# ABOUT THE SEMINAR

Tafsir refers to the field of study which deals with the human interpretations and understanding of the verses of Holy Quran, in accordance with the linguistic properties of the text and Shari'a sciences. The use of this most exalted and dominant field of study is innumerable; which include a) extracting Shari'a rules from Quran, b) understanding the moral meanings of the stories narrated in Quran, c) internalising the best characters and traits etc. The instructional activities in Quranic sciences, specifically in Indian subcontinent, date back to the advent of Islam to the place. In the first phase, works of scholars were limited to adding annotations and footnotes to the existing commentaries. 7th Century Hijra onwards, scholars started writing independent Tafsir texts. In the periods of Gaznavids, Mamluks, Mogals and colonialists, a lot of energy has gone into the field. It resulted in a great revolution of production of several Tafsirs in Arabic language as well as the local languages such as Urdu, Persian, Tamil, and Malayalam etc. However, most of such works lay neglected on the dusty shelves of libraries. There is a high demand of turning the academic attention to these works and bringing them to light. While some of the Tafsirs have already been printed and are widely used for the academic purposes, there are many other works which have not been given proper attention. To bring out the value of these Indian versions of Tafsirs by doing research on them, we invite academicians and researchers to participate in this seminar with their academic contributions.

## OBJECTIVES OF THE SEMINAR

- ❖ To bring out the role of Indian scholars in the field of research in Tafsirs al Quran.
- ❖ To study traditional and modern Tafsirs from Indian subcontinent, with a special reference to the Arabic literature.
- ❖ To undertake an academic review of Arabic and non-Arabic Tafsirs.
