

Anti-Tobacco Day was celebrated in College of Teacher Education on 31st May, 2023. Various activities were organized by the committee of co-curricular activities. Firstly, an expert lecture was organized by Dr. Shabana Ashraf, where she shared a number of case studies, which was followed by a documentary film.

All the students regarded the topic with the seriousness it warranted, though that did not appear to negate the wholehearted zeal that participation in any such event needs. Later, the students also undertook a Pledge Ceremony alongside the staff members. Lastly, the principal, Prof. Noushad Husain addressed the students about the consequences of tobacco use, a result exaggerated by its incredibly prevalent production--and asked them to spread awareness regarding this sensitive issue.
