# USE OF E-LEARNING AS A TOOL FOR LEARNING AND DEVELOPMENT SUCCESS

Mr Bhimappa Rangannavar, Assistant Professor, Maulana Azad National Urdu University, College of Teacher Education, Shaheen Nagar, Shahapur gate, Hyderabad Road, Bidar-585401 Karnataka, [bhimappa10@yahoo.co.in](mailto:bhimappa10@yahoo.co.in) / 9448369736

**Abstract :** Quite simply, e-learning is electronic learning, and typically this means using a computer to deliver part, or all of a course whether it's in a school, part of your mandatory business training or a full distance learning course. Technology is always moving forward and there is no doubt that E-Learning will become a major contributing factor to education and training, but like all great developments, it's how it can work together with existing technologies that makes m-learning such an important tool. The rapid growth in Internet, mobile, and cloud technologies in the past decade has touched every aspect of human life. E-learning has been around for quite some time now, and as its popularity continues to grow within the educational sectors its capabilities are also growing along with it. Today it has become important to look critically at the learning outcomes of training and to adapt those outcomes. By making the e-learning platform mobile, students are constantly engaged with the course through their smartphones. This makes the learning a dynamic experience. In the near future, universities will not survive as the future is outside the traditional campus and outside the traditional classroom. India's potential as a huge market for e-learning is unchallenged. A large number of new users are accessing the Internet the first time from their smartphones, which is an ideal, personalised and education enabled platform for e-learning adoption.

**Keywords :** E-Learning, Tool, Development, Success.

## Introduction

### E-Learning

SAP Education's e-learning courses complement our tried-and-tested classroom-based training, allowing users to improve or maintain their skills by building online learning into their schedules. Your people have the flexibility to determine what, where, and when to learn. They can repeat learning units as often as required and control the duration of learning sessions. And your organization can realize significant benefits in reduced travel - and the resulting time and cost savings. E-learning courses include highly effective instructional elements and simulations based on authentic situations. By completing these courses, users gain a solid understanding of how to navigate SAP solutions and how SAP solutions can support their role-specific business processes and individual objectives - as well as your overall corporate strategy.
