Seaborn, Scikit-Learn.											
Unit: 3	Supervised-Learning: Regression – Linear Regression, Support Vector Regression (SVR). Best fit line, Residual, cost function, learning rate, Gradient Descent: Global minima, Local minima; Under fitting, Over fitting. Classification - Logistic Regression, Sigmoid function, KNN Algorithm.											
Unit: 4	Decision Tree Learning: Concept of decision tree, Using ID3 and CART algorithm, Picking the Splitting attribute: Entropy, Information Gain. Ensemble Learning: Base learner (weak learner), Bagging (Bootstrap aggregation), Boosting: Ada-Boost, XGboost, Gradient Boosting;											
Unit: 5	Support Vector Machines: Hyper plane, Support Vectors, Kernal Function: Linear, Polynomial, RBF; Maximum margin linear separator. Bayesian Learning: Bayes rule, Naïve Bayes learning algorithm, Bayes nets and Markov nets. Clustering: K-Mean clustering: Centroid, Distance Metric, Elbow method for Clustering.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:

CO ₂		2		1								
CO ₃			2		2				2			
CO ₄		2				1						
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction to IoT, IOT Architecture, Sensing, Actuation, Basics of Networking, Basics of Networking Communication Protocols.											
Unit: 2	Communication Protocols, Sensor Networks, Machine-to-Machine Communications and Introduction to SDN, SDN for IoT.											
Unit: 3	Interoperability in IoT, Introduction to Arduino Programming, IoT development tools/platforms, Integration of Sensors and Actuators with Arduino, Introduction to Raspberry Pi, Implementation of IoT with Raspberry Pi.											
Unit: 4	IOT based Cloud Computing, Sensor-Cloud, Fog Computing, Smart Cities and Smart Homes, Data Handling and Analytics.											
Unit: 5	IOT Based Connected Vehicles, Smart Grid, And Industrial IoT. Applications of IOT, Case Study: Agriculture, Healthcare, Activity Monitoring, Implementation of IoT concepts.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Internet of Things: A Hands-on Approach", by Arshdeep Bahga and Vijay Madiseti (Universities Press).											
2	The Internet of Things: Enabling Technologies, Platforms, and Use Cases, by Pethuru Raj and Anupama C. Raman (CRC Press).											
Reference Books:

MMCA336PCT	Cyber Law and Cyber Security				L	T	P					
Version: 1.2	Date of Approval:				2	0	0					
Scheme of Instruction				Scheme of Examination								
No. of Periods	:	30 Hrs.		Maximum Score	:	35						
Periods/ Week	:	2		Internal Evaluation	:	15						
Credits	:	3		End Semester	:	70						
Instruction Mode	:	Lecture		Exam Duration	:	3 Hrs.						
Prerequisite(s): No specific pre-requisites.												
Course Objectives:												
<ol style="list-style-type: none"> To create the basic clarity and understanding of cyberlaws and cyber security laws to the professionals learning the ethical hacking programme. To emphasize on the activities leading to infringement of individual or organizational privacy. To provide the awareness of vulnerabilities in software. To understand the concept of intrusion detection and prevention. 												
Course Outcomes (CO):												
COs No.	Statement				Mapped Program Outcomes (POs)							
CO ₁	Understand of cyberlaws and cyber security laws				PO ₁ , PO ₂							
CO ₂	Awareness for prevention of cyber crimes				PO ₆ , PO ₈ , PO ₁₂							
CO ₃	Demonstrate cyber security vulnerabilities and cyber security safeguards				PO ₅ , PO ₈							
CO ₄	Able to secure web applications				PO ₈ , PO ₉							
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂						2	3					2
CO ₃					2			2				
CO ₄								2	2			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction: Cyber law, Need for Cyber Law, Cyber Jurisprudence at International and Indian Level, Issues of jurisdiction in cyberspace, Types of jurisdiction, The Test evolved - Minimum Contacts Theory - Sliding Scale Theory - Effects Test and International targeting, Jurisdiction under IT Act, 2000.											
Unit: 2	Cyber Crimes & Legal Framework Cyber Crimes against Individuals, Institution and State , Hacking , Digital Forgery ,Cyber Stalking/Harassment, Cyber Pornography, Identity Theft & Fraud , Cyber Terrorism ,Cyber Defamation ,Right to Privacy and Data Protection on Internet - Concept of privacy. Threat to privacy on internet - Self-regulation approach to privacy - Ingredients to decide confidentiality of information - Breach of sensitive personal information and confidentiality under IT Act and penalties for the same. - Right of Interception under IT Act. , Different offences under IT Act, 2000.											
Unit: 3	Overview of Cyber Security, Internet Governance – Challenges and Constraints, Cyber Threats:- Cyber Warfare-Cyber Crime-Cyber terrorism-Cyber Espionage, Need for a Comprehensive Cyber Security Policy, Need for a Nodal Authority, Need for an International convention on Cyberspace.											
Unit: 4	Cyber Security Vulnerabilities and Cyber Security Safeguards: vulnerabilities in software, System administration, Complex Network Architectures, Open Access to Organizational Data, Weak Authentication, Unprotected Broadband communications, Poor Cyber Security Awareness. Cyber Security Safeguards- Overview, Access control, Audit, Authentication, Biometrics, Cryptography, Deception, Denial of Service Filters, Ethical Hacking, Firewalls, Intrusion Detection Systems, Response, Scanning, Security policy, Threat Management.											
Unit: 5	Securing Web Application, Services and Servers: Basic security for HTTP Applications and Services, Basic Security for SOAP Services, Identity Management and Web Services, Authorization Patterns, Security Considerations, Challenges. Intrusion Detection and Prevention, Physical Theft, Abuse of Privileges, Unauthorized Access by Outsider, Malware infection, Intrusion detection and Prevention Techniques, Anti-Malware software, Network based Intrusion detection Systems											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

Discipline Specific Elective

Course Code		Course Title				Lecture			Semester: II			
MMCA231DET		Digital Forensics				L	T	P				
Version: 1.2		Date of Approval: 20th BoS				3	0	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Data Structure and Algorithm												
Course Objectives:												
1. To understand the process of Digital Forensics.												
2. To understand the Environment of forensics & learn process of collecting evidences.												
3. To gain working knowledge of analyzing evidences using tools.												
4. To use of various tools and applications.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Understand the hardware and software components responsible for seeking evidence.										PO ₁ , PO ₂	
CO ₂	Analyze the need for cybercrime investigation.										PO ₂ , PO ₄ , PO ₈	
CO ₃	Demonstrate the knowledge of the techniques used for collecting evidences.										PO ₄ , PO ₈	
CO ₄	Analyze and apply the evidence through suitable tools.										PO ₂ , PO ₃	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

CO ₃								2				
CO ₄		2	2									
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	DIGITAL FORENSICS PROCESS: Forensic Science, Digital Forensics, Digital Evidence, Digital Forensics Process – Identification, Collection, Examination, Analysis, Presentation Phases. Cyber Crime Law- International Legal Framework of Cybercrime Law, Digital Crime, Investigation Methods for Collecting Digital Evidence.											
Unit: 2	FORENSICS ENVIRONMENTS: Hardware and Software Environments – Storage Devices, Operating System, File Systems, and Metadata, Locating evidence in file systems-Password security, Encryption, and Hidden files. Case study – linking the evidence to the user, Data Analysis using forensics tool ILookIX											
Unit: 3	COLLECTING EVIDENCES Use of Digital Evidence, File Metadata and Correlation with Other Evidence, Technical Complexities of Digital Evidence. Data carving, Date and time problems, Physical Acquisition and Safekeeping of Digital Evidence. Forensic Imaging Processes. Case Study – IXImager, Understanding. ASB Container											
Unit: 4	ANALYZING DIGITAL EVIDENCE: Selecting and Analyzing Digital Evidence - Locating digital evidence, categorizing files, eliminating superfluous files, and Validating the Evidence. Case study – illustrating the recovery of deleted evidence held in volume shadows.											
Unit: 5	OTHER SOURCES OF EVIDENCES: Windows and Other Operating Systems as Sources of Evidence, Examining Browsers, E-mails, Messaging Systems, and Mobile Phones, Internet and Cloud. - Challenges in Digital Forensics.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Richard Boddington, Practical Digital Forensics, PACKT publishing, First Edition, 2016ANDRÉ ÁRNES.

MMCA232DET		Component based Software Engineering					L	T	P			
Version: 1.2		Date of Approval: 20th BoS					3	0	0			
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Data structure and algorithm												
Course Objectives:												
1. To understand the idea of decomposing the given problem into Analysis, Design, Implementation, Testing and Maintenance phases.												
2. To provide an idea of using various process models in the software industry according to given circumstances												
3. To gain the knowledge of how Analysis, Design, Implementation,												
4. To test and maintain processes of a software project.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Decompose the given project in various phases of a lifecycle. Knowledge, Understand										PO ₁ , PO ₂ , PO ₃ , PO ₁₁	
CO ₂	Selection of appropriate process model depending on the user requirements apply the knowledge, techniques, and skills in the development of a software product										PO ₂ , PO ₅ , PO ₆ , PO ₁₁	
CO ₃	Perform various life cycle activities like Analysis, Design, Implementation, Testing and Maintenance.										PO ₃ , PO ₄ , PO ₅	
CO ₄	Analyze various processes used in all the phases of the product.										PO ₂ , PO ₆	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂

MMCA234DET		Distributed Systems				L	T	P				
Version: 1.2		Date of Approval: 20th BoS				3	0	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Basic networking concepts and Basic OS												
Course Objectives:												
1. To understand the overview of the principles, architectures, algorithms and programming models used in distributed systems.												
2. To acquire the concept of distributed system design.												
3. To gain the knowledge in synchronization, consistency and replication, fault tolerance and security.												
4. To apply and analysis of the current popular distributed systems such as peer-to-peer (P2P) systems.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Understand the characteristics, issues and importance of distributed systems										PO ₁ , PO ₂	
CO ₂	Demonstrate the architecture and processes of Distributed System.										PO ₃ , PO ₄	
CO ₃	Analyze the concept of synchronization processes.										PO ₂ , PO ₄	
CO ₄	Apply and analyze the importance of security in distributed systems										PO ₂ , PO ₃	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction: Motivation, objectives, characterization & classification of distributed systems. Distributed system architecture. Hardware & software issues. Communication: Layered protocols, Client server protocols, RPC, group communication. Coordination, synchronization & consistency: Logical clocks, Physical clocks, mutual exclusion, election algorithms, atomic broadcast, sequential consistency transaction distributed consensus, Threads: Thread synchronization, implementation issues, and threads vs. RPC											
Unit: 2	Models of distributed computing: Client server and RPC, RPC architecture, exceptions, underlying protocols, IDL, marshalling etc. Group models and peer to peer: Groups for service replication/ reliability, groups for parallelism / performance, client/ server vs. peer-to-peer, multicast, atomic broadcast.											
Unit: 3	Inter-process Communication: API for Internet protocols. External data representation and Marshalling. Client-Server communication and Group communication. Distributed Objects and Remote Invocation- Communication between distributed objects, Remote procedure call, Events and notifications.											
Unit: 4	Distributed file system: Security, Naming/ location transparency, R/W semantics, cache coherence, replication. Distributed shared memory: DSM architecture, consistency models and relation to caching, release consistency, comparison with message passing and RPC. Advanced Distributed Computing Paradigms: Message Queuing, Mobile agents, Network services, Object spaces											
Unit: 5	Fault tolerant distributed systems: Introduction, dependability, faults vs. errors vs. failure, space time and value redundancy, fault tolerant architecture, failure detection algorithms, partitioning, FT consensus. Distributed multimedia system: Introduction, characteristics, and resource management stream adaptation											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Jean Dollimore, Tim Kindberg, George Coulouris, Distributed Systems: Concepts and Design, 4th Edition, Addison Wesley, 2005											
2	A. Taunenbaum, Distributed Systems: Principles and Paradigms											
Reference Books:												
1	G. Coulouris, J. Dollimore, and T. Kindberg, Distributed Systems: Concepts and Design, Pearson Education											
2	Sape Mullender : Distributed system, 2nd Edition, Addison Wesley.											

Course Code	Course Title		Lecture			Semester: III						
MMCA235DET	Data Science		L	T	P							
Version: 1.2	Date of Approval: 20th BoS		3	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	45 Hrs.	Maximum Score		:	100						
Periods/ Week	:	3	Internal Evaluation		:	30						
Credits	:	3	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Mathematics, Statistics												
Course Objectives:												
1. To make the students to know about understanding of the data operations.												
2. To make the student to learn the concept of simple statistical models and the basics of machine learning techniques of regression.												
3. To analyze the capability of regression, classification problem.												
4. To apply algorithms on Applications of Data Science & Machine learning.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand the concepts of data science process, data science toolkit, Types of data, Data collection and management					PO ₁ , PO ₂						
CO ₂	Demonstrate the concept of simple statistical models and the basics of machine learning techniques of regression.					PO ₃						
CO ₃	Apply the regression and classification problem and create the Databases					PO ₃ , PO ₄ , PO ₅						
CO ₄	Analyze the data, Applications of Data Science, Technologies for data visualization					PO ₂ , PO ₄ , PO ₉						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂			2									
CO ₃			2	1	2							
CO ₄			2	1					1			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction, Toolboxes: Python, fundamental libraries for data Scientists. Integrated development environment (IDE). Data operations: Reading, selecting, filtering, manipulating, sorting, grouping, rearranging, ranking, and plotting											
Unit: 2	Descriptive statistics, data preparation. Exploratory Data Analysis data summarization, data distribution, measuring asymmetry. Sample and estimated mean, variance and standard score. Statistical Inference frequency approach, variability of estimates, hypothesis testing using confidence intervals, using pvalue											
Unit: 3	Supervised Learning: First step, learning curves, training-validation and test. Learning models generalities, support vector machines, random forest. Examples											
Unit: 4	Regression analysis, Regression: linear regression simple linear regression, multiple & Polynomial regression, Sparse model. Unsupervised learning, clustering, similarity and distances, quality measures of clustering, case study.											
Unit: 5	Network Analysis, Graphs, Social Networks, centrality, drawing centrality of Graphs, PageRank, Ego-Networks, community Detection											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Introduction to Data Science a Python approach to concepts, Techniques and Applications, Igual, L;Seghi', S. Springer, ISBN:978-3-319-50016-4											
Reference Books:

Course Code		Course Title				Lecture			Semester: IV			
MMCA331DET		Cloud Computing and Virtualization				L	T	P				
Version: 1.2		Date of Approval: 20th BoS				3	0	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Computer Network and Distributed System												
Course Objectives:												
1. To present a comprehensive understanding of cloud architecture and cloud computing methodology.												
2. To understand the different types of cloud computing services namely.												
3. To demonstrate the architecture of cloud services and the trusted cloud computing system.												
4. To apply virtualization, security and privacy issues.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Identify the architecture, infrastructure and delivery models of cloud computing										PO ₁ , PO ₂	
CO ₂	Analyze cloud, data center, hypervisor, CPU, and memory management concerns.										PO ₂ , PO ₃ , PO ₄ , PO ₅ , PO ₇	
CO ₃	Apply suitable virtualization concept.										PO ₃ , PO ₅	
CO ₄	Handle the cloud computing, virtualization, security, and privacy issues.										PO ₄ , PO ₅ , PO ₈	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂

CO ₂		2	2	1	2		1					
CO ₃			2		2							
CO ₄				1	2			1				
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Cloud Computing Fundamentals: overview of Cloud Computing, Types of cloud, Cloud services: Benefits and challenges of cloud computing, Evolution of Cloud Computing, Applications cloud computing, Business models around Cloud–Major Players in Cloud Computing Titans-Issues in Cloud											
Unit: 2	Cluster Computing, Grid Computing, Grid Computing Versus Cloud Computing, Key Characteristics of Cloud Computing. Cloud Models: Benefits of Cloud Models, Public Cloud, Private Cloud, Hybrid Cloud, Community Cloud, Shared Private Cloud, Dedicated Private Cloud, and Dynamic Private Cloud.											
Unit: 3	Cloud Services and File System: Types of Cloud services: Software as a Service - Platform as a Service – Infrastructure as a Service - Database as a Service- Monitoring as a Service – Communication as services. Service providers- Google App Engine, Amazon EC2, Microsoft Azure, Salesforce.											
Unit: 4	Virtualization: Basics of Virtualization – Need of Virtualization- Benefits of Virtualization- Limitation of Virtualization- Approaches to Virtualization -Virtualization Structures -Types of Virtualization – Virtual machine - Types of virtual Machine- Virtual Machine software - Virtualization of CPU, Memory, I/O Devices - Resource Virtualization- Virtualization Tools (VMware, Citrix, Microsoft, Oracle virtual Box) – Advance concepts in cloud computing : Data center for cloud, Cloud management . Introduction to MapReduce, GFS, HDFS, Hadoop Framework.											
Unit: 5	Security in the Cloud: Security Overview – Cloud Security Challenges and Risks –Identified cloud security Issues-Categorization of cloud security issues– State of the Art solutions, Integrated Solutions: Amazon as Case study– Cloud computing Security Reference Architecture –Identity and Access Management Security Monitoring – Security Architecture Design – Data Security – Application Security – Virtual Machine Security											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Toby Velte, Anthony Velte, Robert Elsenpeter, “Cloud Computing, A Practical Approach”, TMH, 2009.

MMCA332DET		Computer Graphics				L	T	P				
Version: 1.2		Date of Approval: 20th BoS				3	0	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Data structure & Algorithms												
Course Objectives:												
1. To understand interactive computer graphics, two-dimensional system and mapping.												
2. To acquire the knowledge of drawing algorithms and techniques of 2D transformations.												
3. To analysis the concept of clipping and filling algorithms.												
4. To apply 3-D objects representation concepts.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Understand the various graphics systems and the output primitive techniques										PO ₁ , PO ₂	
CO ₂	Demonstrate the different 2D Geometric transformations and viewing functions										PO ₃	
CO ₃	Illustrate the Structure and Modeling concepts										PO ₃ , PO ₄	
CO ₄	Apply the 3D transformations and surface detection methods										PO ₃ , PO ₉	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes

CO ₂			2									
CO ₃			2	2								
CO ₄			2						1			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Overview of Graphics Systems – Video display devices, raster-scan systems. Random-scan system, graphics monitors and workstations. Input devices, Hardcopy devices, Graphics software. Output primitives: Line drawing algorithms, Circle generation algorithms, ellipse generating algorithms, pixel addressing, Filled area primitives, Fill area functions, cell array and character generations.											
Unit: 2	Attributes of output primitives: Line attributes, curve attributes color and Gray-scale level, Area fill attributes, character attributes, and Bundled attributes Enquiry functions. Two dimensional Geometric transformations: Basic transformations, Homogenous co-ordinates, affine transformations, transformation functions. Raster methods for transformations.											
Unit: 3	Two dimensional viewing: Viewing pipeline, viewing transformation, viewing functions, line clipping – Cohen Sutherland line clipping, Liang Barsky line clipping. Polygon, clipping: Sutherland-Hodgman polygon clipping, Wiler Atherton polygon clipping.											
Unit: 4	Structures and Hierarchical Modeling: Structure concepts, editing structures, Basic modeling concepts, hierarchical modeling with structures. Graphical user interfaces and Interactive input methods: The user Dialogue, logical classification of input devices, Input functions and Models Interactive picture construction techniques.											
Unit: 5	Three – Dimensional object representations: Poly-surfaces curved lines and surfaces, spline representation, Bezier curves and surfaces, B-Spline curves and surface, CSG Methods: Octrees, BSP Trees. Three Dimensional Transformation: Three dimensional viewing: Viewing coordinates, projections, Visible surface detection methods: Back-face Detection, Depth-buffer methods, scan line methods, Depth-sorting methods, BSP – Tree Methods, Arc sub division methods, Basic illuminations models – Gourand shading phong shading.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:

-------------	--------------	---------	---------------

MMCA333DET		Data Mining			L	T	P					
Version: 1.2		Date of Approval: 20th BoS			3	0	0					
Scheme of Instruction				Scheme of Examination								
No. of Periods	:	45 Hrs.		Maximum Score	:	100						
Periods/ Week	:	3		Internal Evaluation	:	30						
Credits	:	3		End Semester	:	70						
Instruction Mode	:	Lecture		Exam Duration	:	3 Hrs.						
Prerequisite(s): DBMS												
Course Objectives:												
1. To introduce data mining principles and techniques.												
2. To acquire the concept of critical thinking, problem solving and DECISION-MAKING skills with respect to Data warehouse and data mining.												
3. To demonstrate various schema model and the Star Schema to design a Data Warehouse.												
4. To apply different data mining techniques and algorithms.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Understand a data warehouse or data mart to present information needed by the manager and can be utilized for managing clients						PO ₁ , PO ₂					
CO ₂	Demonstrate a quality data warehouse or data mart effectively and administer the data resources in such a way that it will truly meet management's requirements						PO ₃ , PO ₄					
CO ₃	Evaluate standards and new technologies to determine their potential impact on your information resource for a large complex data warehouse/data mart.						PO ₄ , PO ₉					
CO ₄	Apply the emerging technologies in Data mining.						PO ₃ , PO ₄ , PO ₉					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂			2	1								
CO ₃				2					1			
CO ₄			2	1					1			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction: Fundamentals of Data Mining, Kinds of Patterns can be mined, Technologies Used, Applications and Issues in Data Mining. Types of Data: Attribute types, Basic Statistical descriptions of Data, Measuring data Similarity and Dissimilarity. Data Preprocessing: Need of Preprocessing, Data Cleaning, Data Integration, Data Reduction, Data Transformation.											
Unit: 2	Data Warehouse and OLAP: Data Warehouse, Data Warehouse Modeling, Data Warehouse Design and Usage, Data Warehouse Implementation, Data Generalization by Attribute-oriented induction											
Unit: 3	Mining Frequent Patterns, Associations and Correlations: Market Basket Analysis, Association rule mining, Frequent Item set mining methods, Pattern Evaluation methods, Constraint based frequent pattern mining, Mining Multilevel and Multidimensional patterns.											
Unit: 4	Classification: General approach to classification, Classification by Decision Tree Induction, Bayes Classification methods, Bayesian Belief Networks, Classification by Back-propagation, Lazy Learners, Other Classification methods, Classification using Frequent patterns, Model Evaluation and selection											
Unit: 5	Cluster Analysis: Basic Clustering methods, Partitioning methods, Density –Based Methods, Grid-based methods, and Evaluation of Clustering, Outlier Analysis and Detection methods. Data Mining Trends and Research Frontiers: Mining Complex Data Types, Data Mining Applications, Data Mining Trends and usage of Data Mining Tools.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Han J & Kamber M, "Data Mining: Concepts and Techniques", Harcourt India, Elsevier India, Second Edition.											
2	Pang-Ning Tan. Michael Steinback, Vipin Kumar, "Introduction to Data Mining", Pearson Education, 2008.

MMCA334DET	Compiler Design		L	T	P							
Version: 1.2	Date of Approval: 20th BoS		3	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	45 Hrs.	Maximum Score		:	100						
Periods/ Week	:	3	Internal Evaluation		:	30						
Credits	:	3	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Operating System												
Course Objectives:												
1. To understand the various phases in the design of a compiler.												
2. To demonstrate the design of top-down and bottom-up parsers.												
3. To analyze syntax directed translation schemes.												
4. To develop algorithms to generate code for a target machine.												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Understand the concept of Designing, developing, and implementing a compiler for any language.						PO ₁ , PO ₂					
CO ₂	Demonstrate LL and LR parsers.						PO ₃					
CO ₃	Design algorithms to perform code optimization in order to improve the performance of a program in terms of space and time complexity.						PO ₃ , PO ₄					
CO ₄	Develop and analyze algorithms to generate machine code						PO ₃ , PO ₄ , PO ₅					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂			2									
CO ₃			2	1								
CO ₄			2	1	1							
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction to compilers: Structure of a compiler – Lexical Analysis – Role of Lexical Analyzer – Input Buffering – Specification of Tokens – Recognition of Tokens – Lex – Finite Automata – Regular Expressions to Automata – Minimizing DFA.											
Unit: 2	Syntax Analysis: Role of Parser – Grammars – Error Handling – Context-free grammars – Writing a grammar – Top-Down Parsing – General Strategies Recursive Descent Parser Predictive Parser-LL (1) Parser-Shift Reduce Parser-LR Parser-LR (0) Item Construction of SLR Parsing Table -Introduction to LALR Parser – Error Handling and Recovery in Syntax Analyzer											
Unit: 3	Intermediate Code Generation: Syntax Directed Definitions, Evaluation Orders for Syntax Directed Definitions, Intermediate Languages: Syntax Tree, Three Address Code, Types and Declarations, Translation of Expressions, Type Checking.											
Unit: 4	Run-Time Environment and Code Generation: Storage Organization, Stack Allocation Space, Access to Non-local Data on the Stack, Heap Management – Issues in Code Generation – Design of a simple Code Generator.											
Unit: 5	Code Optimization: Principal Sources of Optimization – Peep-hole optimization – DAG-Optimization of Basic Blocks Global Data Flow Analysis – Efficient Data Flow Algorithm.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Compilers: Principles, Techniques and Tools, Second Edition, Alfred V. Aho, Monica S. Lam, Ravi Sethi, Jeffrey D. Ullman, Pearson.											
2	Compiler Construction-Principles and Practice, Kenneth C Louden, Cengage Learning.											
Reference Books:												
1	Modern compiler implementation in C, Andrew W Appel, Revised edition, Cambridge University Press.											
2	The Theory and Practice of Compiler writing, J. P. Tremblay and P. G. Sorenson, TMH

Scheme of Instruction					Scheme of Examination							
No. of Periods		:	45 Hrs.			Maximum Score		:	100			
Periods/ Week		:	3			Internal Evaluation		:	30			
Credits		:	3			End Semester		:	70			
Instruction Mode		:	Lecture			Exam Duration		:	3 Hrs.			
Prerequisite(s): Artificial Intelligence												
Course Objectives:												
1. To understand the role of neural networks in engineering.												
2. To acquire the knowledge of artificial intelligence, and cognitive modeling.												
3. To implement the concept of types of neural networks.												
4. To analyze of computation and dynamical systems using neural networks.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Identify the neural network algorithms.								PO ₁ , PO ₂			
CO ₂	Apply a variety of neural network algorithm on the available data set.								PO ₃ , PO ₅			
CO ₃	Implement the neural network algorithms and solve real-world problems.								PO ₃ , PO ₅			
CO ₄	Perform evaluation of neural network algorithms.								PO ₄ , PO ₉			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂			2		1							
CO ₃			2		2							
CO ₄				2					1			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	General characteristics of the human brain, Introduction to Biological Neural Networks, Nerve structure and synapse, Basic concepts of Neural Networks, Characteristics of Neural Networks, Terminologies, Applications of the artificial neural networks.											
Unit: 2	Structure of a neural net (topology), Directed graphs, Models of Neuron, Neural Network Architectures, Artificial Neuron, Activation functions, Threshold function, Piecewise linear function, Sigmoidal function, Supervised learning, Unsupervised learning, Reinforcement Learning.											
Unit: 3	Knowledge Representation, Artificial Intelligence, learning rules, Error correction learning, Memory based learning, Hebbian learning, Competitive learning, Boltzmann learning, single layer perceptron, Multilayer perceptron, Back propagation, Recurrent networks, Network pruning.											
Unit: 4	Adaptive networks, Supervised Learning Neural Networks, Decision-based neural networks, Hierarchical neural networks, Probabilistic neural network, Radial basis function networks, Comparison of RBF Networks and multilayer perceptron.											
Unit: 5	Classification of linearly separable patterns, Boltzmann machine, Sigmoid Belief Networks, Helmholtz machine, Support vector machines, Self-organization maps, Genetic Algorithms, Optimization, Prediction Systems, speech and decision-making.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	S. Haykin, "Neural Networks a comprehensive Foundation" second edition, Prentice-Hall India.											
2	Laurene Fausett, "Fundamentals of Neural Networks, Architecture, Algorithms, and Applications", Prentice Hall, 1993											
Reference Books:												
1	Jacek M. Zurada, Introduction to artificial neural systems, Jaico Publ. House, 1994.											
2	Anderson, —An introduction to Artificial Neural Networks, Prentice Hall.											

Course Code		Course Title				Lecture			Semester: III			
MMCA333DSE		Semantic Web				L	T	P				
Version: 1.2		Date of Approval: 20th BoS				3	0	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Artificial Intelligence												
Course Objectives:												
1. To learn about the Semantic Web Vision.												
2. To understand about XML, RDF, RDFS, OWL.												
3. To create and querying the ontology.												
4. To form ontology reasoning and migrate from document to Data Web.												
Course Outcomes (CO):												
COs No.	Statement								Mapped Program Outcomes (POs)			
CO ₁	Understand the concepts of structure of the semantic web technology, semantics of knowledge and resource, ontology.								PO ₁ , PO ₂			
CO ₂	Describe logic semantics and inference with OWL.								PO ₂			
CO ₃	Use ontology engineering approaches in semantic applications								PO ₃ , PO ₉			
CO ₄	Analyze Web graph processing for various applications such as search engine, community detection								PO ₂ , PO ₃			
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

CO ₂		2										
CO ₃			2						1			
CO ₄		2	2									
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Foundation of Semantic Web Technologies: Introduction, Current web vs Semantic Web, Semantic Web Technologies, A layered approach Descriptive Logic, Introduction, Definition of the basic formalism, Reasoning algorithms, Language extensions											
Unit: 2	Structured Web Documents in XML: Introduction, XML Structuring, Namespaces, Addressing and querying XML document Processing											
Unit: 3	Describing Web Resources: RDF, Introduction RDF: Basic Ideas, RDF: XML-Based Syntax, RDF serialization, RDF Schema: Basic Ideas, RDF Schema: The Language, RDF and RDF Schema in RDF Schema											
Unit: 4	Web Ontology Language: OWL Introduction, OWL and RDF/RDFS, Three Sublanguages of OWL, Description of the OWL Language, Layering of OWL, Examples of OWL											
Unit: 5	SPARQL, SPARQL simple Graph Patterns, Complex Graph Patterns, Group Patterns, Queries with Data Values, Filters OWL Formal Semantics											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:

2	Michael C. Daconta, Leo J. Obrst, and Kevin T. Smith, "The Semantic Web: A Guide to the Future of XML, Web Services, and Knowledge Management", Fourth Edition, Wiley Publishing, 2003.											

Course Code	Course Title		Lecture			Semester: III						
MMCA334DSE	PHP Programming		L	T	P							
Version: 1.2	Date of Approval: 20th BoS		3	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	45 Hrs.	Maximum Score		:	100						
Periods/ Week	:	3	Internal Evaluation		:	30						
Credits	:	3	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Computer Programming and Database												
Course Objectives:												
1. To introduce the necessary knowledge to design and develop dynamic, database-driven web applications using PHP.												
2. To understand basics of web programming, POST and GET in form submission.												
3. To illustrate how server-side programming works on the web.												
4. To analyze how to Read, write cookies and develop PHP application with MySQL Database.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand principle of Web page design and about types of websites					PO ₁ , PO ₂						
CO ₂	Explain and recognize the basic concept of HTML, CSS, JavaScript and their application in web designing.					PO ₂ , PO ₃						
CO ₃	Implement the dynamic web pages with validation using JS object by applying different handling mechanism.					PO ₃ , PO ₅ , PO ₉						
CO ₄	Develop a simple web application using server-side PHP programming and Database Connectivity using My SQL.					PO ₃ , PO ₅ , PO ₉						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂		2	2									
CO ₃			2		2				1			
CO ₄			2		2				1			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	HTML: Basics of HTML, formatting and fonts, commenting code, color, hyperlink, lists, tables, images, forms. Style sheets: Need for CSS, introduction to CSS, basic syntax and structure, using CSS, background images, colors and properties. Introduction to JavaScript: Client-side scripting with JavaScript, variables, functions, conditions, loops and repetition, Pop up boxes.											
Unit: 2	Introduction to PHP, Language Features, PHP Basics, PHP's Supported Data Types, Identifiers, Variables, Constants, Expressions, String Interpolation, Control Structures, Arrays, Strings and Regular Expressions, Working with the File and Operating System.											
Unit: 3	Handling Html Form With PHP: Capturing Form Data, Dealing with Multi-value filed, and Generating File uploaded form, Redirecting a form after submission. Function: What is a function, Define a function, Call by value and Call by reference, Recursive function.											
Unit: 4	PHP state management: Using query string (URL rewriting), Using Hidden field, Using cookies, Using session. PHP string matching with regular expression: What is regular expression, Pattern matching in PHP, Replacing text, Splitting a string with a Regular Expression. PHP OOPs concepts, Abstract class, Inheritance, Constructor.											
Unit: 5	MySQL:- PHP and MySQL : Basic commands with PHP examples, Connection to server, creating database, selecting a database, listing database, listing table names, creating a table, inserting data, altering tables, queries, deleting database, deleting data and tables, PHP Myadmin and database bugs.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Beginning PHP and MySQL, W. Jason Gilmore, Apress, 2010, Fourth Edition.											
2	Head First PHP & MySQL, Lynn Beighley & Michael Morrison, First Edition, O'Reilly.											
Reference Books:												
1	Developing Web Applications in PHP and AJAX, Harwani, McGraw Hill											
2	PHP6 and MySQL, Steve Suehring, Tim Converse and Joyce Park, Wiley India 2010, Second Edition											

Course Code	Course Title		Lecture			Semester: III						
MMCA335DSE	Soft Computing		L	T	P							
Version: 1.2	Date of Approval: 20th BoS		3	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	45 Hrs.	Maximum Score		:	100						
Periods/ Week	:	3	Internal Evaluation		:	30						
Credits	:	3	End Semester		:	70						
Instruction Mode	:	Lecture	Exam Duration		:	3 Hrs.						
Prerequisite(s): Algorithms and Programming												
Course Objectives:												
<ol style="list-style-type: none"> To introduce and use the idea of fuzzy logic and use of heuristics based on human experience To familiarize the Neuro-Fuzzy modeling using classification and clustering techniques. To learn the concepts of genetic algorithm and its applications. To acquire the knowledge of rough sets. 												
Course Outcomes (CO):												
COs No.	Statement						Mapped Program Outcomes (POs)					
CO ₁	Identify and describe soft computing techniques and their roles in building intelligent machines.						PO ₁ , PO ₂					
CO ₂	Apply fuzzy logic and reasoning to handle uncertainty and solve various engineering problems.						PO ₂ , PO ₃ , PO ₅					
CO ₃	Analyze genetic algorithms to combinatorial optimization problems.						PO ₂ , PO ₃					
CO ₄	Evaluate and compare solutions by various soft computing approaches for a given problem.						PO ₂ , PO ₄					
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes												
Course Outcomes	PO ₁	PO ₂	PO ₃	PO ₄	PO ₅	PO ₆	PO ₇	PO ₈	PO ₉	PO ₁₀	PO ₁₁	PO ₁₂
CO ₁	2	2										
CO ₂		2	2		2							
CO ₃		2	2									
CO ₄		2		2								
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction to soft computing and neural networks: Evolution of Computing: Soft Computing Constituents, From Conventional AI to Computational Intelligence: Machine Learning fundamentals.											
Unit: 2	Fuzzy logic: Introduction to Fuzzy logic, Fuzzy sets and membership functions, Operations on Fuzzy sets. Fuzzy relations, rules, propositions, implications and inferences, Defuzzification techniques of Fuzzy logic. controller design, applications of Fuzzy logic.											
Unit: 3	Genetic Algorithms: Concepts of Genetics and Evolution and its application to probabilistic search techniques, Basic GA framework and different GA architectures, GA operators: Encoding, Crossover, Selection and Mutation.											
Unit: 4	Artificial Neural Networks: Biological neurons and its working, Simulation of biological neurons to problem solving, Different ANNs architectures, Training techniques for ANNs, Applications of ANNs to solve some real-life problems.											
Unit: 5	Multi-objective Optimization Problem Solving: Concept of multi-objective optimization problems (MOOPs) and issues of solving them, Multi-Objective Evolutionary Algorithm (MOEA), Non-Pareto approaches to solve MOOPs, Pareto-based approaches to solve MOOPs, Some applications with MOEAs.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Jyh:Shing Roger Jang, Chuen:Tsai Sun, EijiMizutani, Neuro:Fuzzy and Soft Computing, Prentice:Hall of India, 2003.

MMCA337DSE		Web Mining				L	T	P				
Version: 1.2		Date of Approval: 20th BoS				3	0	0				
Scheme of Instruction					Scheme of Examination							
No. of Periods		: 45 Hrs.			Maximum Score			: 100				
Periods/ Week		: 3			Internal Evaluation			: 30				
Credits		: 3			End Semester			: 70				
Instruction Mode		: Lecture			Exam Duration			: 3 Hrs.				
Prerequisite(s): Discrete Mathematics and Statistics												
Course Objectives:												
1. To understand about web mining and understand the need for web mining.												
2. To learn differentiate between Web mining and data mining.												
3. To apply the different Methods and application areas for web mining.												
4. To analyze Web Mining strategies and algorithms in their workplace or research career.												
Course Outcomes (CO):												
COs No.	Statement										Mapped Program Outcomes (POs)	
CO ₁	Understand the need for web mining and Data Mining.										PO ₁ , PO ₂	
CO ₂	Conduct business intelligence from online resources.										PO ₃	
CO ₃	Apply Web Mining strategies and algorithms in their workplace or research career.										PO ₃ , PO ₅	
CO ₄	Create the search engines index and rank web documents.										PO ₃ , PO ₄ , PO ₉	
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

CO ₂			2									
CO ₃			2		2							
CO ₄			2	1					1			
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction to Web Data Mining and Data Mining Foundations, Introduction – World Wide Web (WWW), A Brief History of the Web and the Internet, Web Data Mining-Data Mining, Web Mining. Data Mining Foundations – Association Rules and Sequential Patterns – Basic Concepts of Association Rules, Apriori Algorithm- Frequent Itemset Generation, Association Rule Generation, Data Formats for Association Rule Mining, Mining with multiple minimum supports – Extended Model, Mining Algorithm, Rule Generation, Mining Class Association Rules, Basic Concepts of Sequential Patterns, Mining Sequential Patterns on GSP,											
Unit: 2	Supervised and Unsupervised Learning Supervised Learning – Basic Concepts, Decision Tree Induction – Learning Algorithm, Impurity Function, Handling of Continuous Attributes, Classifier Evaluation, Rule Induction – Sequential Covering, Rule Learning, Classification Based on Associations, Naïve Bayesian Classification, Naïve Bayesian Text Classification – Probabilistic Framework, Naïve Bayesian Model. Unsupervised Learning – Basic Concepts, K-means Clustering – K-means Algorithm, Representation of Clusters, Hierarchical Clustering, Strength and Weakness.											
Unit: 3	Information Retrieval and Web Search: Basic Concepts of Information Retrieval, Information Retrieval Methods – Boolean Model, Vector Space Model and Statistical Language Model, Relevance Feedback, Evaluation Measures, Text and Web Page Preprocessing – Stopword Removal, Stemming, Web Page Preprocessing, Duplicate Detection, Inverted Index and Its Compression – Inverted Index, Search using Inverted Index, Index Construction, Index Compression, Latent Semantic Indexing – Singular Value Decomposition, Query											
Unit: 4	Link Analysis and Web Crawling: Link Analysis – Social Network Analysis, Co-Citation and Bibliographic Coupling, Page Rank Algorithm, HITS Algorithm, Community Discovery-Problem Definition, Bipartite Core Communities, Maximum Flow Communities, Email Communities. Web Crawling – A Basic Crawler Algorithm- Breadth First Crawlers, Preferential Crawlers, Implementation Issues – Fetching, Parsing, Stopword Removal, Link Extraction, Spider Traps, Page Repository, Universal Crawlers, Focused Crawlers,											
Unit: 5	Opinion Mining and Web Usage Mining Opinion Mining – Sentiment Classification – Classification based on Sentiment Phrases, Classification Using Text Classification Methods, Feature based Opinion Mining and Summarization – Problem Definition, Object feature extraction, Feature Extraction from Pros and Cons of Format1, Feature Extraction from Reviews of Format 2 and 3, Comparative Sentence and Relation Mining, Web Usage Mining – Data Collection and Preprocessing- Sources and Types of Data, Key Elements of Web usage Data Preprocessing, Data Modeling for Web Usage Mining, Discovery											

Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.

MMCA338DSE	Natural Language Processing		L	T	P							
Version: 1.2	Date of Approval: 20th BoS		3	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	45 Hrs.	Maximum Score	:	100							
Periods/ Week	:	3	Internal Evaluation	:	30							
Credits	:	3	End Semester	:	70							
Instruction Mode	:	Lecture	Exam Duration	:	3 Hrs.							
Prerequisite(s): Mathematics												
Course Objectives:												
1. To understand the basic Concepts of Natural Language Processing.												
2. To demonstrate the problems using NLP Techniques.												
3. To apply of basic programming tools for NLP.												
4. To analyze the statistical approach in machine Translation.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Explain the approaches to syntax and semantics in NLP.					PO ₁ , PO ₂						
CO ₂	Analyze the approaches of generation, dialogue and summarization within NLP.					PO ₂						
CO ₃	Illustrate the methods for statistical approaches to machine translation.					PO ₃						
CO ₄	Apply Machine learning techniques and models for Machine Translation.					PO ₃ , PO ₅						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning

CO ₄			2		2							
<i>1 – Reasonable; 2 – Significant; 3 – Strong</i>												
Detailed Contents:												
Unit: 1	Introduction: Introduction to the Morphology, Syntax, Semantics by linking the “linguistics view” (computational linguistics) with the “artificial intelligence view” (natural language processing).											
Unit: 2	Morphology: Analysis and generation of language on word level: e.g., problems with compounding and idiomatic phrases, homophonous strings as well as loan words and their processing using e.g., finite state automata as well as semantic networks. Ambiguities in words like “pen” and “pipe”, but will also discuss some complex strings.											
Unit: 3	Syntax Analysis: Parsing Natural Language, Treebanks: A Data-Driven Approach to Syntax, Representation of Syntactic Structure, Parsing Algorithms, Models for Ambiguity Resolution in Parsing, Multilingual Issues.											
Unit: 4	Semantic Analysis: Representing Meaning - Meaning Structure of Language - First Order Predicate Calculus. Representing Linguistically Relevant Concepts –Syntax Driven Semantic Analysis - Semantic Attachments –Syntax Driven Analyzer. Robust Analysis - Lexemes and Their Senses - Internal Structure - Word Sense Disambiguation -Information Retrieval											
Unit: 5	Applications of NLP: Machine Translation, Grammar Checkers Dictation, Automatic Document Generation, NL Interfaces.											
Examination and Evaluation Pattern: It include both internal evaluation (30 marks) comprising two class sessional exams/ assignments/ quiz/ seminar presentation etc. and external evaluation (70 marks) which is mainly end semester examination.												
Text Books:												
1	Daniel Jurafsky, James H. Martin “Speech and Language Processing” Second Edition, Prentice Hall, 2008.											
2	Tanvier Siddiqui: Natural Language Processing and Information Retrieval, U.S. Tiwary

GENERIC ELECTIVES (GE)

Course Code	Course Title		Lecture			Semester: I						
PGCS131GET	English For Research Paper Writing		L	T	P							
Version: 1.2	Date of Approval:		4	0	0							
Scheme of Instruction			Scheme of Examination									
No. of Periods	:	45 Hrs.	Maximum Score	:	100							
Periods/ Week	:	4	Internal Evaluation	:	30							
Credits	:	3	End Semester	:	70							
Instruction Mode	:	Lecture	Exam Duration	:	3 Hrs.							
Prerequisite(s): Basic knowledge of English												
Course Objectives:												
1. Understand that how to improve your writing skills and level of readability.												
2. Learn about what to write in each section.												
3. Understand the skills needed when writing a Title Ensure the good quality of paper at very first-time submission.												
4. Ensure the quality of paper at very first-time submission.												
Course Outcomes (CO):												
COs No.	Statement					Mapped Program Outcomes (POs)						
CO ₁	Understand the English for Writing Research Papers, Thesis.					PO ₁ , PO ₂ , PO ₆ , PO ₁₀						
CO ₂	Show conciseness, clarity and avoid redundancy in writing.					PO ₃ , PO ₄						
CO ₃	Summarize, evaluate literature, and write methodology, results and conclusion					PO ₂ , PO ₃ , PO ₄ , PO ₅						
CO ₄	Apply correct style of referencing and use punctuation Appropriately.					PO ₁₀ , PO ₁₂						
PO ₁ - Engineering Knowledge, PO ₂ - Problem analysis, PO ₃ - Design/development of solutions, PO ₄ - Conduct investigations of complex problems, PO ₅ - Modern tool usage, PO ₆ - The engineer and society, PO ₇ - Environment and sustainability, PO ₈ - Ethics, PO ₉ - Individual or team work, PO ₁₀ - Communication, PO ₁₁ - Project management and finance, PO ₁₂ - Life-long Learning												
Mapping of course outcomes with program outcomes
