PREFACE

In today's interconnected world, the swift pace of technology breakthroughs, globalisation, and environmental deterioration has resulted in the emergence of a multitude of global concerns that are both complicated and interconnected. The widespread adoption of digital technology, social media, and big data is revolutionising the ways in which individuals communicate with one another, interact with one another, and obtain information. The way in which people communicate, connect with one another, and obtain information is being altered as a result of the proliferation of digital tools, social media, and big data. It may be deduced from the observation that the discipline of socio-informatics is continuously evolving.

The progress of technology has brought about a number of new challenges and concerns, including data privacy, cyber attacks, intellectual property, and digital governance. However, these advancements have also brought about new difficulties and fears. In addition, people are becoming more conscious of the ways in which environmental degradation, climate change, and social inequity touch each and every individual. Because of this, it is now abundantly evident that we require methods of growth that are both healthy and equitable. Additionally, an increasing number of people are becoming aware of the reality that environmental degradation, global warming, and social inequality are all elements that have an effect on all persons. Our requirement for development plans that are both sustainable and equitable has been heightened as a result of this.This edited book, "Global Issues and Legal Challenges in Socio-Informatics, Political, and Environmental Scenario" aims to provide a thorough and cross-disciplinary look at the tricky problems and issues which arise at the intersection of technology, society, governments, and the environment. The book brings together contributions from scholars, researchers and experts from diverse fields; these include library and information science, politics, the natural sciences, geography and law, among others.

There are twenty-three chapters in the book, and each one of them explores a distinct angle. The book addresses, for instance, improving information retrieval, e-commerce, migration-related dynamics, pollution and global climate change, human rights and suicide, the issue of the reservation, legal protection for old people, sustainable development through ecotourism and so on. The chapters give in-depth analyses, critical points of view, and new ways to solve the world's most pressing and common problems. Anyone interested in the interconnected nature of technology, society, politics, and the environment—whether they are students, scholars, or working professionals—would benefit from reading this book.We hope that this book should complement the present debates and conversations on these crucial issues and provide readers with practical knowledge for developing sensible solutions and answers for a better and more equal future.

- ***Uttam Kumar:*** Prof. (Dr.) Uttam Kumar is working in Dept. of Geography, MMH College, Ghaziabad

CONTENTS

1. Enhancing Information Retrieval and Search Technologies in Koha: A Comparative Study and Implementation Analysis 01-14
Suresh Krishnan R

2. E commerce: Innovative business strategies achieving sustainable development goals under legal regime 15-26
Tanuja Tiwari

3. Mitigation of Climate Change By Harnessing Solar Energy 27-30
Hemendra Kumar and Shailendra Gangwar

4. Suicide as a human right issue: a comprehensive analysis 31-38
Reema Upadhyay

5. A Critical Study of Gender Discrimination In Indian Society 39-48
Seema Sharma and Hemlata Rani

6. A Review of The Global Climate Change Impacts, Adaptation and Mitigation 49-58
Sanjeet Pratap Singh

7. Foreign Policy and International Relation of India with European Union 59-65
Menaka Biswal and Rosy Mishra

8. Role of Payment Gateway in E-Commerce 66-74
Amit Gunjan

9. Sustainable Ecotourism in Assam-Challenges and Remedies 75-86
Reemina Narzary and Rajdeep Deb

10. Socio-Legal Dynamics of Capital Punishment with Specific Reference to Judicial Trends 87-94
Ram Roop Meena

11. Ecotourism in Western Uttar Pradesh: What the Future Holds For 95-114
Shivam Yadav and Uttam Kumar

12. Knowledge and Perception of Climate Change on Youth Health: A Study on College and University Students in Bangladesh 115-146
Mohammad Shahjahan and Tahmina Akhtar

13. Heavy Metal Pollution: Associated Risk and Mitigation Strategies 147-164
Neetu Singh

14. Protection of Laws for the Aging Population in India: An Analysis 165-176
Sunayana Trisal

15. Reservation: A problem to a solution? 177-181
Ayush Sachan

16. Over-tourism in Darjeeling hills of West Bengal, India: Can Homestay Tourism Provide a Viable Alternative? 182-211
Shomnath Dutta and Shuvendu Dey

17. Confluence of Surrealism and Spirituality in *Jaya Ganga, Le Gangeet Son Double* 212-221
Ashis Mahato and Nishant Singh

18. Air Pollution and It's Impact on Biosphere 222-231
Indu

19. Lives and Livelihood Pattern of Traditional Honey Collectors (Mowals) of Sundarban in Bangladesh 232-251
Humaun Kabir; Sk. Tauhidul Islam and Soaib Ahmed

20. Dynamics of Migration, Export of, and Information Policy on Coffee from Karnataka State to Global Markets 252-262
Murtala Ismail Adakawa and N.S. Harinarayana

21. Changing Livelihood Patterns of Garo Community People in Bangladesh 263-283
Soaib Ahmed; Humaun Kabir; Khandakar Robin and Mohmmad Shahin Khan

22. Transforming Academic Libraries in the Digital Environment 284-295
Anita Chandwani

23. Sustainable Development – A Human Right Perspective 296-306
Sudhanshu Chandra and Rishikesh Singh Faujdar

Word Index 307-317
