REPORT

of

National Technology Day

11th May 2023

On May 11th 2023 National Technology Day was celebrated in CTE Bhopal to honor the contributions of respected scientists, engineers, and researchers in the field of science and technology. As we are aware, India is one of the fastest-developing nations in the world, the credit for which goes to its rapid technical advancements. We live in an era of innovation, and no country could traverse the path of development while undervaluing technological advancements. India has significantly raised its standards of science and technology in the last three decades, improving India's status on global platforms. In May 1998, Atal Bihari Vajpayee, the then Prime Minister of India conducted five nuclear bomb tests. The Pokhran - II was headed by the Missile Man of India, Dr. APJ Abdul Kalam, who believed that science is the most powerful means for the advancement of life. After the successful Pokhran - II test, India became the sixth nuclear country. To celebrate the occasion the National Technology Theme 2023 is "School to Startups- Igniting Young Minds to Innovate." Prime Minister Narendra Modi, on the occasion of National Technology Day 2023, inaugurated a programme at Pragati Maidan a grand event which all the students and faculty members of CTE Bhopal witnessed through the YouTube link provided by the Ministry of Education.

Through this programme, students were made aware of the government's achievements in technology, and in the use of technology in various sectors to advance Indian society. The programme marked the 25th anniversary of National Technology Day when PM Modi laid the foundations for multiple scientific projects. All the students of the college of teacher education proudly became a part of the programme.
